

STOCKTON IRIS GARDENS

1994

GREETINGS 1994

Once again, this iris garden has moved, this time to Stockton, California, where quality bearded irises have been grown and hybridized for many years by leading iris nurseries. A number of factors made the move necessary, but behind the move to Stockton ultimately are the desires foremost to supply quality plants and to continue to serve customers in the manner in which we would like to serve them, and to build on the reputation and enormous good will of Cottage Iris Gardens, as well as to find a new identity that can accommodate the huge expansion in this business. We hope 1994 is the year that these goals can be realized.

For iris enthusiasts, you may recognize the address of this garden as the former Stockton address of the iris nursery of Keith Keppel. Keith, together with his wife Kay Nelson, have moved to Oregon where Keith will continue his iris garden while having more acreage and the other benefits that Oregon has to offer. We wish him well in the new climate; we know what it is like to get up and move an iris garden. Moving this garden to the Stockton area would not have been possible had it not been for several individuals, including Jean Erickson and Michael Mouw (who always seem to be there when you need them), and Jim Begley. Chuck Gabrysiak was insane enough to volunteer to help plant several thousand iris, and we took him up on his offer. We also appreciate the assistance of Bud and Alice Cox of Stockton. And of course, there's Ben Hager and Sidney DuBose, the co-owners of Melrose Gardens in Stockton. They were generous with plant material and something far more valuable, their advice, and when it came to advice, we were like the neighbors always with the cup, trying to borrow some. Thank you.

Iris previously introduced through Cottage Gardens continued to receive recognition in 1993 from judges of the American Iris Society, and we are grateful. James McWhirter and Jim Begley received coveted Awards of Merit for America's Cup and Tennison Ridge. Larry Lauer received an Honorable Mention award for his first tall bearded introduction, Opening Act. Other Honorable Mention awards included Hot To Trot, Field of Dreams, Sinister, Pink Gala, Shopper's Holiday, and Ramona Howard.

With respect to 1994, we have great expectations. Larry Lauer has four introductions that reflect the wide range of colors and patterns for which he is breeding in his hybridizing program. Expect other colors for next year, but for this year James McWhirter is concentrating on the blues and whites, his favorite color class, with four introductions. Bob Brown and Vernon Wood each have an introduction. And we are delighted to be introducing Walt Dean's very first variety, Alene's Other Love, a standard dwarf bearded lovingly named after his wife.

In addition to these iris, we have several introductions from hybridizers that the public may associate with other sources. These include two varieties for Frederick Kerr of Sacramento, California, Lonesome Dove and Age of Innocence; Amber Artisan of Bryce Williamson, who many will know for his 1990 Dykes Medal winning variety, Jesse's Song; Humility, an intermediate bearded iris from Larry Harder of Ponca, Nebraska, and who serves as historian and board of director member of the American Iris Society; and Abbey Road, from Dave Silberberg in Mount Angel, Oregon.

Other features for 1994 include Alexander's Ragtime Band, the last variety ever to be introduced under the name of the late Larry Gaulter; and Frequent Flyer, a reblooming introduction of Richard Gibson of Sacramento, California. Frequent Flyer inaugurates the new "Multi-Season" Iris section of this catalog. We think Dick's reblooming breeding program is at the forefront in the development of reblooming iris, and we look forward to a stream of introductions from him in future years.

Finally, we would like to thank the customers of Cottage Gardens over the years, not only for their loyalty and orders, but for their enthusiasm, as expressed by their cards, letters, phone calls, and garden visits. A few years ago, Bernard Levin, a critic and writer, observed that Americans were in danger of losing one of their most important traits -- their enthusiasm. That simply is not true of the people that the late Larry Gaulter used to call, "The Iris People." The American Iris Society convention will be held in Oregon this year and we look forward to seeing many of the Iris People there. In addition, you are always welcome to visit the garden, particularly during peak tall bearded bloom which in Stockton arrives at the end of April. Please note that this year the planting is located at two fields, at the Lillian Avenue address and, nearby, on White Lane in Stockton. Please feel free to call for directions; we can always drop a map in the mail for you, too. You may also wish to visit the old Cottage Gardens' location in Wilton, California, approximately 45 minutes away, where Larry Lauer and his wife, Marcy, continue to grow and hybridize fields full of our favorite flower, the iris.

Enjoy the bloom.

