Dear friends,

Once, when asked by the beloved late Hazel D. Moyle (garden editor for one of the Salt Lake City newspapers) if I might write something for her pertaining to iris, I confided that I could not write, at which the retort came: "Who writes your iris catalog?" Informing her that "Uncle Tell" did, she said, "Well, get him to help you." Of course, Tell and Uncle Tell being one and the same there was really very little help available, and I feel as helpless when the task of compiling the catalog comes around each season.

"Uncle Tell" lives such an interesting and full life with fingers in so many different pies, that there is never a dull moment what with the raising of fancy poultry, a few pairs of fantail pigeons, Roller Canaries (had since I was 10 years old), dabbling in drama, and a little family of four for Marie and me to look after—and believe me there is always something to be done for them—if not untangling a kite string or putting on the doll's shoes it is something "more serious."

The arrival of our daughter Jan Elizabeth, on January the 18th of this year, brought us great joy, yet by the time "Uncle Tell" (and daddy) got the two boys dressed, fed and off to school and little Vickie Marie dressed, fed and over to grandma's and two visits to the hospital daily—with lunch and dinner to prepare, the livestock fed, etc., I was "fit to be tied," as the saying goes, and was relieved when mother was once again home and things were back to "normal." But with such a grand little thing as Jan in the house all I could do, actually, was inspect her every ten minutes, so I have accomplished very little since the above date. I am, therefore, going to pass up a lengthy "hybridizing" section for the catalog and any fanciers who desire this information may still obtain the 1952 issue of my catalog for 10c to cover handling and mailing as I still have a supply of these on hand. A few of the 1954 issue may be had as well for those who wish to have it for their files. The experienced as well as the amateur will, I am sure, find the pedigree listing of help and use, so I continue to list these, when known.

Twyla Olmstead has graciously, and generously, given permission to let me use her drawings in this catalog and I am sure iris lovers will get many a chuckle from her keen sense of humor. These drawings are done on the "spur of the moment" and are usually found on the back of each envelope or at the bottom of the page of one of her letters. I gather that the postal carriers and her host of friends think something amiss when one of the little cartoons is not present. We know you will enjoy these with us, and if you do we hope to add a few more next year. Mrs. Olmstead did some similar drawings for Winston Roberts' (famed for many wonderful gladiolus including *Columbia* and *Boise Belle*) gladiolus catalog as well, for he wanted to share these pixie-like creations with his friends and customers. We appreciate Twyla for making our days a little brighter!

What a list of new things we have to offer this year!

Some, as I have indicated, are introduced primarily for breeding purposes, yet each is distinct in its own right. Naturally, they are not all Dykes Medal potentials, but we are sure they will be enjoyed by fanciers for some years to come. We are very happy to have two more iris from Mr. Schortman, and one from his neighbor and friend, Mr. Gibson, and a truly lovely iris his *Nomohr* is, and rather surprising to me since it comes from *Elmohr* pollen, a pollen I have never found fertile. Yet Mr. Gibson gave me a clue to possible success in using "Mohr" pollen when he said he applied it while still moist. A difference in soil, climate, or even trace elements in the soil, may play a part in the fertility of some of these that are not often found fertile. Mrs. Cavagnaro's *Anytime* (Alba Superba x Lady Mohr), which I hope to introduce next year, is another proof of the use of pollen found not too fertile. This would indicate that one should not give up at a few failures for compatible parents may be found, or it may be pollen will be good one day and not another. *Capitola* is erratic in its production of pollen—sometimes having little if any, or pollen which seems to be "caked" on the stamens. I have found *Capitola* yields more pollen if the plants do not have "wet feet" at blooming time.

