IRIS BUYER'S GUIDE and WISH BOOK FOR 1962

How You Gain by Ordering REAL EARLY

1. By ordering in the spring or early summer you are practically certain of getting all of those choice varieties you particularly want, and that may be sold out if you wait. I have large stocks now, but by midsummer I am likely to be out of several dozen varieties.
2. By ordering within 15 days you get free an EXTRA \$5.00 Premium, on any order of \$10.00 or more. Choose from the 4 wondrous \$5.00 Iris listed on page 18, under color plate of one of them, Giant Mohr. No Iris lover can afford to pass up an offer like this!
3. By ordering and making payment before July 1 you may take part in my great 1962 IRIS LOVERS' SWEEPSTAKES, in which you may win Iris worth 3 times as much as the sum of all your 1962 orders. (See bottom of page 18 and bottom of order blanks.)
4. By getting your order in real early, you get delivery at beginning of our 3-month shipping season. This insures well-established plants in your garden for finest spring bloom. Early summer planting of Iris is very desirable everywhere, and is quite necessary for the best results in the colder parts of the country.
5. And lastly, by ordering early, before stocks become exhausted, you can take full advantage of my many 1962 MONEY SAVING Offers, as enumerated in the CHECKLIST at the bottom of the right column. Truly, more for your money, this year than ever before!

SO DON'T DELAY — IT WILL REALLY PAY YOU WELL TO MAIL THAT ORDER TODAY

YOU MAY ORDER IRIS ON CREDIT

If you do not have sufficient ready cash available during the spring months to enable you to order as much as you really want & to enjoy all the very substantial benefits of early ordering listed above, send in your full order right away, anyway. This substantial credit is real WEALTH for you, but only when you use it to bring to you the additional Iris you so badly want to order NOW, without waiting to save up & take a chance on the varieties you want being gone. No down payment is required, but I will personally deem it a real favor if you find it possible to send, with your order, a payment equal to 10% to 50% of the total, to help me a little in meeting current expenses, such as publishing this catalog. Thank you. Note that I do not make the usual carrying charge of 1½% per month. Send payments as your funds become available, any time before shipping, which usually starts around July 1.

CUSTOMER APPROVAL: "The nice thing and convenient part of ordering from you is the time payments. I have never seen that before." Mrs. W. P. Ruysan, Seattle, Washington.

MUCH LOWER PRICES FOR '62

Wherever my stocks have increased enough to keep ahead of the demand, I have dropped my Regular 1962 prices way below what they were last year. Then, for all who order \$10.00 worth or more, I am listing Catalog Sale Prices for almost all varieties. These represent substantial CASH discounts from the new low Regular prices. Be sure to see page 18. And note that this year's greatest price reductions, and hence the greatest bargains, will be found in my thrilling SPACE-AGE Iris (pages 10 to 12 & 40), and in the exotic C. White fertile Oncobreds, page 36. Still further, these 2 groups of Iris simply abound in the 2 types of Super Buys (page 18), and the 2 types of Secret Varieties (page 22).

Don't Overlook These 11 Offers!

MY FAVORITES — Each year hundreds of letters ask my assistance in selecting the most outstanding varieties and best buys for the year. So, in an effort to be helpful, I have made up standard assortments of my personal favorites in the 11 different races of Iris where you find the "MY FAVORITE" offer. As these groups are standardized for rapid handling, so I can give you the MOST for the money, they are not subject to modification. I take fully into account that most people want to get just as much as they possibly can for their money. So I will not include any scarce kinds, but those very choice ones (all labeled) where my stocks permit filling your order with a generosity that will amaze you. In fact, I'll GUARANTEE you'll get greater value this way than by selecting varieties yourself under any of my wonderful discount offers. I'm making these collections available in units of \$5.00, \$10.00, \$25.00, \$50.00 and \$100.00 to fit all pocketbooks. The \$10.00 and \$25.00 groups are my main features as these are where the really choice ones begin to appear. Orders containing My Favorites are shipped mostly in late July & early August; later if desired.

IRIS LOVER PLEASED WITH MY FAVORITES COLLECTION — "I want another 'My Favorites Collection.' A year ago I ordered a My Favorites—\$25.00, and I would like to commend you on the outstanding selection both in color and blooming time. I am extremely happy with the Rainbow Iris you sent. Without exception they have all bloomed the first year and are growing beautifully. Thank you." Charles Wilson, San Diego, California.

2 You take no chances! I GUARANTEE that my stock will reach you in good condition and that you will be pleased with what I send you.

6 Delightful NEW AUTUMN Re-Bloomers

FLYING REPEATER (Austin '62) +- L-30" World's first Re-Bloomer to flaunt spoons & flounces of newly released SPACE-AGE Iris. Appropriately named, flowers look as if winged, ready to fly off into space. The 3 ascending spoons may enlarge to full-fledged folded flounces 1¾" wide, 2" long. Called a "repeater" because it not only blooms in spring, like other spooned Iris, but is the only spooned one to repeat in the fall. In mild climates fall bloom continues on into winter. A delectable soft pink with deep orange beard. Pollen plentiful; entirely unsurpassed by any other Iris as a breeder for the ambitious hybridizer who sets his goals HIGH, aiming at what will soon be greatest sensation of all—world's first fully flounced Iris that reblooms heavily in summer & fall. [Happy Birthday X Unicorn].....Regularly \$25.00; on \$35 order \$16.95

FIRST SNOWFALL (Austin '62) +-+ 36" When you have this new Iris in your garden, your First Snowfall will come well before winter—probably in Oct. May give up to 100% rebloom in mid fall, perhaps even in Sept. A leathery pure white that easily surpasses our best reblooming whites, such as Autumn Snowdrift and Lady Moon in size, form and especially in the pristine purity of its whiteness. Like a reblooming Snow Flurry. Sometimes reaches colossal proportions, with a flower spread up to 8". [Lady Moon X Canadaway].....Regularly \$20.00; on \$30 order \$12.95

AUTUMN VELVET (Austin '62) +-+ EM-33" I present this large intense carmine red, almost a self, as the nearest to true red of any Re-Bloomer, and at the same time its falls are more velvety than those of any other Re-Bloomer. Falls strongly flaring, with heavy substance and a large gold bronze beard. A flower of richness and elegance, to delight the most discriminating. Very well branched, with branches starting almost at the ground. A very heavy bloomer, making a bright mass of red in the garden, both spring and fall. Pollen abundant. [Savage X Tabasco].....Regularly \$15.00; on \$25 order \$9.95

DARK MYSTERY (Austin '62) +- 30" Outstanding for the size of its flowers & its most distinctive deep mysterious coloring. A huge flower with a spread of 6 inches. Standards reddish amethyst; falls large, very rounded, velvety blackish crimson, with striking, very contrasty creamy-white beards. Very novel, completely unlike any other Re-Bloomer. Reblooms in Oct. & Nov. & on into winter when climate permits. Pollen plentiful. [Russian Bronze X April Showers].....Regularly \$15.00; on \$25 order \$9.95

AUTUMN CAVALIER (Austin '62) +-+ 40" A very bright variegata, large & tall—as bold & dashing as a cavalier. Standards golden yellow, flushed red. Falls brilliant scarlet-red. Yellow beard & striking, decorative red haft veining on yellow ground. Has given up to 100% rebloom in Oct. & Nov. Stalks up to 40", even in the fall; 4 branches, longest up to 16" [Nappanee X Tabasco].....Regularly \$10.00; on \$15 order \$6.65

FALL FIRE (Austin '62) +- E-29" Bright as a bonfire, almost a carmine self. A nicely formed & precisely styled Iris with velvety plush-like flaring falls. Interesting bronze beard. Starts reblooming in Oct.; continues on to heavy frosts; or for much of the winter in mild climates. Most nearly evergreen of our Re-Bloomers, even in fairly cold climates. Stunning. [Savage X Huntsman].....Regularly \$10.00; on \$15 order \$6.65

SUMMER RE-BLOOMERS (pages 3-5), AUTUMN RE-BLOOMERS (pages 6-8) and WINTER RE-BLOOMERS (page 9)

SYMBOLS SIGNALIZING OUTSTANDING PERFORMANCE

I have been besieged with inquiries asking me to make specific recommendations of those Tall, Median & Dwarf Re-Bloomers that have given the most dependable performance as repeat bloomers. I have evolved the following symbols, to dramatically & visually call to your attention those varieties that are the surest Re-Bloomers, based on both my extensive data & that sent in from all over the world. These, then, have a good chance of re-blooming in any state or any Temperature Zone climate.

SYMBOLS USED AFTER NAMES In Summer, Early & Mid Fall Groups. (Pp. 3 to 7 incl.) Varieties most likely to re-bloom	Tall (29" or more)	Medians & Dwarfs 28" and less	Symbol used
EARLY (June, July, Aug. or Sept.) re-bloom, usually (not always), to extent indicated at right.	Light to moderate +	+	Greek
	Heavy to very heavy ++	++	Cross
OCTOBER re-bloom likely wherever, & whenever killing frosts do not occur until late Oct. or Nov.	Light to moderate +	+	Maltese
	Heavy to very heavy ++	++	Cross

You will soon find that some very fine varieties in the Summer, Early or Mid Fall groups are not signaled with any form of plus sign. Some of these are just too new to have been adequately tested for their re-blooming abilities. In others that have no plus signs, the re-blooming has so far been somewhat irregular during the particular periods referred to, & not certain enough to justify this symbol of good performance, tho some of these have re-bloomed very heavily a little later, in Nov. The Nov. bloom is not signaled, but all varieties that generally start in Nov. are listed in the group of "Late Fall Re-Bloomers." Quite obviously, re-blooming cannot be guaranteed. The symbols refer to expected behavior when you supply conditions of temperature, moisture & soil nutrients that are reasonably favorable for the expression of re-blooming traits inherent in these varieties. See "Re-Bloomers" on Cultural Sheet sent with all orders.

For the skeptics & those "from Missouri," who have to be shown that Iris will re-bloom, no matter where you live, within the North or South Temperate Zones, let me make this suggestion. Select for your first trial of Rainbow Garden Re-Bloomers mainly those tried & proved sorts that I have carefully designated with the symbols ++ or ++, either with or without other symbols. Then follow my simple instructions for caring for Re-Bloomers & I think you'll soon be "pointing with pride" to what you have accomplished. If you have fairly mild falls, you can safely include a number of those marked ++ or ++, which include some superb varieties. I go out of my way to make it easy for YOU to succeed. But I cannot grow them for you!

Here's What You've Been Waiting For

Twice-Blooming - SUMMER RE-BLOOMERS - Pages 3, 4 and 5

World's Only Separate Listing of This Very New and Much Needed Race

These start their SECOND bloom in June, July or August, then continue blooming to varying degrees on thru the fall. They are, then, classed as "Summer Bloomers" based on the time when, with recommended care, they are likely to start re-blooming, as explained in the descriptions for individual varieties. In many cases the bloom increases on into the fall. However, in most varieties the tendency for repeat blooming is not yet as strong as that for normal spring bloom, but I am now concentrating my breeding efforts on producing better & even more reliable summer & early fall Re-Bloomers. Watch for new introductions in my later catalogs.

- **AAHME** (Craig '53) ++ EM-36" Somewhat of an everbloomer, occasionally blooming in summer & fall, & then quite heavily in winter, temperatures permitting. One of the very best available. - **AUGUST WAVES** (Brown '41) ++ E-22" A pretty neglecta. Re-blooms August to frost in cold climates or warm ones. Standards pale blue. Falls flaring, rich violet. Regularly 65c; on \$10 order 50c; 3 for \$1.75; 10 for \$3.25
- **AUTUMN AFTERNOON** (Brown '55) ++ E-24" A new color combination with closed standards in clear apricot yellow, flaring falls in pinkish lavender. Very strong tendency for re-blooming, usually early. Percy reports this began blooming 1st of Aug., stalks were still coming on in early Oct. Every sizable rhizome re-bloomed. Sets seed, but no pollen. [Sally Ann X Autumn Twilight]... Regularly \$2.00; on \$10 order \$1.35; 3 for \$3.85
- **BLUE VALLEY** M to L-38" A regular Summer Bloomer to the extent that we have had a dozen

BLUE VALLEY—\$1.25

A single rhizome has been known to produce 7 flower stalks. Very fragrant.

AUTUMN PRINCESS—Note startling tangerine beards.