NEW INTRODUCTIONS

ABBEY ROAD (Dave Silberberg, Oregon) TB, M, 35 inches. The road, here, is a road that leads to an historic abbey, located in Mount Angel, where the hybridizer and his wife, Nancy, make their home and operate a commercial iris nursery. **ABBEY ROAD** is a lovely, gently ruffled, reverse creamy yellow and white amoena, with the standards deeper cream yellow and the falls near white touched cream yellow on the shoulders. The beards are soft yellow tipped creamy white, and there are typically 7-9 buds. The iris was hybridized and propagated originally in New Jersey, where the hybridizer formerly lived, and thus has been tested in several climates. There are not many reverse cream amoenas, and this is a good one. Please see photo on page 2. **SEEDLING 85-34C: Pleated Gown x Gangee's Moon.** \$35.00

AGE OF INNOCENCE (Frederick Kerr, California) TB, M, 38 inches. Frederick Kerr, who operates Rainbow Acres Iris Garden in Sacramento, California, has been breeding for several years for an "Emma Cook" pattern. The Emma Cook pattern, which gets its name from the iris that Paul Cook introduced in 1959 to honor his wife, is characterized by a band or rim on the outer edge of the falls of the iris; however, unlike a plicata, which has tiny dots of color creating its banded effect, on an Emma Cook type, the band consists of a solid color pigmentation. A good example of the pattern is the recent Award of Merit winner, Gypsy Woman. The rim on **AGE OF INNOCENCE** is a cool blue which encircles pure white falls and golden yellow beards. The standards are also pure white. The plant has 2-3 branches plus a spur, and averages 7 buds. Please see page 6 for photo of this unique variety. **SEEDLING 88-03-02: Edith Wolford x Condottiere.** \$35.00

ALENE'S OTHER LOVE (Walt Dean, California) SDB, M, 10-11 inches. It has been some time since we have been involved with introducing an SDB, and we are very enthusiastic about this one. **ALENE'S OTHER LOVE** is the first of what we hope are many introductions from our good friend, Walt Dean, of Fairfield, California. Walt lovingly and playfully named the variety with his wife, Alene, in mind. The standards of this variety are pink at the top, blending to lavender in the center and purple towards the base. The falls are greyed orange,

with a small white starburst under bright lavender beards. **ALENE'S OTHER LOVE** is a rapid increaser and although it does not rebloom despite having reblooming parents, it is extremely floriferous. **SEEDLING T8: Triplicate x Third Charm.** \$15.00

ALEXANDER'S RAGTIME BAND (Larry Gaulter, California, by Bob Brown) TB, M-ML, 37 inches. Among his many talents, the late Larry Gaulter was an accomplished jazz musician as a young man, and, so he said, the namesake of this variety was a favorite tune. When Larry Gaulter's health declined, this variety was rescued as a seedling in the late 1980s from Larry's garden by Bob Brown. It is a purple bitone, with its deeper purple falls having a velvet application, as well as white beards that appear over a subdued white "eyelash" area. It has a ruffled flower form, heavy substance, 7-8 buds, and has already been incorporated into the breeding lines of several hybridizers. This iris will be the last one introduced under Larry Gaulter's name by any source, and we will donate proceeds from its sale to the American Iris Society Foundation in Larry's honor. As the music of **ALEXANDER'S RAGTIME BAND** recedes, the memory of the many beautiful iris Larry Gaulter introduced, including this one, remains. **SEEDLING G86-14: Titan's Glory x His Lordship).** \$35.00

AMBER ARTISAN (Bryce Williamson, California) TB, M-L, 32 inches. We guested this amber beauty last year, saw it perform as a guest in Oregon, fell in love with it and asked the hybridizer if we could be the source for its introduction. The standards are a smooth blending of buff, tan, amber and gold; the falls are similarly blended and have a golden tan wash on the shoulders and a milk-violet blaze below the yellow orange beards. **AMBER ARTISAN** is deeply ruffled, and has heavy substance which allows it to maintain its flared flower form throughout its period of bloom. 7-8 buds. Please see photo on page 42. **SEEDLING A-11-K: Armistice x Fan Club.** \$35.00

CABOT COVE (Larry Lauer, California) TB, M, 35 inches. Iris, she wrote! This blue orchid variety has a distinct white wash on both the standards and falls, that lightens as the flower ages creating a wonderful sanded pepper pattern along the shoulders and outer edges of the falls. It also has attractive lavender style arms and white beards tipped lavender and yellow. We grew CABOT COVE in two year plants last year; with 8-9 buds on each plant, and a sea of bloomstalks, the garden was awash in color. SEEDLING 86-28-1: Cocktail Hour x Go Around. \$35.00