There seems to be a growing interest in Table Iris and last year we were charmed with the unusual *Winken and Blinken* of Mrs. Haggensjos from Oklahoma, so we are introducing it for her. Ed Watkins' *Corsage* found us by its side time and time again for its unusual novelty, as did Mrs. Noyd's *Golden Flash*—both of which have unlimited possibilities in breeding. Stanley Clarke's *Rio Arriba* reminded us of *Char-Maize*, but a different shaped flower, a different colored beard and a little onco-blood thrown in. We find it most unusual. From the "breeder of GREENS" we are offering Mr. Murray's two advances in this class. John Ohl has been a lover of the Mohr family for a long time and at last has produced one he feels worthy of introduction and when I saw it last spring I was anxious to offer it to the iris loving world, for it is one that will bring him fame. Margaret Albright's two lovelies, *Gracille* and *Lasses Taffy*, are good iris in their own right, but hold unlimited possibilities for breeding. *Gracille* has the greatest vigor of any plant I have ever seen and should produce a marvelous array of wonderful descendants in the hands of discriminating hybridizers for it will throw unusual colors in blends, pinks, cream, orchids and pinks, surely, and should give that wonderful ruffling or crinkled-edge that so many of our modern iris have.

Mrs. Ralph Nelson has been hybridizing for several years and all who know her know her critical taste and judgment so her first introduction had to be good. And we might say the same for Mr. Wadland of Sarnia, Ont., Canada. Mr. Becherer is already well known for several iris, yet we believe of all we have grown of his that *Snow Goddess* will bring him the most fame even though we continue to be charmed by his lovely *Madam Mohr*. Mrs. Crosby's good taste in selecting her seedlings is reflected in the things she has released thus far, and you will not be disappointed in the two she has to bring out this year. I persuaded Mr. Fred Crandall, of Seattle, Washington, to let me introduce his *Rainier Valley* for breeding purposes although he might have preferred to wait for one of its children. I think a goodly number of hybridizers would prefer to use the close-up *I. hoogiana* blood themselves and not wait for one of its offspring, so I am listing it at a modest price and I know you will not be disappointed in it either as a flower or as a parent. It is the best of the blue *hoogiana* seedlings I have seen, and although I think my own *Hoogie Boy* has a lot of charm it is not as easy to grow, by any means, as *Rainier Valley*. Mr. Brummitt's things from England, and finally "Uncle Tell's," which we cannot appraise with an impartial eye.

There you have an imposing list of new introductions from a host of fine hybridizers, and in the following pages you have a rather comprehensive list of modern bearded iris, as well as some fine *Spurias*. We think the Dwarfs and the newer hybrids with *I. pumila* blood very fascinating and they hold unlimited possibilities in themselves as well as in the bringing of new vigor, color and form into the Tall Bearded. The "lilliput" hybrids of Geddes Douglas and the "intermediates" of Paul Cook are quite fertile both ways to other iris of their own type and to the regular Tetraploid tall bearded, so new vistas are in the offing. In Dwarfs, Mr. Welch, and others, are getting "Blacks" from crossing the *pumila* yellows with blues. I wonder if this would work the same with Tall Bearded? Their color-inheritance might be different. At any rate the field is open to any who have the love and time to devote to such a fascinating endeavor.

Several of my friends have written of experiments in germinating iris seed. We all know the amoeanas seem to be a little difficult to germinate. Two of my friends (and I will reveal their names next year if continued success bears out their early success) have found that by gathering the pods just before they crack open and putting them in closed jars and freezing the pods until very late fall (just before the first snow, in fact) before shelling out the seed and planting it that almost 100% germination resulted. One of the growers gathered the seed normally, put it into bottles after it was shelled out—put the closed bottles in the refrigerator (not freezing the seed) until planting time in October, soaked each batch of seed in water for 3 or 4 days then poured off the water and dusted the seed with Rootone before planting. Then the secret of a good seed bed remains. This should contain a light sandy soil with perhaps some well-rotted barnyard manure, peat moss, compost and good soil thoroughly mixed to a depth of at least 4 inches. The seed-bed should never be allowed to dry out after the seeds have been planted. If the bed is covered with glass, or other protective covering after winter has set-in, the frames should not be removed until danger of frost is over and the little seedlings should be set out in the cool of spring—preferably before the T.B. iris bloom to insure the best growth. Some of the new root-forming stimulants such as Hyponex, Liquid Vigoro or liquid fish fertilizer each mixed in the proper amounts of water will help to feed the seedlings and keep them from wilting (shock) if the roots are soaked in these solutions (one or the other) before transplanting. One should remember, however, that these tiny plants need water and the ground should be moist when transplanting and it would be wise to water them as they are planted and as often as needed thereafter until they get established and on their own, when less frequent waterings will be necessary. Now all that one has to do is keep the weeds down and in a year new creations open to thrill, or disparege, the eager hybridizer. Yet "hope springs eternal" and we try again and again!