- **AUTUMN DELIGHT** (Austin '52) ++ E-30" Most continuous, heaviest bloomer of our 175 varieties of re-bloomers. Standards light amethyst pink with silvery tone, arched, gently waved. Falls deep rosy mulberry. Blooms in spring, starts again in mid or late Aug., blooms for 7 to 10 weeks. Up to 16 buds per stalk, heights up to 44" in fall. Delightfully fragrant, pollen abundant. Regularly \$2.25; on \$10 order \$2.00
- **AUTUMN PRINCESS** (Austin '59) ++ E-32" Noteworthy for gorgeous, very prominent red-tangerine beards, in life-like reality in color plate. Is like a Summer & Fall Blooming Pagan Princess, its seed parent. One of largest of Summer Re-Bloomers, often having a spread of 7" to 8". Starts re-blooming in Aug., blooms quite heavily all thru fall, often up to Dec. [Pagan Princess X Clasmont]... Regularly \$5.00; on \$10 order \$3.95
- **AUTUMN SNOWDRIFT** (Brown '55) ++ E-28" Persistent re-blooming, even in cold northern climates. Mrs. Herrick, in Wayne, Maine, got first stalk in Oct. Percy had many in bloom in Mass. in early Oct. We had bloom in Aug., Sept. & Oct. So should re-bloom in fall thruout nearly all of northern & eastern U.S. Beautifully ruffled crystalline white, arched standards, semi-flaring falls, lilac at hafts. Low branching, 16 flowers per stalk. Pollen good; sets seed freely. Marked sweet fragrance. [Tinted Porcelain x Autumn Twilight X (Autumn Twilight x Glowport)]... Regularly \$3.50; on \$10 order \$2.35

RE-BLOOMERS LENGTHEN YOUR ENJOYMENT OF IRIS BLOOM

The spring bloom of the ordinary once-blooming Iris varieties covers only a few WEEKS, but the Summer & Autumn bloom of the heaviest Re-Bloomers often extends more or less continuously for 4 to 6 MONTHS. And on top of that, most Re-Bloomers start their spring bloom 1 to 5 weeks before the Tall Bearded. Thus they lengthen your Iris season at BOTH ends. So you see how much longer you can enjoy your Iris when you spend your hard-earned cash for re-blooming varieties.

Please keep in mind, however, that re-blooming in your garden depends only in part on the inherent re-blooming qualities of the rhizomes I send to you. Equally important is the care that you give them & your local climate, soil & growing conditions. I send with all orders for Re-Bloomers complete and easy-to-follow directions for their culture, so that you can easily achieve the maximum amount of re-blooming that is possible in your region with the particular varieties that you have ordered. And whatever EXTRA bloom you are able to get in Summer, Fall or Winter, much or little, adds that much extra enjoyment as compared with the ordinary once-bloomers. Oftentimes this "blooming bonus" will amaze you & all of your friends.

In the past Iris have traditionally been strictly spring-only bloomers. It is, therefore, a most exciting & challenging gardening adventure to get a colorful assortment of my newly evolving twice-bloomers & experiment to see how much re-bloom you can get under your conditions. You'll find that most of your neighbors have never heard of re-blooming Iris & will be over often to see what you are able to accomplish. Order early, so your plants will be well established in your garden before winter. Also see MORE ON RE-BLOOMERS, page 33, and further helpful material on Re-Bloomers on page 17.

HELP FOR BREEDERS OF RE-BLOOMERS: To aid you in locating re-blooming genes wherever they may appear in any of the 20 races of Bearded Iris, I am printing in bold type all of the varieties in the parentages that are actual Re-Bloomers, or that seem to be carriers of re-blooming traits.

"I am happy to tell you that your iris July Beauty has given me more pleasure than any other I have ever grown over a very long period of gardening. From the rhizome purchased from you 2 years back, I now have several divisions. The divisions bloom while still quite young, and this year I have had bloom on the plants in April, June, July, September & October. More buds are coming now that will carry them into November. I have them blooming with yellow marguerites at present (Oct. 20) and their lovely blue color would be equally good with yellow or bronze chrysanthemums." Mrs. Chas. J. Oram, Menlo Park, California.

◊ LIMELIGHT (Hall '52) + ML-35" Not a very regular Summer Re-Bloomer, but quite often 50% of rhizomes will shoot up re-blooming stalks & burst into bloom about 2 weeks after the last Tall Bearded have passed—a sight that always amazes, as so few other fine Iris are in bloom at that time. 2-SEASON AUTUMN RE-BLOOMERS PAGES 6-8

THREE GROUPS OF AUTUMNS: Based on customers' reports & on response here in winter snow belt of Northern California mountains, at elevation of 3,000 feet, I have grouped varieties into Early, Mid & Late fall groups based mainly on when they start their main re-blooming. This does not signify, by any means, that each Iris re-blooms only in period where it is grouped. For example, Early Fall Iris may continue to bloom all thru the fall; those listed as Late Fall Re-Bloomers may actually start blooming to some extent in early or mid fall, depending on fertilizing, culture, climate, soil, etc. Enough is not known at this early stage in evolution of Re-Bloomers to be very arbitrary in statements as to just when these Iris will re-bloom. Even the division cannot possibly be hard & fast, I feel groupings will still be very helpful to people everywhere as an approximate guide as to what to expect. For help in choosing for your conditions, & in achieving continuity of bloom, see text above picture on page 9. Also see pages 33 and 17.

*****Autumn Blooming STAR PERFORMER*****

BLUE SURPRISE (Austin '57 ✚✚ EM-ML-36) **BLUE SURPRISE** surprises everyone. First for its heavy tendency to re-bloom in mid & late fall, & to send forth at that time, as well as in spring, a generous supply of the largest, finest flowers of any of our blue re-bloomers. Frequently a 3-season Iris; often blooms in March or early April as well as usual time in May; starts its wondrous 2nd or 3d bloom in early Oct. or early Nov., depending on climate & care, frequently continuing right on into Dec. Every visitor marveled at abundance of bloom, size & beauty of flowers, bright light blue color, extraordinary substance, & most of all, at its ever-evident enticing fragrance. Most fragrant variety in our entire garden! A bouquet of BLUE SURPRISE will quickly perfume an entire room. Then, too, this takes the weather, & whatever the weather man has to offer. Demonstrated weather-resisting qualities when it came thru a severe hail storm with flying colors; nearly every other variety was riddled to shreds. In adverse weather one realizes quickly, one good Iris is worth a dozen poor ones. Beautifully ruffled, as in my color photograph. Sets seed when crossed with Autumns & newer fertile Oncobreds. Breeders everywhere want this, some for certain of its good qualities, some for others. Blue Surprise is the one Iris I would recommend most highly to plant beside your garden seat, or at whatever point you can best enjoy & rejoice in its enticing fragrance. As rhizomes increase, surround your garden seat with Blue Surprise; then see how frequently you come to this most delightful & most fragrant spot in your entire garden. [Berkeley Blue X Chivalry]..... Regularly \$7.00; on \$10 order **\$5.60**

CUSTOMER APPROVAL: "By the way, anything you could ask of an iris, you can find it in Blue Surprise. It is terrific." Ica Pierson, Lawton, Oklahoma.

The WINTER RE-BLOOMERS

Bearded Iris for Winter & Spring Bloom in Mild Climates
World's Only Extensive Listing

USES, BLOOMING SEASONS: Most useful for "Surprise Plantings" in mild climates; they burst into bloom most unexpectedly in winter. Foliage is practically evergreen. In cold climates likely to bloom in very early spring, with intermediates, materially lengthening your Tall Bearded blooming season. Try a few and see what you've been missing. In cold areas grow under glass for winter bloom. As these Iris do not seem to need winter cold to bloom properly, as do most Iris, they may prove to be the best of Bearded Iris for Florida and similar climates close to the Gulf of Mexico.

HARDINESS: Cold hardy except December Royalty needs mulching in cold regions.

EARLY WINTER RE-BLOOMERS (Bloom in Spring; start again in Nov.)

I am grouping here those Winters which our records indicate will often start shooting up stalks or re-blooming in early or late Nov., and hence are likely to give a second bloom in many semi-mild or border-line localities too cold in most years to expect bloom from Dec. thru Feb. During mild winters most of these Early Winter Bloomers will also be blooming in late Feb. & early March.

ALTA ROSA EE-48" Under favorable conditions will bloom for 4 months, Nov. to Feb. Rich rosy-lavender blended bronze, large. Regularly \$1.25; on \$10 order 85c

DECEMBER ROYALTY (Austin '51) E-34" See in color. Starts its second bloom in early or late Nov. & often keeps blooming till Christmas, so you can have a huge Iris bouquet beside Christmas tree. Large bold flower in brilliant royal purple, darkening to intense wine-black. Noteworthy for poise, substance, finish & for smooth satiny hafts unmarred by veinings. Sometimes 15 to 20 flowers; hence, ideal to cut in bud stage before frosts get too severe, for unbelievable winter bouquets. Unexcelled as a parent, transmitting its admirable traits to offspring. In cold regions needs protection, such as cold frame, to secure Dec. blooms. Regularly \$2.00; on \$10 order \$1.35; 3 for \$3.85

HAPPY VALLEY (Miess '50) EM-40" One of finest & largest of winter & spring bloomers. A beautiful amethyst-blue, intense orange beard tipped lemon. Falls broad at haft, rounded, flaring & ruffled. PAGAN PRINCESS M-38" Standards lovely Persian pink, falls deep Persian rose. Large well formed. Known to yield startling offspring. In great demand. Often re-blooms in winter in mild climates after starting in Nov. Fertile both ways. Seed parent of my Autumn Princess. HM'48. Regularly 85c; on \$10 order 60c; 3 for \$1.70; 10 for \$4.25

***** Winter Blooming STAR PERFORMER *****

ROYAL RUBY (Goodman '58) M-36" A superb new addition to the Winter Re-Bloomers—in fact, this may well be the best red in commerce, and as such will be sought even in cold climates, where its spring bloom may surpass all competing Tall Bearded reds. A strong contender for the truest red of all—a very brilliant Oxblood red that has neither the copper influence of some, nor the purplish tint of many others. Flowers very large, falls flaring, with clean 3" hafts. Perfectly branched. A dandy. [Red Hussar X Savage]. Regularly \$20.00; on \$30 order \$15.95 *****

Achieving CONTINUITY OF BLOOM Under Your Conditions

To insure practically continuous bloom in your garden you should have several varieties in each of my 6 re-blooming categories (pages 3-9), in so far as your climate will permit. The sequence of these is: Summer, Early Fall, Mid Fall, Late Fall, Early Winter and Mid & Late Winter. I suggest trying several varieties in each category since different varieties respond differently to varying soil & climatic conditions & no one can predict without trial just when each variety will re-bloom under your particular conditions. But by having several varieties for each portion of the season you greatly increase the chances of having some Iris in bloom practically every week. YOU can easily make your own tests & find out quickly which kinds re-bloom best for you & which flowers you prefer. In any climate re-blooming depends mostly on selection of the right varieties & proper care according to directions I supply. Get in on the fun & see how many varieties YOU can get to re-bloom.

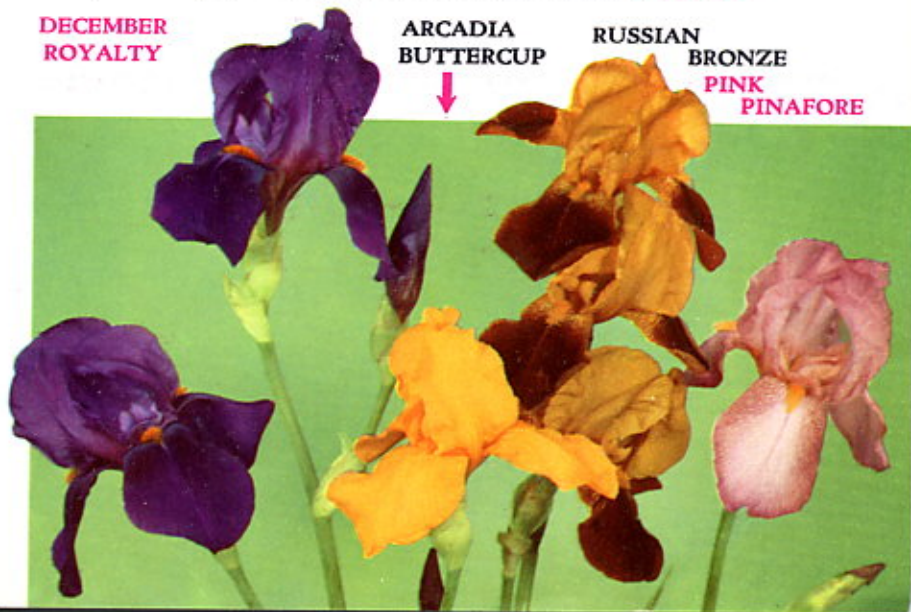

And remember, too, that ordinarily every rhizome does not re-bloom. So the more plants you have, the surer you are to have abundant re-blooming. With this in mind, I have provided for you reduced prices for 3 or 10 of a kind, wherever my stocks permit. Also see "MORE ON RE-BLOOMERS" on page 33.

3 NEW RACES THRU CONTROLLED EVOLUTION

Thru countless ages Iris form has remained unchanged.

But since '54 3 new races have emerged thru controlled evolution.

These marvelous **Floenced and Spooned** varieties represent the culmination of 18 years' work in this field. They are the Iris with developing wings for the **AGE OF SPACE**. I have been besieged with requests on how to best use these new arrivals in hybridization work to carry out further improvements. As this is much too lengthy a subject to cover in this catalog, I am fortunate in being able to offer a 12-page reprint of my article in the April 1961 Bulletin of American Iris Society entitled: "**CONTROLLED EVOLUTION OF THE HORNED, SPOONED AND FLOUNCED IRIS.**" This is available for 50c, or free on request, while they last, with any order for 2 or more **Horned, Spooned or Floenced Iris**—ordered separately or in a collection. The article traces breeding plans followed over past 17 years and shows how & thru what crosses new races & varieties have evolved. It also outlines a number of future breeding objectives in this fascinating new field. A complete table shows, for 38 varieties, **pollen & seed setting ratings, chromosome numbers & yield in Horned, Spooned & Floenced offspring.** Ask for your copy when you send in your order; be prepared to join in on the fun of producing more of the most startling new Iris the world has ever seen.