CITY OF PARIS (James McWhirter, California) TB, M, 38 inches. A San Francisco landmark department store for many years, the City of Paris was famous for its four-story Christmas Tree, fine food shops, and all-around class. The name CITY OF PARIS summons good memories for many people, and reminds people of a high level of quality. The iris, CITY OF PARIS, is an example of quality, a fine addition to the white, blue white color class. The shoulders are touched gold, and its blue beards are tipped white. From favorite parents of the hybridizer. Please see photo on page 42. SEEDLING J-87-110: Ice Castle x Winterscape. \$35.00

FREQUENT FLYER (Richard Gibson, California) TB, RE, EM & Oct, 34 inches. Our fall last year was brightly lit up by the row of FREQUENT FLYER, which remained in bloom for all of October and November, on plants that had been planted only two months earlier when the hybridizer, Richard Gibson, drove them over and helped us water them in. Dick Gibson is someone that is passionate about reblooming iris, a passion that has been infectious, and which has motivated us to think about the reblooming material currently on the market and the future role of rebloomers. We are glad to be associated with him and his passion for rebloomers. FREQUENT FLYER is a broad, modern, ruffled white with self beards faintly tipped yellow. It consistently had 9 buds this past fall on fine three-way branched stalks and, during the Spring, held its own among the "oncens." Please see photo on page 2. SEEDLING 013-3: Eternal Bliss x White Reprise. \$35.00

GOTHAM CITY (Larry Lauer, California). TB, M, 34 inches. Very rarely does a new color come along in hybridizing tall bearded iris and, more often than not, the newest \$35.00 variety is compared, favorably or unfavorably, to one already available commercially. GOTHAM CITY, however, is a color-break, best described

as a smokey garnet self with brownish red beards; the falls have a velvet sheen and are distinctively veined. 7-9 buds ensures a lasting bloom. Please see our photo on page 2 of GOTHAM CITY, a sibling to Larry's introduction from last year, BUSY SIGNAL. We hope that you will be as impressed by the color of GOTHAM CITY as we are. SEEDLING 86-7-1: Chocolate Shake x Cinnamon. \$35.00

HUMILITY (Larry Harder, Nebraska) IB, M, 19 inches. There are very few blue intermediate bearded varieties available, and even fewer that are as good as this one is -- a light lavender blue, with excellent substance, perky round falls and white beards tipped very pale yellow. HUMILITY has performed well in California; the cold-hardy plants from Nebraska, where the hybridizer lives and operates Maple Tree Gardens, quickly established themselves and bloomed the first year. Larry Harder has been around iris for many years, and HUMILITY is a product of a well developed sense of what qualities an IB introduction should have. In all HUMILITY, we can recommend HUMILITY. SEEDLING 87-1: Love x Am I Blue. \$15.00

ICED TEA (Larry Lauer, California) TB, M, 36 inches. This exciting bi-color has bronzed tan standards, and blazing electric violet falls with veining and bronzed tan shading around the shoulders. The beards of ICED TEA are gold tipped bronze, the 8-9 buds often open three at one time. During the hot summers in Sacramento, we often joke about the fact that the hybridizer usually has a glass of iced tea in his hand, and several containers of sun tea brewing in the sun to ensure an uninterrupted supply. It is a happy coincidence that the name ICED TEA was available to capture the cool combination of colors of this variety. SEEDLING 86-25-1: Captured Beauty x Hilow. \$35.00

KLONDIKE LIL (Vernon Wood, California) TB, E-M, 32-33 inches. There's gold in them there hills, so move over, Diamond Lil and make room for Klondike. Most people associate Vernon Wood with pink breeding, but his hybridizing program encompasses a broad range of colors, including this brilliant, ruffled buttercup yellow highlighted by orange beards and touched ever so slightly orange at the top of the falls. A stalk in last year's display bed, with four open flowers well placed on wide, sturdy branches, was overwhelming. And 8-11 buds should provide a lasting, golden bloom. Please see photo on page 2. SEEDLING 90-90: Bourbon x Flaming Victory. \$35.00

LAKE PARK (Bob Brown, California) TB, M, 37 inches. Over the years, Bob Brown has introduced so many fine irises to the commercial market, and **LAKE PARK**, a tall, majestic, dark purple self, is no exception. With 7 buds, the medium to large sized blossoms are ruffled and fragrant, and well placed on good, wind-resistant, stalks. The purple self beards are placed over a slightly lighter area at the center of the falls. Last year Bob Brown moved to Lake Park in Oakland, the namesake of this iris, and gave up the garden that he and his wife, Jean Brown, painstakingly maintained. Bob assures us, however, that he will be with his seedlings at Stockton Iris Gardens this Spring and promises to bring his pollen dauber. We intend to hold him to the promise. **SEEDLING 85-18: Park Lane x Titan's Glory.** \$35.00