Best wishes and happy gardening to all.

As ever,

"UNCLE TELL"

1955 INTRODUCTIONS

BELLA MOHR* (John J. Ohl). M. (William Mohr x Sable.) Wide, full, dark, glowing purple free of haft markings. Actually a "Sable" grown up to Elmo's size and shape. Vigorous in foliage and rhizome growth. Height 36 inches. Net **\$25.00**

BILL BROWN (Muhlestein). E.-M. (Veishea x Casa Morena) x (Casa Morena x Tobacco Road.) The largest coppery-brown iris I have grown and a very smoothly finished self it is, too. Will sunburn in extreme sunlight—its only fault. Height 38 inches. No. 49-40A. Good stock permits a low introductory price. **\$10.00**

BINGHAM* (Muhlestein.) M.-L. ((Ormaco x Golden Eagle) x (N. J. Thomas x Aztec Copper) x ((Elena Choosing) x (Zebulon x Golden Eagle.)) Oncocylus blood appears in the pedigree of this iris four times, yet the flower appears strictly tall-bearded. A very smooth, brilliant, red-copper self free of any venations. For the front of the border. Fertile both ways. Height 32 inches. H.C. 1954. Under number 51-72C. Net **\$15.00**

BLUE STARDUST (Muhlestein). M.-L. (Blue Spire x Gloriole) x (Cahokia.) Cornflower-blue glittering with "stardust." Lovely wide, large flowers I guarantee to please. A pedigree to produce blues and whites. No. 48-75A... **\$5.00**

CORSAGE (Edward Watkins). E.-M. (Katherine Larmon x Ola Kala) x (sister sdlg.) A white and yellow novelty. No two flowers and no two petals are ever exactly the same. One standard may be yellow — another white, while the third may be half yellow and half white, or only splashed with yellow; the same is true of the falls. I think it unusual and different and might very well be a break for breeding new and unusual color combinations. Height 24 inches. **\$10.00**

ELEANOR Z (Muhlestein). E.-M. ((Sister to Gold Ruffles x Spindrift) x (Pink Formal)) x (Party Dress.) Tall, somewhat ruffled true shell pink with quite a good depth of color. With such a pedigree it cannot miss as a breeder. Named for Miss Eleanor Zeiler of Larchmont, N.Y. Height 38 inches. No. 50-13. **\$10.00**

GENEROUS* (Muhlestein). E.-M. (Utah Sunset x 49-2: ((Elena Choosing) x (Zebulon x Golden Eagle.)) Gigantic golden-russet. Actually the flowers are too large for such a short-growing plant, but I introduce it for breeding purposes since so many have asked for it. Has re-bloomed in California. Should put size and smoothness into coppers, reds and tans. Very fertile both ways. Height 24 inches. No. 52-7. **\$15.00**

GOLDEN CORONA (Crosby). M. (Lancaster x Daybreak) x (Pink Formal.) Yellow standards, white falls bordered yellow. The yellow is very bright and clean and the white very white, giving the wide, somewhat waved, flowers a smart and charming personality. Height 36 inches. Net. **\$15.00**

GOLDEN FLASH (Mrs. Walter E. Noyd). E.-M. (Midwest Gem x Heritage.) Rich yellow with a bright tangerine beard. Semi-flaring falls. Standards cupped. Very good substance. This cannot miss as a breeder for pinks, salmons, yellows and by-products of pinks as well as ruffling. Height 32 inches. No. N 2-9. Net **\$15.00**

GOLD TORCH (Muhlestein). M.-VL. (Matula x Gold Ruffles) x ((Ola Kala) x Golden Majesty x Spun Gold.) A brilliant deep yellow to help extend the iris season. In the same color-range as Solid Gold. Flower shape leaves something to be desired, but with such a pedigree it should be a most wonderful parent for rich things as well as ruffling. Wonderful grower and increaser. No. 51-87. **\$5.00**