As these various manifestations of horns are in the very earliest stages of the evolution of these Space-Age characters you will find them not completely constant, but sometimes delightfully variable, with **unexpected surprises awaiting you** almost any time. Under conditions of poor establishment, or late in the season, when soil nutrients and moisture are depleted, the various elaborations of the horns are sometimes much reduced, or may even disappear. But under favorable growing conditions the **most unexpected things can happen**—a variety normally only horned may suddenly throw stunning big spoons; and some of the spooned varieties may occasionally astonish you with full-fledged, gorgeous floences! Truly, these are the adventurous Iris of today's **SPACE AGE.**

To make these **SPACE-AGE** pages really exciting for you I have scattered my **Secret Varieties** and **Super Secret Varieties** liberally thru pages 10 to 12 and 40.

Marvelous New **SPOONED** Iris

(Continued from back cover)

FABULOUS FRINGES (Austin '61) ML-35" Truly a decorator's delight, for here the artistic touch has been achieved by evolution of a form that, while pleasingly variable, frequently produces flowers with highly ornamental fringed spoons, as may be seen in color on front cover. Sometimes spoons become narrow & horn-like; on the other hand, this new variety that is so fascinating to watch thru its long blooming season, may occasionally splurge with production of full-grown floences, much like those in picture of Floenced Loveliness. You'll be out early each morning to see what it is up to now. An exceedingly fast increaser; rhizomes rather small. Fabulously fertile both ways, & very productive of wonderful floenced seedlings. 47 chromosomes. [Happy Birthday X Horned Papa] Regularly \$15.00; on \$25 order **\$9.95; 3 for \$28.35**

LEMON SPOON (Austin '61) M-40" An Iris of great & highly interesting diversity in the types of decorative embellishments with which it can surprise you. In its most elemental form, flowers have long, often flattened horns which may be forked at end, & as much as 1½" long. Much more commonly, however, you'll have flowers bedecked with gay yellow spoons varying from slender types to broad rounded ones an inch in diameter, sometimes folded or even fringed. When plant is pleased with growing conditions you supply, it goes all out in production of full-fledged floences. A creamy lemon yellow, deepening to bright yellow in heart of flower. Fertile both ways. Has already yielded 2 fine floenced seedlings & a dandy spooned one. 48 chromosomes. [Happy Birthday X Horned Papa] .. Regularly \$7.50; on \$15 order **2 for \$7.50; on \$25 order 3 for \$7.50**

SPOONED FANTOM (Austin '60) EML-36" A fascinating earlier stage than Spooned Premier in evolution of the **Spoon**ed Iris. As may be seen in my **color photograph** spoons at ends of long horns are considerably smaller, but usually stand erect in a very striking manner. Different flowers may vary from spooned to horned, but all are delightful. I set 14 pods on it in 1959. Pollen scarce, yet quite fertile. Sweetly fragrant. Excellent branching. Now it's your turn to try it. [JS-M-176B X 638] Regularly \$5.00; on \$10 order **\$3.95; 3 for \$11.25**

Six 1962 Introductions in **HORNED IRIS**

JACK HORNER (Austin '62) EM-M-40" The original Jack was a prankster & so is this Jack Horner, for while the flowers sometimes produce mostly stunning long needle-like violet horns, up to 1½" long, very frequently it is up to pranks & will send out horns ending in small frilled spoons or fairly large floences. Fascinates everyone who follows its interesting & unpredictable behavior from day to day thru the long blooming season. Children, particularly, are enthralled, & every youngster will want a Jack Horner for his very own. Hence I put the introductory price down lower than almost any other that will frequently produce some of the finest floences ever seen. Standards creamy white, glistening & ruffled; falls lilac-cream, edged light yellow, with bright yellow hafts. Profuse pollen & superb parentage indicate great hybridizing possibilities. [Unicorn X Palomino] Regularly \$10.00; on \$15 order **\$6.65**

GOLDEN UNICORN (Austin '62) ML-38" A topnotch deep golden yellow Horned Iris with long horns, up to 2". Very frequently the horns are tipped with small spoons, sometimes as wide as ¾". [Happy Birthday X Horned Papa] Regularly \$10.00; on \$15 order **\$6.65**

RED UNICORN (Austin '62) ML-38" Unquestionably the smoothest, deepest red & best formed among red Horned Iris. Horns commonly about 1" long, needle-sharp, deep red, extending down from the heavy bronze-gold beard, & gracefully arched upward. Very often a ¼" to ½" spoon replaced the spike-like ending of the horn. Color is deep crimson, very close to a true self. Plenty of pollen. [Placerita X Mulberry Snow] Regularly \$10.00; on \$15 order **\$6.65**

WHITE UNICORN (Austin '62) EM-ML-42" After growing many thousands of my hybrid Horned Iris seedlings, I finally found this white one, with white or blue-white standards & white falls flushed pale lilac. Probably the heaviest bloomer of horned Iris; stalks produced in profusion & each has about 5 flowers in bloom at once. Horns long, needle-like, frequently up to 2". Pollen abundant. [Horned Skylark X Seedling JS-84] Regularly \$7.50; on \$10 order **\$4.95**

HORNED COLOR GEM (Austin '62) EM-36" Perhaps most colorful of Horned Iris & certainly highly unique. Rich, golden bronze standards & mauve falls edged in buff, with violet horns at ends of bright yellow beards. Horns usually over 1" in length, prettily curved upward from falls in an arresting manner. [Plumed Delight X Horned Rosyred] Regularly \$5.00; on \$10 order **\$3.95**

HORNED TRACERY (Austin '62) EM-34" A delightful pink plicata with white petals edged in pink, pink stitching & slender pink horns, usually about 1" long. Very first pink plicata with horns & one you'll surely want at this low price. [Plumed Delight X Horned Rosyred] Regularly \$5.00; on \$10 order **\$3.35**

EARLIER INTRODUCTIONS IN **HORNED IRIS**

HORNED IRIS—(Concluded)

HORNED SKYLARK (Austin '57) ML-52" Towers above all ordinary Iris. Standards light yellow, beautifully waved. Falls nearly horizontal, cream with light yellow edge. Very prominent, fully bearded horn an inch long. Wonderful for breeding, an excellent seed-setter—gave several pods full of seed on each plant last year. Pods are HUGE, reminding one of small cucumbers. Seedparent of two of my introductions, **Horned Lace** and **Lacy Lantern**. Now you try it. Branching good. Very vigorous, foliage yard-high, nearly evergreen. [JS-M-176B x 638] X Twilight Sky]...Reg. \$4.00; on \$10 order **\$2.65; 3 for \$6.75**

HORNED TANGERINE (Austin '60) L-34" World's first tangerine-bearded horned Iris. Petals laced to boot. A very lovely combination—standards light pink; falls bright pinkish-lavender. Beard heavy, wide, bright tangerine, ending in slender upturned deep lavender horn. Pollen profuse. [Happy Birthday X Horned Papa]...Regularly \$5.00; on \$10 order **\$3.35; 3 for \$8.55**

MULBERRY SNOW (Austin '55) L-40" One of most novel color patterns ever seen. Actually a "snow-capped" appearance due to large prominent white blaze at top of fall, around beard. Standards dark reddish wine. Falls below white blaze intense mulberry, lined in white in a fancy pattern. At end of beard is a prominent mulberry horn. A fine breeder, both as seed parent and pollen parent. Its pollen gave me **Flounced Marvel** & **Horned Mystery**. [JS-M-176B X 638]... Regularly \$3.00; on \$10 order **\$1.95; 3 for \$5.55**

PLUMED DELIGHT (Austin '55) M-32" See in color. A bewitching yellow cream, washed and veined in grayish lilac, bordered in pale yellow. Falls beautifully rippled, stiffly horizontal. Beards are yellow & white, extend out along deep violet horns. A heavy bloomer, frequently producing 2 or 3 stalks from a single rhizome. No pollen, but a very heavy seed-setter. Often spooned. Seedparent of **Flounced Premiere** & **Spooned Delight**. [JS-M-176B X 638]. One of my sensational EXTRA Premiums, available free this year only, on all orders of \$10.00 or more mailed within 15 days. See page 18. Regularly \$5.00; on \$10 order **\$4.00**

FORMER A.I.S. PRESIDENT KNOWLTON FINDS THE HORNS & SPOONS: "Plumed Delight, a white ground plicata with dark markings, had the longest 'horn' I have ever seen. At the base of the beard a long tongue stood out with a spoon at the tip. Most remarkable." Bul. 142, page 6.

UNICORN (Austin '54) M-L-42" This is the original, the world's first horned Iris. Depicted in life-like true color. Represents greatest break in development of an entirely new, highly decorative Iris form that has occurred in last half century of intensive Iris breeding. Customary beards, instead of reposing quietly on falls in normal position, are raised, separated from falls, projecting as striking plumed horns. Coloring is bold, contrasting—brilliant mulberry standards, snow white falls, prominently edged to match standards. Beard is orange-yellow, changing to white and mulberry. Sets seed readily, has abundant fertile pollen. Seedparent of **Fringed Spoon**; pollen parent of **Flounced Loveliness!** [JS-M-176B X 638]...Regularly \$3.00; on \$15 order **2 for \$3.00**

THRILLING: "The real thrill came when Unicorn opened its first blossom yesterday. Those horns are positively fascinating and I shall be trying to put horns on everything on the place." Mrs. Edith Berg, Portland, Oregon.

STOCK WITHSTOOD 17° BELOW ZERO: "Happy to say the Iris rhizomes I received from you in 1960 withstood 17° below zero; 5 continuous weeks of below 32°." Mrs. Lamar Mumbauer, Pennsbuherg, Pennsylvania.

FROM COLDEST STATE IN THE UNION: "All of my Iris I got from you to see whether they were hardy in this cold northern climate are up and doing finely. Was below zero for several days this past winter." Dr. Fred L. Metcalf, D.V.M., Drummond, Montana.

LIKE BIG RHIZOMES?: "We just could not let the days go by without letting you know about our Iris ordered from you last year. Truly, they are 'Car Stoppers.' Not a day passes without at least 2 cars stopping to get a closer look. And your plants were a pleasure because of the size of the rhizomes. All that we bought around here were such small rhizomes that it was 2 or 3 years before they bloomed. We lost interest in them, but your catalog brought our interest back to Iris, and the large rhizomes increased it." Margaret J. Laughinghouse, Columbia, South Carolina.

FLAT-BEARDED Iris

Attention-Compelling, Like Japanese Iris, but easy to grow

Gardeners have had difficulties for years in supplying the flooded bog conditions & the extremely rich organic soil required for best development of Japanese Iris. So now they are turning to newly developed Bearded Iris varieties that give the same magnificent displays of immense flat flowers, with just ordinary care. Below I present the only comprehensive assemblage of these much-sought Iris to be found anywhere. I know that these completely out-of-the-ordinary Iris will bring a new sense of interest & eager curiosity to YOUR garden.

BELLA MOHR (Ohl '55) M-36" Imagine an "Elmohr" with "Sable" coloring, and a form that sometimes partially or fully flattens out. Quite something! Huge, wide full flowers in glowing blackish purple. Wonderful substance. An Oncobred that is a knockout! HM'56. [William Mohr X Sable]... Regularly \$1.50; on \$10 order **\$1.10; 3 for \$3.15; 10 for \$7.50**

FEATURE OFFERING in FLAT Bearded Iris

CLEMENTINA (Austin '55) EM-34" Huge, heavily-marbled Oncobred. As flower opens it is often nearly normal, but within a day or two many flowers flatten out so both standards and falls are nearly horizontal. These immense flowers sometimes have a spread up to 9 inches. Unique flat Iris blooms ideal for shallow container on dining table. Either flat or in normal form the marbled coloring is so exquisite I had more requests for this before introduction than any other seedling. A heavy bloomer, producing a mass of flowers. All six petals have beards. In great demand for corsages, for which it is simply superb. A splendid seed setter. [Snow Flurry X Capitola]... Regularly \$2.50; on \$10 order **\$1.95**

CLEMENTINA

This marbled giant's flat Just made to marvel at!
—George Nicholas Rees*

FLURRY MOHR E-42" A huge rich violet. Standards tend to flatten so makes a wonderful single-flower arrangement, or flat-dish display....Reg. \$1.00; on \$10 order **70c**

******* FLAT Oncobred STAR PERFORMER *******

GIANT CLEMATIS (Austin '58) M-32" As my Ektachrome shows, resembles a giant Clematis flower much more than an Iris. Immense in size, commonly 9" across. Occasionally some open up nearly normal, but usually after a day or two most flatten out as illustrated, displaying 6 beards instead of 3. Many who see this giant for first time think it is a Japanese Iris, but actually it is an Oncobred. Somewhat similar to my Clementina, but petals much wider, resulting in a flat flower that is almost a perfect circle.