LONESOME DOVE (Frederick Kerr, California) TB, M-L, 35 inches. Romance, drama, and a pioneering spirit are at the heart of **LONESOME DOVE**. This variety is a deeply ruffled and lightly laced apricot, its falls are a lighter, soft apricot, with a near white central area under the tangerine beards, and deeper apricot shadings at the shoulders. The 7-8 blossoms have tightly held standards, and flared falls, held upright by their heavy substance and width. Return to **LONESOME DOVE** this Spring with an epic iris. Please see the photo of this variety on page 6. **SEEDLING 87-29: Moon's Delight x Speculator.** \$35.00

PRINCE OF TIDES (James McWhirter, California) TB, E-M, 38 inches. If you ask a hybridizer to explain his fascination with a particular color class, you are likely to get a rather uninteresting but honest response, "It is my favorite color, that's what I've always liked." Blues have been the favorite colors of this hybridizer, and he has worked with them for some time leading up to **PRINCE OF TIDES**, a heavily ruffled clear sky blue with white beards tipped blue. With 7-8 large, billowy blossoms, **PRINCE OF TIDES** rolls in somewhat early in the Spring iris season, remaining in bloom until midseason. This iris is being used heavily by the hybridizer in subsequent blue-white breeding with excellent results. Featured in color in the January 1994 AIS Bulletin. **SEEDLING J88-18-3: J81-74:(Winterscape x Sky Gem) x Busy Being Blue.** \$35.00

RODEO DRIVE (James McWhirter, California) TB, M, 36 inches. Glitz and glamor is what you'll find on **RODEO DRIVE**, an upper class, well-formed, broad, ruffled, rich cranberry purple self, with self purple beards, and darker veining on the plush wide falls. **RODEO DRIVE** has a pronounced fragrance, and walking by the flower in the garden it is as if someone had taken the liberty of spraying your hand with a tester bottle of the latest scent available from an exclusive Beverly Hills store. The hybridizer has been working to obtain this color for some time. **RODEO DRIVE** is for expensive tastes. Please see photo on page 2. **SEEDLING J87-77-1: Winterscape x Larry Gaulter.** \$35.00

STRICTLY BALLROOM (Larry Lauer, California) TB, M, 34 inches. A sparkling new neglecta, near amoena, with crisp color separation and terrific ruffling. The standards of the 8-9 blossoms of **STRICTLY BALLROOM** are tightly held, and the clean white standards stand in excellent contrast to the rich medium blue falls with lavender undertones. This variety has attractive, swirling ruffling, which it holds together in a more compact flower than its sibling, **STAIRWAY TO HEAVEN**, which Larry introduced last year. This sister act is worth seeing. **SEEDLING 87-48-4: Edith Wolford x Breakers.** \$35.00

TELEGRAPH HILL (James McWhirter, California) TB, M, 38 inches. This is one of the most unique blues ever introduced commercially. Enormous heavily ruffled sky blue blossoms with the falls distinctively edged in a solid, silver-white line; big, bushy, white beards tipped yellow bronze and of incredible width at the throat; good substance and fine flower form. The name of this variety derives from the name of one of San Francisco's famous hills, Telegraph Hill, which is the location of the Coit Tower with its WPA murals; beautiful panoramic views of the rest of the city including Lombard Street, the crookedest street in North America, and of San Francisco Bay, including Alcatraz Island and both bridges; and which has amazing residential buildings located minutes from the financial district. **TELEGRAPH HILL** is appropriately a stately iris, and its presence in the garden does not go unnoticed. Please see photo on page 2. **SEEDLING J87-5-A: Winterscape x Bridal Fashion.** \$35.00

NEW TO IRIS? OR JUST HAVING TROUBLE CHOOSING?

Leave the decisions to us. Choose a price level of \$25.00, \$50.00, \$75.00 or \$100.00 and we'll send you an assortment of iris worth at least double the value you select based on the prices in this year's catalog. You may want to indicate with your order whether you are new to iris, whether you would like a few expensive varieties, many older proven performers, or a mix of new and old, and whether there are certain color types that you favor. Also indicate whether you would like to grow median irises. We will try to select iris which we think will perform well in the customer's area. These pre-selected assortments are an excellent way to become familiar with iris, the rainbow flower.