GRACELLE (Margaret Albright). E.-M.-L. (Dreamcastle) x (Sister to Pink Salmon x President Pilkington.) Pinkish-lavender blend with an electric lavender-blue flush in the falls. Edges of both standards and falls are ruffled and laced. The flowers are very large, wide and clean, yet a little closely-bunched due to inadequate branching for such a flower, but those of us who have seen it know its quality and charm and I predict a great future for this beautiful iris as a breeder for many wonderful colors. It is out-crossbred. Tremendous rhizomes that are very vigorous, winter hardy, and fast of increase. Fertile both ways. H.C. 1954. Net **\$25.00**

GREENBACK (George H. Murray). E.-M. (Purissima) x (Gloriole x Caroline Burr.) Beautiful, wide green-white with very green buds. Tall and beautifully branched, it should be a breeder for greens as well as blues, whites, and possibly blue bi-colors. Wonderful substance. Height 38 inches. No. 249. **\$15.00**

GREEN CHANCE (George H. Murray). E.-M. (Ap-pointee x Green Pastures.) Actually a char-treuse bi-color, and the falls have more actual green than any other iris I have ever seen. A large flower that needs more substance, so I am introducing it as a "green-chance" breeder, at a modest price so the hybridizers may own it. No. 139-50. **\$5.00**

LASSES TAFFY (Margaret Albright). E.-M. (Mexico x Moontide.) Lovely, flaring golden russet self. The tall, well branched stalks display the charming flowers to perfection. Wonderful pedigree for breeding purposes. H.C. '54. Net **\$25.00**

1955 INTRODUCTIONS—Continued

- MT. EMMONS** (Crosby). M. (Snow Carnival) x (Sister to Story Princess.) A giant among the whites. This is for those who want their flowers big. Blue-white when first opened. Falls down-hanging\$5.00
- NOMOHR*** (J. M. Gibson). E.-M. (Snow Flurry x Elmoher.) Warm-toned bamboo-cream. The large flowers are beautifully ruffled in both standards and falls, showing clearly the inheritance from its two superb parents. There are many buds and the flowers are heavily subtended and therefore long lasting. The falls have a light flush of Elmoher's red-violet coloring. The standards are nicely domed and retain their position even in heavy rain, wind and sun. The plants are vigorous and easy to grow. Sets seed readily. Net.....\$20.00
- OLYMPUS SKIES** (Mrs. Ralph Carlston). E.-M. (Snow Flurry x Aldura.) A very wide white plicata lightly marked with blue. The first direct seedling of Snow Flurry I have seen with a plicata pattern, and therefore feel it is destined to be a great breeder. Forty inches tall, it is a bit high branched, but the individual flowers are magnificent. Net.....\$15.00
- ORANGE APRICOT** (Muhlestein). E.-M. ((Sister to Gold Ruffles x Spindrift) x (D. Hall's 43-04)) x (D. Hall's 44-55, sister to Hit Parade x Pink Salmon.) Between apricot and cadmium yellow in color. A very wide flower that is smoothly finished. Height 36 in. No. 51-15. Net..\$15.00
- ORCHID QUEEN** (W. Schortman). E.-M. (Snow Flurry) x (Inspiration x Balmung.) Here is a novelty in orchid and cream. The ground color is cream and the falls are heavily patterned with lines of orchid like the wings of an exotic butterfly. The very large, wide, flowers are nicely spaced on 40-inch ramrod stalks. Mr. Schortman produced a good red seedling from this iris. Net.....\$20.00
- PATIENCE** (Schortman). E.-M. (Snow Flurry x Inspiration.) Large, wide, heavy-subtended flower of a very smooth magenta color (Maerz and Paul, Dictionary of Color, plate 53, J-11) sporting a pale lemon beard that sets the flower off to a marked degree. The tall, well branched stalks carry many buds insuring a long blooming season.....\$10.00
- PRAISEWORTHY** (Muhlestein). M.-L. (Sky Song x Blue Rhythm.) I have looked on this as a near powder-blue, however, other experts seem to think it has some violet in it. The flaring falls are the same identical color as the standards, the beard yellow. A remarkable flower of all-over quality and surely different to any other blue iris I have seen. H.C. '54 under No. 51-22A. Price will remain the same next year. However, a good stock permits a low introductory price. Net.....\$10.00
- QUEEN'S LACE** (Muhlestein). M.-L. (Clara B) x (Gold Ruffles x Chantilly.) Creamy-white done up with the heaviest laced-edge—so heavy in fact that it is often difficult for the standards and falls to let go of each other so the flower may open. The edges of the petals, the hafts, and the beard are light yellow, and the unopened buds are also creamy-yellow. A very novel personality. H.C. '54. No. 52-28. Net.\$25.00
- RAINIER VALLEY*** (Fred R. Crandall). E.-M. (I. hoogiana x Shining Waters.) Introduced primarily for breeding purposes, this I hoogiana seedling is, indeed, very blue among the medium blues. The flowers are large, nicely shaped—and the smoothly tailored flaring falls are set off by a rich orange beard—typical of this type of hybrid. Fertile both as pod and pollen parent it will be especially useful as a pollen parent, and has already produced some lovely blue seedlings. It cannot miss with such things as are now available for breeding. The 36-inch wiry stems are sturdy and the foliage is rather good for such a hybrid and does not disappear entirely as with so many regelia-hybrids. Very easy to grow\$5.00
- RIO ARRIBA*** (Stanley C. Clarke). M.-L. (Elsa Sass-type sdg. x Tobacco Road) x (Gold Smoke.) Slightly darker in color than Char-Maize, the falls do not flare quite as much and they carry a striking olive-brown beard. The 36-inch stalks are fairly well branched. It should be a wonderful parent for many colors and to use with somewhat related yellows, blends, tans and browns. Net.....\$15.00
- SKY DYE** (Mrs. Ralph S. Nelson). M. (Helen McGregor x Blue Valley.) This is the beautiful large near-sky-blue which the few discriminating judges saw and admired so much as seedling No. 52-4. The standards are domed and the falls are flaring and very wide with just enough wave and lilt to give the heavily subtended flower great charm. Not just another blue, but one of distinction. The 36-inch stalks are nicely branched. With such a pedigree can anyone doubt its quality and potentialities as a parent? Net.....\$15.00
- SMOKED SALMON** (Muhlestein). E.-M. (Sister to Orange Creamo.) A novelty by-product from pink breeding. Smooth apricot with a smoky-orchid infusion throughout. The large, semi-flaring blooms have good substance and are nicely spaced on the 36-in. stalks. No. 51-53A.\$10.00