***** Regularly \$10.00; on \$15 order **\$6.65 *******

NO-TOP (Lawson '58) M-36" Caused much favorable comment at Memphis Convention. Was a guest in Mrs. Elby Martin's garden. She wrote it caused more comment than any other Iris. Mrs. J. W. Hinkle commented: "Japanese form; five styles; greenest Iris seen." Mrs. Harry Frey says: "A green-white, with 6 bearded falls and no standards, but possessing 6-8 style arms. Buds are decidedly green. Very attractive." A large flower, 6-7 inches across, no stems or pollen but will set seed. Flower sometimes seems pure white. [Purissima X Spindrift]... Regularly \$4.00; on \$10 order **\$3.60; 3 for \$9.20**

PINAFLORE LASS (F. Cook '51) EM-38" See in color. Falls heavily gathered, pleated so form of flower is like nothing you've seen before—but in a way it has the flatness and appeal of a Japanese Iris. Coloring carries out similarity, for white center suggests a blaze. From this glowing whiteness there are ever-deepening tints of lilac & violet out to deeper colored scalloped margins. Really novel. Rhizomes small. Fragrant. HM'52. [Snow Flurry X White Wedgewood]... Regularly \$1.75; on \$10 order **\$1.25; 3 for \$3.55**

RHYTHM (Ballard '54) M to ML-24" See in color. A phenomenal break in Iris form; the first flat Iris with six bearded falls. A whimsical freak of nature, entirely without the usual three standards characterizing normal Iris. A novel item for arrangement fans. While not highly fertile, some seedlings have been produced, thus it offers a challenge to adventurous breeders eager to get this distinctive form in bright new colors. Be the first to accomplish this. 24 chromosomes. [Alcazar x Archeveque] X Candelabra]... Regularly \$2.25; on \$10 order **\$1.50; 3 for \$4.30**

WHITE PARASOL

WHITE PARASOL (Mrs. R. M. Wolf '58) M-ML-38" See in color. From high in Colorado Rockies, near Continental Divide, where temperatures of -25° have been recorded, comes this magnificent flat white iris. A huge snow-white flower often up to 9"; flattens out much like a white parasol; hence its name. Displayed as a guest at American Iris Society Convention, Memphis, Tenn. Unlike most of older "flats" would seem to be a tetraploid, judging from its vigor & great size. Will be in constant demand as a corsage flower, & for use indoors in large flat containers. Substance heavy. Pollen variable, sometimes good; sets seed, so will be used by hybridizers everywhere. [Spanish Peaks X Violet Symphony] As it is partially inconstant & variable when poorly established, or at end of season, now offered, while supply lasts, at only.....
\$3.50; on \$15 order 2 for \$3.50; on \$25 order 3 for \$3.50

"My White Parasol is the most gorgeous iris I've ever seen; it is huge, and the first season it had 4 large flowers on one stalk," Mrs. Frances A. Schweitz, Osage Beach, Missouri.

MEMPHIS CONVENTION REPORT: "Everyone was quite taken with a big flat Japanese type of iris named WHITE PARASOL." Helen McCaughey, in the 1957 Yearbook of British Iris Society.

CONVENTION REPORT in Bul. 146 by former A.I.S. President Jesse Wills: "The most unusual Iris I saw in Memphis was . . . White Parasol . . . a wide flat flower where the standards laid over flat in a regular orderly fashion so effect was not like a tall bearded Iris at all, but was rather suggestive of a big exotic Japanese type."

LITTLE FREAK M-22" A white plicata that flattens out, but quite unlike the beardless Japanese, this regularly has six yellow beards. Attractive edging of violet. Pollen variable. A heavy increaser. . . Regularly 65c; on \$10 order 50c; 3 for \$1.45; 10 for \$3.25

ROSE DELIGHT—Quite Irresistible

VISITORS' FAVORITE

Each year I select the Iris best liked and most talked about by the many visitors to our garden. In '61 **ROSE DELIGHT** again caught the eye of more people than any other. So I show it in color so my many distant friends, who cannot visit the garden, can see why it was so much admired. This is the first time any variety has achieved this honor 2 years in succession.

ROSE DELIGHT (Austin '57) EM-40" One of the finest & best known examples of a red-bearded Flamingo having a delightful lacy edge to the petals. Attractive bright fuchsia-pink characterized by falls with pale yellow hafts decorated with soft golden brown veins. Standards nicely cupped & closed. Falls semi-flaring, held stiffly in position by very good substance. Good pollen. [Cloudcap X Courtier].... Regularly \$4.50; on \$10 order **\$3.75**

SUNNYDALE (Schreiner '59) EM-33" A frosty, sparkling, ethereal rendition of the Limelight motif in a larger, lighter version. Seems sheer as an apparition, fragile & membranous as a butterfly's wing, yet of good weather-resistant substance. Cool lemon coloring deepens at hafts, lightens to ivory in middle of falls which are sharply & delightfully edged in yellow lace. **HM'61**..... Regularly \$5.00; on \$10 order **\$3.35; 3 for \$8.55**

WHIR OF LACE (Schreiner '58) M-35" Whitest of all lacy lovelies, with perfection of beauty, crystalline purity & exquisite charm. In keeping with its name, it is as ethereal as gossamer; as lacy as a bridal veil, & as snowy as an angel's wing. Indeed, we have here a gem for the ultra-connoisseur. **HM'61, JC'61** [(Sdlg. x New Snow) X D. Hall Sdlg.]..... Regularly \$10.00; on \$15 order **\$6.65; 3 for \$17.95**

YELLOW LACE (Wallace '56) M-36" This is the "Goldilocks" Iris, for it is a brilliant golden yellow with curl-like whirls of heavy ruffling and lace. An Iris everyone will want for its great novelty. Children particularly will be enchanted with it; also hybridizers, for here is fine blood for lacy pinks and yellow with red beards. A "must have." [Chantilly X (Midwest Gem x Hall's 42-10)]..... Regularly \$5.00; on \$10 order **\$4.25**

My Favorite LACY LOVELIES—No. 44—Explained on p. 2. Amazingly generous assortments of my personal LACY Favorites for **\$5.00, \$10.00, \$25.00 or \$50.00**, as you prefer.

COLOSSAL IRIS

Two Pages of World's Largest Iris for Sensational Features in **YOUR** Garden

I do not want to over-emphasize size alone, as Iris must have other good qualities as well. Nevertheless, I notice the "gasps" that stop visitors in their tracks, and immediately bring forth exclamations of surprise and wonderment, are nearly always gigantic affairs surpassing anything ever seen before. So if you want your garden to be a mecca for miles around, plant a few of these magnificent new creations, scattered here & there thruout your garden. Then at blooming time in May or June sit back & watch how quickly your visitors find all of these special Iris, & beat trails to them.
 * Another suggestion: Devote a special portion of your garden to these largest & most spectacular Iris the world has ever seen. Choose a hidden corner or a prominent position near the entrance—in either case your visitors will soon find them, for nothing else will draw them so magnetically & hold their attention for so long. Try it & see for yourself!
 * I have searched the world for the largest Iris. Now I can offer good examples of these mammoth Iris in all colors & in all price classes. Year of introduction ranges from 1938 to 1959. The old varieties are, of course, not equal to the recent introductions, but they will provide plenty of excitement for the beginner until he can advance to the new super-giants.

1962 INTRODUCTION

BOLD GIANT (Austin '62) ML-40" Everyone seems drawn to enormous Iris, & here is a big, bold, impressive new one that will attract a lot of attention. Often has a spread of 7 inches or more. The falls frequently a full 3 inches wide. Standards are smooth coffee-buff, well closed, contrasting nicely with the broad, velvety & strongly flaring dark crimson falls. Comes from Char-Maize, so may be useful in breeding Greens as well as Colossals. Pollen abundant. My first introduction in Colossal race, one I have held back a year for increase, so I can introduce it at a price within reach of all. [Char-Maize X Gaylord].....Regularly \$5.00; on \$10.00 order **\$3.95**

ALLAGLOW (Tompkins '58) ML-37" Most honored of all Colossal Iris, as it received famous Fiorino d'Oro Award in International competition at Florence, Italy, in 1960. Reported from many sources as being outstanding for its gigantic size, its unbelievably beautiful coloring—bright Sunburst gold, blended bittersweet orange with an allover flush of clear copper yellow. Entire flower has glistening-gold finish. Giant flowers perfectly displayed on splendidly branched stalks. HM'58, AM'60 [(Ballet Dancer x Lady Albright) X Golden Twilight].....Regularly \$10.00; on \$15 order **\$7.95; 3 for \$22.65**

ANYTIME (Cavagnaro '56) ML-45" Here is absolute perfection—a flower that has to be seen to be believed. An Oncobred, one of first resulting from William Mohr pollen, yet so huge I list it with my Colossals. A broad-petaled white of Mohr form, with pale chartreuse at haft. Perfectly horizontal falls, huge rounded standards, all of superb heavy substance. Pods easily, pollen somewhat fertile. [Alba Superba X Lady Mohr].....Regularly \$5.00; on \$10 order **\$4.25**

COLOSSAL E-32" Gigantic 7" flowers in smooth deep lavender. Fragrant. [William Mohr X El Capitan].....Regularly \$1.00; on \$10 order **70c**

FEATURE OFFERING in Colossal Iris

CLOUDCAP (DeForest '50) EM-40" Reports from six states all agree this is largest, tallest & one of the best tangerine-bearded pinks. Giant blooms will often measure up to 7 inches. A delectable, slightly ruffled blossom pink, with wide closed standards & broad falls with an enormous tangerine-red beard. Remarkable seed setter. Pollen abundant, very fertile. Finest Flamingo seedparent I ever used. Seedparent for 3 of my introductions, Flaming Gold, Tangerine Snow & Rose Delight—a yellow, a pure white & a raspberry-pink, all with tangerine beards. HM'51; AM'53 [SQ72 X 6-44] See Ektachrome.....Regularly \$1.50; on \$10 order **\$1.00**

CLOUDCAP—Largest of all Flamingo Pinks—\$1.50

GIANT ROSE—Breathtakingly beautiful!

*****Colossal STAR PERFORMER*****
 * THIS ONE TOPS THEM ALL—See it in life-like color above *

* **GIANT ROSE** (Schreiner '59) ML-40" Nowhere else in the world will you find an iris equal to Giant Rose in size. This is a Ripley Believe-It-or-Not Iris if there ever was one. The dimensions are so incredible that I almost hesitate to mention them for fear people will say that Iris just can't be that big, but several flowers have been measured that actually ran from 11 to 11½ inches from top to bottom! If you want an Iris that is absolutely certain to be a conversation piece, you need look no further; this is it. My crystal ball permits me to look a few years into the future and I see people gathering wherever this unprecedented flower opens its blooms. Standards bright orchid pink, falls vibrant fuchsia-rose. These huge flowers have a starchy substance, a jaunty classic form, considerable ruffling and a sparkling sheen. The stems are an inch thick and have superb candelabrum branching. Be among first to display this marvel of Iris world. Pollen fertile, giving me several fat seedpods last year. Plant Patent No. 2067. [Pathfinder X Opal Beauty].

***** \$12.00 each *****

* **APRIL SHOWERS** (Craig '54) M-38" A fancy plicata. Flowers large, frequently simply gigantic. Standards light yellow; falls silvery sunlight yellow, brushing of white & lilac in center. Sets seed with Oncobred & Tall Bearded pollen. Shows double dose of re-blooming blood—Tiffany & Joseph's Mantle. Pollen parent of 2 of my '61 Autumn introductions. Fall Sunshine & Gold of Autumn. [(Mariposa Mia x (Tiffany x Los Angeles) x Belle Brunette))] X Joseph's Mantle].....Regularly \$2.00; on \$10 order **\$1.35; 3 for \$3.85**

* **BROADRIPPLE** (Buss '52) M-36" Heralded as "World's largest Iris." Impressive for substance & form. Nobly proportioned with falls fully 3¼" across center & 2" at haft. A lovely self, colored in soft aster-blue. Good branching & plenty of strength to support these huge blooms. Pollen viable, sets seed readily. [Violet Symphony X Vista Veronica].....Regularly \$2.25; on \$10 order **\$1.50**

* **BY-LINE** (DeForest '54) M-40" A sensational colorful yellow plicata. Among largest of Iris; standards soft burgundy red, creamy flush in center; falls bright yellow with wide border stippled dark burgundy red. Beard yellowish-orange with tiny black signal line. [(Tiffanja x Firecracker) X Rodeo].....Regularly \$1.25; on \$10 order **\$1.10**

* **CAROLINE JANE** (DeForest '51) M-38" Flowers enormous. Glistening white ground has a beautiful pattern of delicate blue markings. Wide standards & falls; falls flaring, ruffled. A favorite wherever grown. Comes from Tiffany & occasionally re-blooms in fall. HM'51; AM'55 [(Her Grace x Tiffany) X New Hope].....Regularly \$1.00; on \$10 order **90c**

* **CHALLENGE** (Stevens '50) EM-35" Massive beauty from New Zealand has been amazing visitors to our garden for a number of years. Everyone marvels at its size & brilliance & richness of bronzy rose coloring. [Inspiration X Caribbean Treasure].....Regularly \$1.75; on \$10 order **\$1.15**

* **EAST INDIES** (Smith '54) M-L-40" A crinkled & ruffled Iris of colossal proportions done in coffee-and-cream, overlaid iridescent violet. Heavy, harmonizing bronze beard. Arresting & different. Excellent pollen. HM'55 [Golden Days X Cascade Splendor]...Reg. \$5.00; on \$10 order **\$3.95; 3 for \$11.25**