1994 ORDERING GUIDE

Minimum Order: \$20.00. All orders acknowledged upon receipt.

Postage & Handling Charges: For Domestic Orders - \$4.50 up to 15 plants; \$5.50 for over 20 plants. Add an extra \$1.00 and receive a plant of Edith Wolford. United Parcel Service is used whenever possible. If you prefer an alternate method of shipment, please send sufficient funds to cover postage and we will accommodate your alternate choice of shipment.

Payment: To be made at time of order by check or money order payable to Stockton Iris Gardens. **Foreign orders please use International Money Order or include payment in U.S. Dollars (for more information on foreign orders, please see below).**

Shipping Season: July & August. A shipping calendar appears on the back of the order blank, and customers may circle the general time period of preferred shipping. These shipping choices will be honored if at all possible. We recommend early shipping to colder climates. Orders accepted until August 19, 1994; please contact us prior to ordering after this date.

Substitutions: Made only with permission, and a substitution list from you is appreciated. If you indicate on your order blank that we may substitute on your order, in the absence of a list of alternates, we will substitute only with newer or more expensive varieties. Last year we were dissatisfied with our method of tracking orders, which resulted in some early orders that designated late shipping dates receiving a disproportionate amount of substitutions or refunds. We believe we have remedied this problem, and early ordering should help eliminate substitutions.

EXTRAS: Newer irises, particularly some of our introductions, will be sent to customers as our way of thanking them for their patronage. In addition, this year customers may use BONUS DOLLARS to obtain extra plants. The way it works is as follows: 1) Total the dollar amount of your order (before shipping and applicable taxes) - this amount is your Order Amount; 2) Divide the Order Amount in half - this amount represents your BONUS DOLLARS; 3) On the BONUS DOLLARS section on the reverse of the order sheet, use your BONUS DOLLARS to purchase at their catalog prices the plants that you would like to receive as extras. As an example, if you order \$50.00 in plants, you may choose an additional \$25.00 in extra plants by using your BONUS DOLLARS. No extra shipping charges apply to additional plants chosen with BONUS DOLLARS. Although we reserve the right to substitute on BONUS DOLLAR choices, we will try to accommodate the selections as if they had been made using real, rather than BONUS DOLLARS. We believe that the combination of BONUS DOLLARS and the distribution of a newer variety here and there should result in customers receiving 100% of their orders in bonus plants.

Warranty: Please notify us at once of any discrepancy in your orders, or if you are not completely satisfied. Your patronage is extremely important to us. Stockton Iris Gardens offers a list of the finest tall bearded and median iris in commerce. The plants are guaranteed to be true to name, and to be healthy plants when you receive them. We will replace at no charge plants which do not live up to the terms of this warranty.

Gift Certificates: For the irisarian who has everything. Available in any amount of \$20.00 or more which we will send, along with our catalog and gift card, to the lucky person of your choice.

Mailing List: If you know of anyone who you think would like to be included on our mailing list, please drop us a note or jot the name and address on the back of your order sheet, and we will be happy to send the person a current catalog at no charge.

Foreign Orders: Minimum order \$100 plus shipping and handling and documentation fees. Customer must include payment of \$10.00 for phytosanitary certificate. The customer must also provide any import permits. Canadian customers, in particular, must furnish a shipping label from the Canadian Department of Agriculture.

Estimated air shipping charges are \$9.50 for the carton and first plant, \$2.30 for each additional tall bearded plant and \$1.00 for each additional median rhizome. These estimated charges must be included prior to shipment, with the payment for the order. In the event of overpayment, a refund will be sent to the customer with the order. If additional funds are needed to cover postage costs, an invoice will be sent to the customer with the order. No foreign orders will be accepted after August 1, 1994 for shipping in the 1994 season. Customers will receive bonus irises of our choosing and will not be billed for any additional expense relating to the shipping of such bonus irises.

Cultural Instructions: Easy to follow directions will be included in the shipping box with customers' orders. Remember that, in general, July and August are the best planting months, although irises can be planted at any time the soil can be worked. Irises like sunny, well drained locations. The rhizome, the botanical term for the bulb-like rootstock which customers receive, should be placed just below the surface of the soil, and should be receive thorough watering from the time they are planted until new growth has started. Commercial fertilizers containing relatively low levels of nitrogen may be used at the time of planting the rhizomes and then, again, prior to bloom. In addition to the instruction sheet sent with orders, we are available to answer any questions that customers may have concerning the proper culture of bearded irises.