1955 INTRODUCTIONS—Continued

SNOW GODDESS (Joseph Becherer). E.-M. (Snow Flurry x White Goddess.) This gorgeous, big, ruffled, wide-petaled warm white (due perhaps to the yellow beard) stole my heart last spring and appears to be the very best of the many fine white Snow Flurry seedlings I have seen thus far, and this is saying much for we all know the quality this wonderful breeder has given its children. A credit to this great hybridizer of long experience. Heavy, well branched, 38-inch stalks. Net. \$20.00

SWAN BALLET (Muhlestein). M.-L. (Spanish Peaks x Faught 19H, or an Azure Skies x Stella Polaris x Easter Morn.) Its parentage is marked in my records as the Faught white Great Lakes sdlg. 19H, however, a stray grain of pollen of the other listed may have been on the tweezers since the flower is very like this Azure Skies sldg. In any event, this is a beautiful, somewhat ruffled, white with a white beard. The falls are very round and flare horizontally, have a little ruffling and a great amount of substance. Fertile both ways. H.C. '54. Limited stock. No. 51-50A. Net \$25.00

UTAH SKY (Muhlestein). E.-M. (Sky Song x Gracious Lady.) Cornflower blue that is one of the bluest blues I have seen. The very wide falls have a bit of ruffling at the hafts that give it distinction. Won the Blue class at the Utah Iris Society 1953 show. H.C. '54. No. 51-96. Net \$15.00

VIOLET GRACE (E. B. Wadland). E.-M. (Violet Symphony x Glorioso.) According to the Wilson color chart this is aster violet, plate 38. Actually the flowers are similar in coloring to Pinafore Lass since both have the white area in the falls, but Violet Grace is a perfect flower, very wide, ruffled and heavily subtanced. Fertile both ways, its pollen is the first ever to give me takes on Pinafore Lass. Having been produced in Canada it is vigorous and winter-hardy. The 7-inch blooms stand up to all weather and are nicely spaced on 36- to 40-inch stalks. Net. \$20.00