* **EVENGLOW** M-36" Largest lavender—so large it will astound you, often 7½" across, 6" high. A lovely lobelia violet with a rosy cast, well tailored, unsurpassed substance.....Regularly \$1.25; on \$10 order **80c**

* **FORTUNE'S GIFT** (Mitch '55) M-40" See Ektachrome. Tremendous blooms measure 7" across and 7" high. Leathery falls are 3½" across, with wide hafts. A smooth brown self with a faint reddish glow. Beard golden-bronze, often ending in a slight crest. A hybridizer's masterpiece. Particularly significant since brown flowers hardly exist in nature, yet are a superb addition to the rainbow of Iris colors. Pollen plentiful. HM'56; JC'57 [Cordova X Inca Chief].....Regularly \$2.50; on \$10 order **\$2.25**

GIANT MOHR (Austin '58) M-44" The one "Mohr" everyone wants. A greatly improved version of renowned WILLIAM MOHR, much larger, twice as tall. Best of all for the hybridizer, has abundant pollen. Has the form, veining & color of William Mohr—a deep manganese violet. So new & such a wondrous flower, it is hard to believe, but this is my 1962 **EXTRA Premium—FREE for 15 days on any order of \$10 or more**, as explained on page 18, where you will find it pictured in life-like color. Be sure to get in on this chance of a lifetime. If you need credit to be able to order within 15 days, see left column page 2. **Largest & one of tallest Mohr hybrids in existence today.** Gigantic flowers usually a full 8 inches high, stalks regularly reach 44", remarkable for any Oncobred. Imagine how a flower like this can help in your breeding work with ordinary Oncobreds. A fast increaser, a very heavy bloomer. Visitors go wild over its size & great height, & several even ordered three. . . . Regularly \$5.00, on \$10 order **\$4.00**

GENEROUS—A super-size Re-Bloomer. See Autumns, starting on page 6.

GOLDEN GARLAND (Hall '57) L-42" Imagine, if you can, a veritable giant with both standards & falls delightfully edged in lace. Resembles ever-popular Truly Yours, but is superior in stalks, form & color contrast. Standards golden yellow; falls almost white, bordered with yellow lace. A real traffic stopper. **JC'58; AM'59 [50-33 X Palomino]** . . . Regularly \$3.50; on \$10 order **\$3.15**

GOLDEN RUSSET M-38" Simply enormous, often 7" high, falls 9" across when spread out. A beauty in golden russet. . . . Regularly 75c; on \$10 order **60c**

GRAND TETON (DeForest '56) M-38" Largest yellow ever created. Took my breath away when it burst into bloom last spring. Flowers measure 7 to 8 inches, falls frequently 4 inches wide. Prevented from being coarse by very wide ruffled petals with excellent substance, lasting a day or two longer than usual. A near self in wax yellow with a faint wash of chartreuse. Very attractive, a fine grower. Stalks tall with 3 well spaced branches. Reported from several parts of country as largest Iris grown. **JC'58; RU-AM'60 & '61 [Sib. to Honor Bright X Cloudcap]** . . . Regularly \$5.00; on \$10 order **\$3.75; 3 for \$10.70**

LOVER'S MOON (Porreca '59) ML-33" It is attracting a great deal of attention on account of its immense size and beautiful appearance. A clear lemon self even to the beard. Buds are so large as to be spectacular. An absolute crowd-stopper. [Amandine X Sdlg.] . . . Regularly \$12.00; on \$15 order **\$7.95; 3 for \$22.65**

MARY McCLELLAN (Craig '52) M-48" Except for Giant Mohr, largest Oncobred in existence. Mammoth vibrant deep violet-blue, flowering on stalks up to 45 to 50 inches. Four-way branching. Pollen parent of: Steeplechase, Bob's Blue & Blue Silhouette. C. White Mem. Award '59 [Blue Ox X Chivalry] . . . Regularly \$2.50; on \$10 order **\$2.10**

MEMPHIS LASS (Schortman '55) E-ML-36" A gracefully ruffled plicata of huge size in pure white, margined pinkish lilac & light mulberry. Very broad flowers, fine growing habit, good branching, abundant pollen. **HM'57, RU-AM'61 [Snow Flurry x Orchid Queen] X (Snow Flurry x Gibson Girl)** . . . Reg. \$10.00; on \$15 order **\$7.95; 3 for \$22.65**

MOHRNING HAZE (Luihn '59) EM-33" Famous Oncobred of gigantic size. Both falls & standards measure 4" across, making a flower to simply bowl you over. Favorably reported on in different Bulletins, often with comment that its best feature is its long blooming period, starting with early Oncobreds, ending with last of Talls. A greyed lavender-blue with a blue beard & some of the blue spilling over onto falls, & suggesting a signal patch. Destined for great popularity. **HM'59 [Snow Flurry X Capitola]** . . . Regularly \$12.50; on \$20 order **\$8.35; 3 for \$21.30**

NIKE (Nelson '59) EM-38" Described everywhere as a giant, & one of the first descendants of the Colossal Cloudcap, with Palomino as other parent. See what breeding potentialities it has. A flaring salmon-apricot with wide ruffled standards & falls, brushed canary at the haft, with a full wide red-tangerine beard. Remarkably heavy substance, tall well branched stalks. **HM'61 [Cloudcap X Palomino]** . . . Reg. \$15.00; on \$25 order **\$13.50**

PATHFINDER (Whiting '48) ML-36" Finest Colossal Iris available at this low price, both for size & beauty of its flowers & for its great potentiality in breeding. Huge pink, round, very wide petals, leathery substance & wide hafts. Glistening sheen; very prolific of bloom & increase. Mrs. Whiting said it was most talked of seedling in her garden. Few Iris anywhere have such a record of noteworthy descendants: Flounced Premiere '61, Giant Rose, Top Favorite, Quivering Flame, Orient Pink, & Pink Clover. No breeder of Pinks, Colossals, or Flounced Iris should pass up this one! **HM'48 [Mirabelle X Angelus]** . . . Regularly \$1.00; on \$10 order **80c**

PLAINSMAN (Kleinsorge '58) M-36" A real whopper, with great, almost horizontally flaring falls. An alluring self in gleaming golden tan, with undertones of apricot. Its giant flowers usually open in groups of 3, making a magnificent display on remarkably well branched heavy stems. Should be a good breeder. [(Chamois x Cascade Splendor) X Spanish Fandango] . . . Regularly \$5.00; on \$10 order **\$4.50**

SNOW GODDESS (Becherer '55) EM-38" See Ektachrome. A favorite of mine. Best of the white seedlings from Snow Flurry. Massive heavily ruffled flowers with white petals & a yellow beard. Stalks widely branched with perfect flower placement. Won coveted Award of Merit in '58. Much like wonderful '59 Dykes Iris Swan Ballet. I personally prefer SNOW GODDESS, which is much more plentiful, so price is more moderate. A vigorous husky grower, will be the pride of your entire garden. I can give it my highest recommendation. Not only are flowers gigantic, wide-spreading, but usually by late summer the rhizomes, too, are simply huge. Finest Iris among either Colossals or Tall Bearded with a strong re-blooming tendency—sometimes 60% will re-bloom in late fall or winter. [Snow Flurry X White Goddess] . . . Regularly \$3.25; on \$10 order **\$2.25**

SOLID GOLD (Kleinsorge '51) ML-36" Huge in size and deepest, most intensive yellow imaginable; remarkably fade-proof and lasting. A superb parent. **AM-53** . . . Regularly 75c; on \$10 order **55c**

TOP FAVORITE (Schreiner '57) ML-38" Before Giant Rose, this was largest pink Iris in existence. A magnificent, refreshing orchid-pink, perfection itself in form in its extremely heavy substance. Possesses a scintillating star-dust sheen that gives it an exquisite ethereal quality beyond description. This will be the pride and joy of your collection. **RU-JC'58 [Pink Plume X Pathfinder]** . . . Reg. \$3.00; on \$10 order **\$1.95; 3 for \$5.55**

WITCH DOCTOR (Plough '55) E to L-28" Will be an eye-stopper in any garden. Blue-lavender with buffy-tan. THE RE-BLOOMERS ARE ALREADY COMING INTO THEIR OWN: "I'm getting tired of hearing 'I love Iris but they bloom such a short time.' I have a friend here, about a mile from me, who has not been without at least one Iris blooming in her yard since July of last year; that is, 14 months without a break in the Iris bloom. We are preaching re-bloomers all the time." Sept. 24, 1959. Mrs. Zerk Maye Brummett, El Paso, Texas. See pages 3 to 9 for my Re-Bloomers.

SUGGESTION FOR LOCAL IRIS SOCIETIES
 Why not gain widespread publicity by exhibiting re-blooming Iris at your State Fair, as the Empire State Iris Society is doing in New York? Note this account of their exhibit from Sept. 4-12, 1959, written by Marguerite Slocum:

"The booth this year exhibited living iris in bloom for the first time. The varieties Autumn Queen, Sangreal, Autumn Bronze, Autumn Twilight, Barre Beauty, Fall Primrose, and a McGarvey Seedling, caused much comment from the many visitors to the Horticultural Building. Another suggestion is the creation of a special award for the best re-blooming seedling produced by a New York State hybridizer, to be judged at the Fair by an accredited judge."

If you have to hurry to get in on the \$5.00 EXTRA Premium above, you'll very likely wish to send another order a little later. Very profitable to do so, because you are then entitled, ALTOGETHER, to a total of Premiums due on the SUM of your orders to date. Thus, if you take a Class A Premium on your 1st order of \$15.00 or more, & then later send a second order of \$10.00 or more, you are entitled, altogether, to Premiums offered for a \$25.00 order. A \$25.00 order allows you 3 Class A Premiums, & since you have had one, you get 2 more on just this \$10.00 order, which by itself would not be entitled to any Class A Premiums.

If your current budget will not allow you to get up where Premiums are really plentiful, you can order more from time to time, as your pay checks come in, & in the end get the FULL Premiums & other important benefits shown for larger orders. Whenever you ask for more Premiums on a later order than it alone is entitled to, be sure to mention what Premium you got on your first order, & what your payment was for that order. Thank you.

If I run out of certain items, I reserve the right to substitute as your Premium, or EXTRA Premium, another variety in same or higher Premium Class, or of similar or higher price.

Iris Lovers' SWEEPSTAKES—For orders of \$10.00 or more

A GRAND PRIZE — This will consist of choice Iris regularly worth 3 times the total value of your order or orders before July 1, no matter how large the total may be.

TWO SECOND PRIZES — Each will consist of choice Iris regularly worth TWICE the total value of your order or orders before July 1.

THREE THIRD PRIZES — Each will consist of choice Iris regularly worth the same amount as the total value of your order or orders before July 1.

I have doubled the number of prizes & materially increased the value of the top one. So now you have twice as much chance of winning a much larger prize. Last year the FREE Iris I sent out to the 6 winners had a total value of \$228.00. Better get YOUR name in for the drawing this year. Winners may be anywhere in the world. In 1961 one was in Canada. See list of winners, page 22.

TO ENTER: All who order to the amount of \$10.00 or more, & pay for their order or orders before July 1, 1962, may enter by merely filling out form at bottom of either order blank, & sending on back of coupon the name & address of a flower-loving friend to whom you have personally shown (or will show soon) the full-color pictures & heavily discounted prices in this IRIS COLOR GUIDEBOOK. Quite obviously, to be helpful to me, the friend must be one who does not have this GUIDEBOOK. Now, if you order again before July 1, you may enter again & double your chances of winning. Or, if a single order overflows onto second order blank, you may send 2 names, fill out Sweepstakes coupon on both order blanks, & use on each coupon the total of your order on both pages. See what opportunities I have provided to help you win! The rest is up to you. More order blanks available on request, for you or your friends. Fill out both sides of Sweepstakes coupon. →

DRAWING will be on July 16, 1962, and will be conducted by Eldorado County Chamber of Commerce in Placerville. The 6 lucky winners will be notified by AIR MAIL and will be listed in my 1963 catalog. Open to retail customers only.

It's EASY to Order BY MAIL

See Page 2 for Ordering Information

It's easy to list varieties & their prices on my handy order blank & mail in pink envelope I supply. Please enclose remittance. I accept personal checks or postal or express money orders made out to Rainbow Gardens. Currency is OK on small orders. No C. O. D.'s please. I acknowledge order when received, unless to be shipped soon.

ORDER NOW. Iris may be ordered at any time, but I strongly urge that you order soon after this catalog reaches you, since choicest items, that you particularly desire, may be sold out if you wait. Thousands of people order by AIR MAIL to insure getting everything they want. See chart on page 39 for ordering and shipping periods.

SHIPPING DATES. Orders received from April to July are shipped out in the order received during July & early Aug. Later orders usually go out within a few days of the day they are received during Aug. & Sept. My very low 1962 catalog Sale prices & generous free Premiums are based on digging & shipping orders in large batches in this sequence. A special shipping date (between July 1 & Oct. 1) for an individual order necessitates that it be dug & shipped separately, at a much higher cost. So if circumstances require that your Iris be sent at a special date, please add 10% to your remittance & we will handle your order individually. No shipments of Iris during winter or spring, but manuals, kits, germination stimulant, etc., will be sent at any time.

NO DUPLICATES THIS WAY: "One feature that I particularly like about your catalog is the privilege of selecting your premium iris. This way you can get new iris that you would like to have and there is no risk of duplicating the iris you already have." Ruth Arnall, Richmond, Virginia.

My expensive new PREMIUM varieties, free with your orders, are listed in red on opposite page.

LETTERS AND NOTES should be on a separate sheet bearing your full name and address.

FAST SPECIAL HANDLING

PARCEL POST—Only 35c or 50c

To secure fast SPECIAL HANDLING Parcel Post please add, in space provided, 35c to smaller orders, and 50c to those of \$15.00 or more. Your package will travel right along with letter mail and you will get extra quick delivery.

"RACE OF IRIS" Column

It is a big help in filling your order if you mark RACE of Iris for each variety on your order, tho not necessary if you do not have time. Easiest way is to use these abbreviations: A = Autumn Re-Bloomer; C = Colossal; D = Dwarf; F = Flat; G = Green; H = Horned, Spooned & Flounced; L = Laced; M = Median (including Border, Intermediate, Lilliput & Table Iris); N = Novelty; Ob = Oncobred; S = Summer Re-Bloomer; T = Tall Bearded (not including separate races); Tg = Tangerine-Bearded; W = Winter Re-Bloomer.

GUARANTEE

I GUARANTEE all plants true to name, of first quality & size, freshly dug, free from pests, & in good condition when they reach you. If for any reason you are not completely satisfied, please notify me within 10 days of receipt of stock.

No Inspection Delays—PINTO TAGS

Due to exceptional cleanness of our stock, and absence of serious pests, Rainbow Gardens has been certified by Calif. Dept. of Agr. as a Pinto Tag nursery. This means each of our Iris shipments to California bears official state green and pink Pinto tag, certifying that in nearly all California cities the usual holding of nursery stock for inspection by local Agricultural Commissioner is NOT required. Hence you get quicker delivery and fresher stock. People everywhere order with confidence from a Pinto Tag nursery.

FINANCIAL REFERENCES: Dun & Bradstreet; Bank of America, Placerville, California.

DOUBLE POSTAGE VALUE IN IRIS

Leave postage space blank if you want me to pay postage. But if you add 10% to partially cover postage & handling, I'll reciprocate bountifully by including in your package choice Iris worth TWICE the 10% that you add. Try this now & I think you'll do it every year.

IMPORTANT—No matter how many times you order, always give your complete name & address, very clearly—and always the same way—as on catalog envelope.

IS THIS CATALOG CORRECTLY ADDRESSED?

If your name and address (as we used them in addressing the catalog envelope) are correct, please give them in exactly the same form on your order. For example, if you requested catalog as Mrs. John Taylor, please do not confuse us by ordering under name of Mrs. Florence Taylor. If the envelope was not properly addressed, please give us both proper address and one on envelope; and indicate which is correct one. And please write clearly so we will be sure to ship your Iris to proper address. Thank you.

MOVING?

Don't forget to notify me of your new address. And be sure to give the old address, too. Hundreds of catalogs are returned to me every year because people forget to notify me of the change in their address.

Why The BETTER Varieties Are Your Best Buy

It is gratifying to find that Iris lovers everywhere are awakening to the realization that, with a rapidly increasing plant like an Iris, they are much farther ahead to buy each year a smaller number of the better varieties than many rhizomes of the older kinds that have such limited appeal. People find more excitement in one of the new Super-Iris than in a dozen of the varieties that were popular in bygone days, and which they will soon be eager to throw out to make room for ones they can really enjoy. Therefore, to make your Iris dollars go the farthest, spend them for varieties you will want to keep.

SUBSTITUTIONS ON FREE IRIS

Throughout this catalog, or elsewhere, whenever I offer Iris free as a Premium, Gift, Bonus, etc. it is understood that if free variety you request is SOLD OUT when your order arrives, I reserve the right to substitute other free Iris of the same or greater value. Order NOW & avoid Sold Outs. Most kinds are plentiful early in the season.

QUANTITY PRICES

Greatly reduced quantity prices are available to all who use Iris in quantity, as Garden Clubs, Planters of Estates, Roadsides and Parks; Landscapers; Nurseries, etc. Outline your requirements, or submit for a special quotation a list of varieties and quantities needed.

MY GIFT ORDER SERVICE

FOR BIRTHDAYS, ANNIVERSARIES, MOTHER'S DAY, FATHER'S DAY AND OTHER SPECIAL OCCASIONS

Unlike other gifts you might send to express your sentiments, those for the garden grow and increase, becoming ever more beautiful with the passing of years. So when you are wondering what to give gardening friends, why not take advantage of my helpful GIFT ORDER SERVICE. Note simple instructions at top of order blank. Gift Iris serve for years as reminders of your thoughtfulness. Please note that shipment is only in summer and early fall. I furnish gift card unless you wish to supply your own. One of easiest and most satisfactory ways to select for a gift order is to check off, above, an EASY-DOES-IT Collection. I'll send kinds that should do well where your friend lives.

IT'S EASY TO ORDER FROM CANADA

To import Iris into Canada advise your Dept. of Agr. at Ottawa that you wish to import Iris by parcel post. Necessary address sticker with permit number will be sent you. Forward it to us with your order. Payment by Post Office Money Order is preferred. I prepay postage to Canada, just as for U. S. During the past 17 years we have shipped thousands of orders to Canada & now have many delighted customers from Quebec to British Columbia.

BRITISH and OTHER FOREIGN ORDERS

I ship many Iris to such distant places as South Africa, England, Australia, etc. Orders to all foreign countries, except Canada, subject to 10% postage and foreign handling charge. This covers such items as special packing, extra postage, office work of filling out various forms required. Minimum foreign order is \$15.00. Correspondence must be in English.

HOW TO OBTAIN BANK DRAFT: Restrictions removed in most of British Empire. Get Form E at your bank. Make out your order on pink order blank provided in catalog; present this at your bank as your invoice so you can purchase bank draft payable thru Placerville Branch Bank of America. Send order and bank draft directly to us—or, if your bank prefers to mail the draft, please be sure your name appears on the papers accompanying the draft; then send us your order, advising when payment was arranged. To understand U. S. prices British people only need to know that our \$1.00 is about equal to your 7/1.

2 or 3 for the SALE PRICE of 1. Open to All Whose Order Payment is \$10.00 or more.

My most popular offer, partly because everyone can win, and partly because the cash savings mount up so rapidly as to be unbelievable. For 1962 I have provided here far more opportunities for fun, excitement and real savings than ever before. This year, for you to find, there are 25 Secret Varieties & also (believe it or not) 25 SUPER Secret Varieties, or a TOTAL of 50 kinds that you can now get on this wonderful basis. Each Secret Variety is easily identified by fact that one word (of 3 letters or more) in variety description has only the last letter as a capital letter. For example, the word "glitterinG."

If you find some or all of the Secret Varieties & include any or all of them on your order, each followed by "S.V." you may list each at two for the discounted Catalog SALE price of one. You can either plant both for beauty & hybridizing, or go in with your neighbor & order two of each Secret Variety, so you will each have one at what amounts to half price. I do not send the extra rhizomes unless your order calls for 2. Also, note that this sensational offer of 2 for the price of 1 applies, obviously, only where you pay the Catalog Sale or Regular Price for 1, not to varieties secured in collections & not to Premiums, Bonuses or other free Iris.

25 SUPER SECRET VARIETIES (3 for Sale price of 1)

I have found over the past several years that whenever my stocks will permit me to offer any SUPER Secret Varieties, my customers go wild with the excitement of finding these, because here is where you get: 3 for the discounted Catalog SALE price of 1, wherever there is such a price. You can save still further by going in with your friends on these (and on my wonderful LUCKY SUPER BUYS); when the 3 Iris arrive, keep one & pass along the other 2. I have provided for YOU in this catalog 25 of these SUPER Secret Varieties: 2 Summers, 4 Autumns, 2 Colossals, 1 Flat, 2 Greens, 5 Horned, 1 Laced, 2 Tangerine Bearded, 3 Tall Bearded, & 3 Oncobreds. Each variety can be quickly & positively identified by the fact that its description contains TWO separate words, instead of one, each with a final capital letter—and the two final capitals are always the same. When you order these put "S.S.V." after name and enter "3" in "No." column. Quite obviously, the more of these S.S.V. varieties you order, the more Iris & the more real value you will get for your money. Another Rainbow Gardens exclusive.

You can do this with as many people as you want, & get a different \$5.00 Present each time. How else can you make money so easily? HYBRIDIZER'S COLUMN

Hybridizing Is Easy, Profitable, Lots of Fun

You'll live longer—and better—if you have an absorbing & profitable hobby that repeatedly, year after year, gives you something interesting and exciting to look forward to. I challenge anyone to suggest a hobby that will accomplish this as surely & effectively as does Iris hybridizing. Already thousands of my customers have tried it, & nearly all are rapidly becoming enthusiastic amateur hybridizers, almost overnight.

Get in now on this new hobby that can become really profitable. Amateurs often produce world beaters. New Iris may sell for up to \$100 per rhizome; introductory prices of \$20 to \$25 are common. Put your spare time in on this absorbing hobby and watch results. My yearly GUIDEBOOKS keep you right up to date.

To learn the vital flower parts see Ektachrome of Rose Delight, page 15. The 3 reddish beards have nothing to do with pollination. Above the center beard is the cream-colored anther, containing the pollen. Remove an anther from a flower of one variety, and rub the pollen grains onto the top of the stigma of the variety to be pollinated. Stigma is the curved lip just above anther. Many helpful details in my MANUAL and SUPPLEMENT.

My Exclusive HYBRIDIZER'S KIT

Anyone can start the fascinating hobby of Iris Hybridizing with ease with my exclusive RAINBOW HYBRIDIZING KIT. Most vital items are 2 special tweezers I had made to order for this purpose. Anther-collecting Tweezers have special flat rounded points that permit collecting anthers without injuring delicate & vital style arms. Clamp-style Pollinating Tweezers are designed to hold anthers firmly & thus eliminate strain of pollinating. Kit also includes the following additional items: 36 Special Sliding Pollen Boxes, 100 Pollination Tags in four colors; 2 Weatherproof Pencils; 50 seed bags; 15 printed Record Cards; 1 copy of leaflet "Technique for Iris Hybridization." Price postpaid \$6.25; 2 for \$12.25

MY GERMINATION STIMULANT

I have tried many ways of hastening the naturally slow germination of Iris seed, but none is as simple and effective as my Rainbow Germination Stimulant. My extensive, carefully-controlled tests have shown it will often double or quadruple the germination of seed of Bearded Iris in a short time—and the quicker you get your precious hybrid seeds to germinate, the sooner you will have bloom. See my SUPPLEMENT for detailed results with seed of different types of Iris. Exact quantity to make 1 quart of solution, with full directions for use. Orders for Stimulant unacceptable from California due to high license fee. \$1.00; 3 for \$2.75; 10 for \$7.95

KEY TO DATA TO HELP YOU SELECT AND PLAN

To help Iris lovers & amateur hybridizers, I give the following in my variety descriptions: originator, year of introduction, season of bloom, height in inches, description, awards, parentage in square brackets, price. Latest ('60 & '61) awards in red.

I recommend particularly Iris recently honored by Awards of American Iris Society:

- Dykes — Dykes Memorial Medal. (Highest.)
- AM — Award of Merit. (Next to Highest.)
- HC — High Commendation.
- JC — Judge's Choice. (Best of the NEW ones.)
- Dykes RU and AM-RU — Runners-up.
- HM — Honorable Mention.

☉ — Choicest of inexpensive Iris especially recommended for beginners.

Other symbols explained, pages 2, 3, and 19.

SEASON ABBREVIATIONS from earliest to latest spring: EE, VE, E, EM, M, ML, L, and VL. To avoid the customary short Tall Bearded season, be sure to choose early, midseason and late varieties in each of the colors of greatest interest to you. Since the majority of varieties bloom at midseason, or nearly, you will need to give special thought to provide your garden with a good assortment of both the early bloomers and the late ones.

"Can hardly wait for your next catalog to see what the new free Premium Iris will be." Mrs. Howard O. Wilson, Brownwood, Texas.

When you get your Iris from Rainbow Gardens it's easy to win ribbons at your flower shows. When you do, don't forget to let me know the variety names & ribbons won. Thanks.