WHITE FLAMINGO (Muhlestein). M.-L. (Hall's 44-55, sister to Hit Parade, x Pink Salmon.) As the name implies this is a white with a flamingo-tangerine beard. The flower is large, the falls wide and full and somewhat down-hanging. Height 36 inches. No. 48-25H \$5.00

WINKEN AND BLINKEN (Mrs. John Haggengos). E.-M. (Unknown.) A novel TABLE IRIS. Probably should be classed as a variegata. The standards are yellow—the falls the same, with purple thumb-prints each side of the hafts, leaving the yellow on falls to form an inverted V. A strikingly different kind of table iris and one that should prove useful and interesting for garden as well as for flower arrangements. Height 30 inches. Net. \$10.00

And Featuring 5 New Iris

We are pleased to be able to introduce to the American public the first of Mr. Brummitt's releases.

ARCTIC SNOW (White City x Great Lakes). E.-M. 40 in. Large, tailored white with yellow beard. Excellent form and substance. Should make a great parent. \$10.00

GOLDEN ALPS (Admiration x ?). M.-L. 36 in. Done in the manner of Fair Elaine and Mystic Melody, but in a richer, wider flower. A very fine iris. Selected for trial at Wisley. Net. \$15.00

HEADLINES (Extravaganza x Louise Blake). L.-M.-VL. Called the "Black and White" amoena in England and the recipient of high praise from every quarter. The standards have blue in them when first opened but soon fade to white. A superb addition to this color class. Selected for Trial at Wisley. Net. \$20.00

SEA LAVENDER (Sister to Arctic Snow). M. 40 in. Flaring sea-lavender self. \$5.00

VIOLET FLIGHT (Sister to Arctic Snow). M. 40 in. Violet self with good form and substance. \$5.00

SPURIAS

Spurias belong to the beardless species. Their hard, strong, rhizomes are ideal for holding banks. They bloom after the tall bearded season has closed. Their orchid-like flowers are splendid for corsages or for bouquet work and arrangements. Here is an open field for hybridizers

who desire to work with this species. Their disease resistance make them the easiest iris to cultivate.

(Spurias will be shipped after Sept. 1st—Order these on a separate sheet.)

TERMS OF SALE

CASH WITH ORDER, PLEASE, unless you have an account with us. Postage Paid on orders over \$5.00. Orders for less add 50c to help defray packing and postage.

SHIPPING DATES. We will start shipping the last week in June and will continue shipments up to October 1st. Please do not ask for earlier or later shipments. We have a certain amount of work to do for ourselves, too, and it is difficult to accomplish this if orders continue to come late in the season. We will try to ship at any specified date (within the shipping season) for your convenience, but since the bulk of our customers request July 15th to 30th shipping, please allow us some leeway, if possible. We try to be prompt, courteous and generous. Orders will be acknowledged with approximate shipping date given.

We are rather rushed at shipping time. If you should write a note please do so on separate sheets from your order blank. List all varieties wanted, and those you would like to have as extras on the order sheet, for if scattered through a letter one may easily be omitted.

DISCOUNTS — EXTRAS. ON ORDERS FOR \$25.00, or more, a discount of 25% is offered, except on items marked "Net." Give us a list of Wants and Alternates so we may be generous, and with varieties we are assured you would like. Do not hesitate to list some of the newer introductions, and the larger the order the more "extras" you should list and may expect.

HEMEROCALLIS (Daylilies)

This popular perennial is gaining friends by leaps and bounds. It blooms from late spring through the heat of summer and many kinds re-bloom until frost. "Hems," as they are called, give bloom when there is little else in flower during the heat of summer. They grow into compact clumps and are very disease resistant, and once established withstand lack of moisture quite as well as the bearded iris.

We will ship these, at the same time as the Spurias, during September. They may be ordered with Spurias, but on a separate sheet from Tall Bearded or Dwarf Bearded iris.