1962 INTRODUCTION

SIERRA SUNSET (Austin '62) E-M-45" A remarkable tall, robust Iris that takes its name in part from our own nearby, lofty Sierra Nevada, in part from the glory of its true sunset coloring. While I am introducing it as Tall Bearded, it is often plenty large enough to class as a Colossal & quite often many of the flowers are horned to boot, with horns over 1" long. Standards bright buff-yellow, lightly laced; falls light crimson, splashed & edged in light yellow. A skyscraper of an Iris, will sometimes reach above 4 feet. Likely to yield offspring that are horned or laced, or both, especially if crossed with Horned Lace. Try it. Pollen plentiful. [Horned Skylark X Ruffled Apache].... Reg. \$10.00; on \$15 order **\$6.65**

ADORN (C. Smith '59) M-36" Blazing yellow & white beauty, with the accent on strong contrast. Standards deep butter-yellow, falls glistening chalk white with minute yellow border, deep orange-yellow beard. Nicely ruffled & quite tantalizing. A dependable performer, tall well-branched stalks, good increase. HM'59 [Leading Lady X Lindora].... Regularly \$15.00; on \$25 order **\$11.95**

AHOY (Tompkins '57) ML-38" One of the top favorites, & a "New Look" in the red class. Close to Carmine red by Ridgeway; appears as a bright rosy-toned cherry-red having great carrying power. Ultra smooth clean finish adds to its beauty. Large, beautifully formed, flaring with very heavy substance & non-burning finish. Strong, well branched stalks on husky plants. Comes from Defiance, so appears to have great breeding potentialities. HC'55 [Sdlg. 50-116 X Defiance].... Regularly \$5.00; on \$10 order **\$3.35; 3 for \$8.55**

ANGELA MIA (Noyd '56) ML-36" Superb new white that will really bowl you over. Gigantic flowers have extra broad petals, heavily ruffled standards & falls. A crystalline snowy white, with long white beard adding to its purity. Fine branching & foliage; leathery substance; 4-way branching. RU-JC'59 & '60.... Regularly \$3.50; on \$10 order **\$3.15**

ANGEL CURLS (Branch '57) L-34" An exquisitely ruffled medium light blue that has captivated many of our visitors & has a personality all its own. Standards strong & closed; falls very wide, flaring. Substance heavy, has remarkable weather resistance. Its late blooming habit will help to extend your blooming season. HM'58; RU-JC'59 [Azure Skies x Cahokia] X Cahokia].... Regularly \$5.00; on \$10 order **\$3.35; 3 for \$9.55**

BANG (Craig '55) ML-36" Much coveted. A big, rich bright red, closest to true red yet achieved. Far outclasses ordinary reds. Will be sought by fanciers & breeders alike. Substance good. Beard golden-bronze. Lots of pollen. Pollen parent of wonderful new Zombie. JC'56; AM'60 [Savage X Cordovan x Molten].... Regularly \$3.00; on \$10 order **\$1.95; 3 for \$5.55**

BOLD CONTRAST—Dramatic—\$3.00

☉ **ARABI PASHA** (Anley '53) M-ML-36" Deep cornflower blue with a blue beard. Smooth finished, nicely tailored flower with most velvety falls of any blue. '53 English Dykes [(Blue Ensign x Windermere) X Blue Ensign].... Regularly \$1.50; on \$10 order **95c; 3 for \$2.70; 10 for \$7.50**

AZURITE (Sass '60) EM-35" Here, unlike other Iris, the attraction is the rich blue style arms contrasting with the almost pure white petals, sprinkled with minute sandings of blue around throat. Imagine the unusual & pleasing effect this gives. Three branches & terminal. Fertile both ways, already producing some very nice offspring. HM'61, JC'61 [Sdlg. X Dancing Waters].... Regularly \$12.50; on \$20 order **\$11.25**

BELLE MEADE (Wills '52) M-39" A superior pure white plicata, feathered at the edges with violet-blue. Has sufficient color to give a very blue effect. Excellent branching. Descendants include Miss Alameda & Rocco. RU-AM'57 [Blue Shimmer X Snow Crystal].... Regularly \$3.00; on \$10 order **\$2.50**

BELTON BEAUTY (Frey '59) EM-37" One of most widely heralded of recent introductions. A very large, heavily ruffled & broadly formed flower in rich deep violet with a large white area in center of falls, giving it uniqueness & distinction. A well substantiated beauty, blooms heavily on well branched stalks & is always lovely, rain or shine. Extra long blooming season. HM'59; JC'60 [Snow Flurry X Chivalry].... Regularly \$7.50; on \$10 order **\$5.60; 3 for \$15.95**

BETH COREY (Watkins-Watkins '57) ML-38" Everyone is looking for a new Iris with more flowers per stalk & resultant longer blooming period. This is my nomination for the best blue in this category. A lovely medium blue of great clarity of color, beauty of form. Has 3 or 4 buds in each socket. Color reported non-fading. Flowers large, yellow-orange beard. Domed standards, flaring falls. Tall, sturdy stalks, branching good. HM'57; JC'58 [(Shining Waters x Gloriole) x Great Lakes] X Chivalry].... Regularly \$5.00; on \$10 order **\$3.35; 3 for \$8.55**

☉ **BIG GAME** (Fay '54) E to L-38" A self in the deepest shade of violet. Begins blooming early; still blooming at end of season. Three buds instead of the usual 2 in each socket, with a total 12 to 15 flowers per stem. HM'54; AM'58 [(Snow Flurry x Chivalry) X (Blue Seeding x Chivalry)].... Regularly \$2.50; on \$10 order **\$1.65; 3 for \$4.70**

☉ **BLUE FRECKLES** (Schortman '55) EM-38" Fetching white-ground plicata, clear blue markings. Ruffled flowers, closed standards, semi-flaring falls. Good branching. With this parentage, I would suspect re-blooming tendencies. [(Snow Flurry x Blue Shimmer) X (Tiffany x Gibson Girl)].... Regularly \$3.00; on \$10 order **\$1.95; 3 for \$4.95**

BLUE INTENSITY (Austin '58) E-M-36" Often attains flower height of 7 inches. An intense, bright blue. Simply wonderful for effective garden display, due to brightness of color, large size of flowers, abundance of flower stalks and number of flowers per stalk. From Berkeley Blue X Chivalry, thus sister of my twice-blooming BLUE SURPRISE (page 7) in a brighter hue. It's fragrant, too, sets seeds heavily. Regularly \$3.00; on \$10 order **\$2.25; 3 for \$6.40**

☉ **BOLD CONTRAST** (Linse '54) ML-40" See Ektachrome. A beautiful variegata. Standards clear bright gold; falls blackish maroon red, with partial edging of yellow, orange yellow beard. A bold, stunning contrast in colors. Pollen plentiful. HM'55; JC'56 [Extravaganza X Rajah Brooke].... Regularly \$3.00; on \$10 order **\$1.95; 3 for \$5.55**

A heavenly deep violet-blue, combining good form, heavy substance, and branching galore to make a prize winner, both on the show bench and in the garden. Won Certificate of Excellence from Empire State Iris Society in '58. Flowers ruffled and well proportioned. HC'58; HM'61 [Snow Flurry X Chivalry].... HIGH BARBAREE

My Favorite Red

HIGH BARBAREE (Tompkins '58) E-L-38" My personal favorite of the many new reds that have been appearing in recent years. So I took a color photograph of it & have reproduced it for you in all its glory. Not only is this nearest to true red, but it is also nearest to a true self with standards almost as deep as the falls—a very desirable, but seldom seen, characteristic. Color between currant red & carmine. Very finished appearance. Bright yellow beard contrasts smartly. Stalks widely branched, & while some are strictly erect, others may be spreading so stalks from a two-year clump from a single rhizome often make a stunning cluster five feet across—hard to equal anywhere in the Iris world. Pollen abundant. I am working this overtime in my crosses to produce an equally fine Re-Blooming red. HC'57; HM'58 [(Sunstone x Colorglo) X Defiance] . . . Reg. \$7.50; on \$10 order **\$5.95**

GREEN CHANCE—Greenest Iris to Date—\$3.50

Everyone seems to want greens & more greens. I have been continually asked why I don't group the widely scattered "greens" all together, so everyone can find them quickly. So this year I've done just that. None of these are bright leaf-green, as such Iris do not exist as yet. But they are very fascinating approaches to green from various directions. Same variety varies in coloring in different soils & climates, being greener in some than others. Even here flowers will be greener some springs than others, depending, perhaps, on varying amounts of sunlight & cosmic rays. Flower color is rarely constant; usually it changes & lightens as flower ages.

GREEN CHANCE (Murray '55) EM-38" My nomination for greenest Iris available today. Has more real green tones than any other I have seen. So I photographed it in color for you. A fetching chartreuse bitone. Standards light green-chartreuse, strongly arched; falls large, spreading, yellowish & greenish olive. Under some conditions standards are quite open & falls only slightly spreading. Visitors always astonished at amount of green when they suddenly run onto it. I am using this more than any other in my crosses for new and better greens. Pollen very abundant & fertile, very heavy seed setter. No one hybridizing for greens should be without it. Likely to sell out early. [Appointee X Green Pastures].....Regularly \$3.50; on \$15 order 2 for \$3.50

GREEN HAT (Murray '55) M to L-38" See in life-like color. Next to Green Chance, in my opinion, as the best of the GREEN Iris available today for widespread planting at a very moderate price. Unique is certainly the word for this. Standards green-chartreuse, falls hazelnut-brown, edged with green of standards, set off with gold beard. Heavy substance. Produces 7 to 10 blooms per stalk. Wonderful for hybridizers; has two greenish Iris in its pedigree, Green Pastures and Appointee. [(Green Pastures x Melitza) X Appointee].

FEATURE OFFERING in Green Iris

GREEN PASTURES (Heller '47) E to L-44" One of closest approaches to green yet available. A delightful chartreuse yellow in pastel tints. Touch of blue at tip of yellowish olive beard most effective; accentuates cool green tones. Huge, tall, free flowering. Starts early, often still in good condition when late varieties come out. Reported hardy in Iowa, but some in cold climates protect rhizomes over winter with a good mulch. Introduced at \$30.00. Extremely popular, outselling all other approaches to green; in fact, it outsold all other varieties. I sent out over 1,000 rhizomes, yet over 100 people were disappointed as they got their order in too late to get Green Pastures. A word to the wise is sufficient—order TODAY. Pollen is abundant, highly fertile; excellent seed setter. Now is the time to get a start so you can begin crossing with various greenish tones. You may well come up with a world beater. Note the quality of these descendants: Green Chance, Green Hat, Winged Goddess, Breath O'Killarney, Bowling Green. HC'45! HM'47 [Old Ironsides X Oregon Sunshine] See in color.... Regularly \$1.50; on \$10 order \$1.00; 3 for \$2.85; 10 for \$7.50

What Kinds of Iris Will Thrive in Your State?

If you are a beginner with Iris, & have never had the delightful experience of having colorful Iris in bloom almost every frost-free week of the year, the question above will be the first one you will ask about Iris. The answer is remarkably simple. All 20 races of Bearded Iris will do well in practically every state, except Florida & the damp humid areas close to the Gulf of Mexico. Thus you see there is no need to restrict yourself to the familiar Tall Bearded Iris. I have discontinued all difficult-to-grow Iris, so now all of my 1000 varieties are BEARDED IRIS, recognized everywhere as being of the easiest culture.

The Same EASY CULTURE For All Iris In This Catalog

Most Iris like good drainage and plenty of sun. Thus, if you can supply good drainage and sun, you can grow anything in this catalog. I purposely offer only those varieties that are cold-hardy, and can be grown throughout the United States and even in Canada and Alaska. Complete cultural leaflet sent free with every Iris order.

I have many delighted customers in every state. You may be surprised to learn that about a third live in the colder eastern, northern, or mountainous portion of our great country. A second third lives in the great South, South Carolina and Tennessee to Texas and Oklahoma. Remainder live here on the Pacific Coast, chiefly in California, Oregon and Washington. So I very likely have pleased customers in the very same city or town where you live. See reports from 3 delighted customers on page 12.

Remember

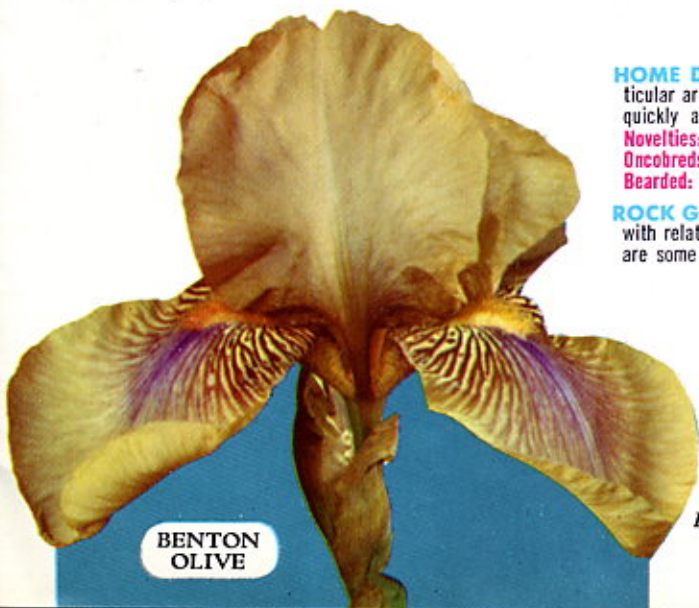

Stocks won't last long at these Catalog-Wide Sale prices. So please place your order PROMPTLY and order everything you want before supplies of some kinds are exhausted. At these prices, **THE MORE YOU ORDER, THE MORE YOU SAVE!** See pages 2 and 18.

Helpful Hints To Aid You In Choosing THE RIGHT IRIS FOR SPECIAL PURPOSES

HOME DECORATION WITH FLOWER ARRANGEMENTS — Iris in general and these kinds in particular are superb for indoor flower arrangements. With the natural grace of Iris you don't have to be an expert to quickly achieve highly artistic arrangements. **Greens:** (pages 28-29) Benton Olive, Blue Parakeet, Char-Maize; **Novelties:** (page 33) Susiana Hybrid, Pink Marble; **Table Iris:** (page 38) all varieties well suited to arrangements; **Oncobreds:** (pages 34-37) Jallah Effendi, Gray Mohr, Nomohr; **Medians:** (page 38) Allah, Cherry Falls, Lodestar; **Tall Bearded:** Dark Chocolate, p. 24; **Summers:** Persian Pattern, p. 5.

ROCK GARDENS AND POT CULTURE — Both of these popular uses for Iris require plants of low stature, with relatively small flowers. So you'll find just the Iris you need on page 38, the **Dwarfs** and **Medians**. Also there are some petite **Re-Bloomers** (pages 3-9) such as August Waves, Autumn Elf & Autumn Queen.

HYBRIDIZING: To help you get started quickly and easily, the following varieties are just a few of many that are inexpensive, yet are among the very best **proven seed parents**, that have already yielded superior offspring, many other new ones exceptionally useful for hybridizing are mentioned in the catalog descriptions: **Cloudcap**—Tg, page 16; **Argus Pheasant**—T, p. 24; **Char-Maize**—G, p. 28; **Black Hills**—T, p. 27; **September Sparkler**—S, p. 5; **Unicorn**—H, p.12; **Hybridizer's Seedling**—Ob, p. 35; **proven pollen parents:** **Horned Papa**—H, p. 11; **Inca Chief**—T, p. 27; **Beisan Aga**—Ob, p. 36; **Pathfinder**—T, p. 17; **Green Pastures**—G, p. 28; **Twenty Grand**—L, p. 15.

Strange and Unusual Iris to Amaze Your Friends

Iris NOVELTIES and RARITIES

Don't Be Without a Few of These "Conversation Pieces" in YOUR Garden

Wondrous ONCO-LIKE Oncobred

SUSIANA HYBRID VE-15" In many ways resembles the widely-sought true Onco more than any other Oncobred: boldness & blackness of its signal patch; very broad brown beard, often over 1" across; fascinating, intricate Onco-like pattern of veining. A large, glorious, hardy red-violet descendant of most famous of Oncos, Susiana, so much like a true Onco that for 10 years we grew it with our many Oncos. But we found it much more robust & water-resistant than any Onco. Last few years we have grown it with complete success in beds of Bearded Iris that get summer irrigation following our winter rainfall of about 45". Full parentage not known, but must be an Oncobred, with enough Bearded blood to give it the adaptability everyone wants. Should succeed almost anywhere & give universally-sought fascination & excitement of an Onco, without usual difficulties in making it happy in your garden. Rhizome you get will not be large with green leaves like Tall Bearded as foliage and roots die back, like an Onco, in late summer. So rhizome you receive will be small & bulb-like, with little foliage. But flowers are surprisingly large—More intriguing & captivating than any other Iris in this entire catalog. Sold out last year, now very scarce. Hurry! Regularly \$3.50; on \$10 order **\$2.75**

REAL HARDINESS: "Susiana Hybrid is the only Onco which survived this rugged climate. It's lovely." Raymond R. Baker, Ashland, New Hampshire.

World's First Truly DOUBLE Iris—Introduced Last Year

***** **Novelty STAR PERFORMER** *****
DOUBLE ROSE (Recknor '61) L-35" A fantastically doubled flower—tosses aside what has been conventional Iris form for centuries, adopts instead the form of a big, double rose—& hence its name! While descended from 2 Bearded Iris, fall-like petals have no beards, & may be semi-erect or quite spreading. Center filled with curved, nearly erect, standard-like petals, large style arms & petaloid styles resembling standards. Heretofore, so-called "double" Iris I tested showed relatively little doubling, but no seeker of the unusual will be disappointed in lack of doubling in Double Rose, as it doesn't grow any other way! Introduced primarily as a breeder's Iris since adverse weather sometimes prevents complete normal opening. Yet it certainly has genes for doubling. Some enterprising breeder will take this & produce an Iris to startle the world. Why not you? A blend of deep & bright crimson with mahogany & yellow. [Day Dreamer X El Paso] Regularly \$5.00; on \$10 order **\$3.35** *****

MORE ON RE-BLOOMERS (Listed on pages 3 to 9)

HOW TO SELECT RE-BLOOMERS TO FIT YOUR CLIMATE: For Mild Climates: Choose at will, among signaled or non-signalized Summers, Early, Mid or Late Autumns, early Winters, or even the Mid & Late Winters. For Semi-Mild Climates: Try all of the Summers, all 3 types of Autumns, most of the Early Winters, plus some experimenting with Mid & Late Winters. Border-line Climatic Areas: Any Summer or Early or Mid Fall Iris plus some experimenting with Late Fall Iris. For Cold Sections of the East & North: Order mostly Summer & Early Fall Bloomers, plus any Mid Fall Bloomers marked ++ or +-+ The Very Coldest, Most Northern Areas: Select only Summer & Early Fall Bloomers, & only those marked ++ or +-+, with or without other crosses.

OUR SUMMER & FALL IRIS DISPLAYS

Before 1959 we had little realization of the extent of summer & fall bloom that is possible up here in the northern mountains, at an elevation of 3,000 feet. But during the summer of 1959 we had no less than 60 Iris varieties blooming to some extent. In 1960 the number jumped to exactly 80. In all cases where the summer bloom, or the bloom in Sept. or Oct. was substantial, I am conveying the information to you by means of my various plus symbols following the variety names in the Summer & Autumn sections. From early Sept. to mid Dec. we had literally thousands of Iris flowers in bloom continuously in spite of heavy digging in practically all plots to fill orders. I attribute this phenomenal floral spectacle to two things. First, the many new and vastly improved re-blooming varieties, that we have recently introduced or added to our garden. And second, to our improved cultural practices, particularly the use of fertilized irrigation water, or liquid manure, during dry spells in spring and especially from June thru Aug. Cultural directions for Re-Bloomers are included with all orders.

EDITOR'S EXPERIENCE IN NEW JERSEY. "Two-season or re-blooming tall bearded iris that bloom in spring and again in summer or fall are doing very well in my garden in central New Jersey. By late summer the plants were well established and nappanee. Autumn Twilight, Potawatomi, Joseph's Mantle, Autumn Queen and Halloween Night were, as gardeners say, a sight to behold." John R. Rebhan, Feature Editor, Popular Gardening, reporting on Iris from Rainbow Hybridizing Gardens.

Remember, it is the **NEW** and the **UNUSUAL** that attract attention in your garden.

Two of My Most Popular Introductions

REAL GOLD (Austin '52) M-28" See in color. Nearest approach to real gold color (not yellow) yet attained in Iris. Has definite Onco characteristics. Most widely known & grown of my originations to date. If you don't have it, you're missing something. Standards glistening gold buff. Falls deep gold buff, enhanced by harmonizing soft brown veins & a golden bronze beard. Falls broad, quite flaring, up to 6" spread. Rhizomes small but a terrific increaser; you'll have a big clump with lots of bloom in short order. Good pollen, sets seed. 47 chromosomes. **Honorable Mention '60** [Golden Majesty X Capitola].....Regularly \$1.75; on \$10 order **\$1.30; 3 for \$3.70**
BOTH—Real Gold and Pink Mohr, a \$5.25 value.....for only **\$3.75**

PINK MOHR (Austin '56) M to L-24" See in color. Pinkest Oncobred with real Mohr form & very visible Onco characteristics. A large flower, much like Elmohr, but bright orchid-pink instead of purple. Even "mohr" Onco-like than Elmohr, as it has 1/2 inch soft rosy mulberry signal. Resembles Present, but much pinker, brighter. Nearly horizontal falls sometimes spreading out to 7". Beard bronzy-yellow. Rhizomes quite small. [Cherie X Capitola].....Regularly \$3.50; on \$10 order **\$2.75**

"I like all my iris I've got from you and must add my voice in praise of Real Gold. It stopped people cold in my show garden this spring. Two large clumps had loads of bloom and looked like double iris, with four and five standards and five and six falls." Susan Anderson, Sunny Place Gardens, Des Moines, Iowa.

BRAND NEW FOR '62

BRIGHT PASTEL (Austin '62) E-EM-33" A delightful & quite unusual bicolor Oncobred, done in contrasting pastel tints. Standards large, strongly arched, light violet-pink. Falls contrasting pinkish-buff, large, broad, arched outward, giving the flower a globular Onco-like effect. Foliage & rhizomes quite small, somewhat Onco-like. Plenty of good pollen. [Cloudcap X Capitola].....Regularly \$15; on \$25 order **\$9.95**

ALBINO GIRL (Noyd '59) EM-32" A startling surprise—a ruffled white with a green line up the midrib, & a very wide red-tangerine tipped white beard. Really unusual! Will set some seed. [Center Glow X Sib.].....Reg. \$7.50; on \$10 order **\$4.95; 3 for \$12.60**

ALLEGRIA VE-15" Very much like the wonderful Onco-like Susiana Hybrid pictured in my '61 catalog. But this is essentially an Oncogelia, the only one we can grow without slightest difficulty along with our summer-irrigated Bearded Iris. You can handle it this way, or as an Aril, with no summer water. Reddest of Oncogelias, very round & Onco-like. Visitors take it for a true Onco. A beauty. FRONT ROW (Linse '58) EM-26" Sister to fabulous Ozie Waters, should soon gain renown of its own. Mauve-rose self, with distinct ruby signal patch, & brown gold beard ending in a slight crest. GIANT MOHR—Like a gigantic, tall, fertile Wm. Mohr, p. 18. **FREE** for 15 days on \$10 order.

GOLD OF OPHIR (Austin '56) M-L-40" Coloring & profusion of bloom remind one of a tall hedge of old-fashioned Gold of Ophir roses, so loaded with rich golden flowers that hardly a leaf shows. Gives a wonderful mass of color in a short time. In 2 years each rhizome yields a big clump of 8 to 12 stalks, about 60 flowers & buds. I know of no other Oncobred that can do this. Flowers not large, but so plentiful, so colorful, everyone stands in admiration. Standards deep yellow, falls bright yellow washed reddish orange.....Regularly \$1.50; on \$10 order **\$1.25**

IF YOU LIKE TO RECEIVE NICE BIG RHIZOMES, READ THIS: "Just received my order of Irises, and they are all very nice, such large rhizomes surely will make for fine plants and blooms. So you see you couldn't have pleased me more. I noticed that the rhizomes of your Oncobreds are so much larger than some I have seen, and I'm looking forward to next Spring when these all come into bloom." Mrs. J. B. Craft, Jackson, Mississippi. "Wish to inform you my order of iris came thru in very fine condition and I think it only fair to tell you of all the places I have bought iris, yours have been the best rhizomes I have received, therefore, from now on you shall get my orders." Mrs. Harry Ross, Linwood, New Jersey.

GOLDEN JOPPA (Linsé '58) EM-35" A hybridizer's dream! Surely one of very finest of the many descendants of justly famous, but difficult to grow, Joppa Parrot. Fortunately this is very vigorous & has huge globular 8" flowers with form of *Gatesii* & color of *Pinnacle*! Standards creamy white; falls straw yellow with a hint of elusive green in center. Heavy golden bronze beard. Very fertile & will soon be in use by hybridizers everywhere. Be among the first to try it. HM'61 [(Extravaganza x Rajah Brooks) x Sib.] X Joppa Parrot]... Regularly \$10.00; on \$15.00 order **\$6.65**

GRAY MOHR (Paul '56) EM-36" A huge striking Mohr type flower in a most unusual coloring. It may be termed yellowish-gray-chartreuse. Falls flecked olive-brown. Only those who have actually seen *Gatesii* will realize how closely this resembles its exotic *Oncocyclus* grandparent. Certainly a "throw-back" and one that could be very useful to the breeder. As large as *Gatesii* and has much the same appeal. But unlike most Oncos this is fast of increase and easy to grow. Superb for either garden display or indoor arrangements. Pollen plentiful. [Wm. Mohr X (Alta California x King Midas)]... Regularly \$1.50; on \$10 order **95c**

GREEN MOHR (Muhlestein '51) ML-40" An appealing color. A silvery grey flushed with greenish yellow. Lavender flush center of falls. Should be crossed with best of greenish Tall Bearded. Will set seed, has plentiful pollen. HC'50; HM'52 [William Mohr X Chosen.] See life-like photo, page 37. FEATURE OFFERING in Oncobreds

HYBRIDIZER'S SEEDLING VE-28" As records of origin were lost, I am offering this as a seedling to help out Arilbred hybridizers, without official naming. So Onco-like, when I had an acre of pure Oncos, I grew it with them, but unlike them, it stayed green all summer & fall. An exceedingly Onco-like bright yellow Onco-bred, unmistakably of Onco origin as it has a bronzy-gold beard ¾" wide, & below this a small cinnamon signal. All petals rather fully, but softly splashed in purple. I am using this heavily in my crossing as I doubt if I have any other Onco-bred so Onco-like & so fertile in its pollen & as a seedsetter. I certainly recommend this to all who may have been having trouble getting "takes" with Oncobreds. Regularly \$3.00; on \$10 order **\$1.95; 3 for \$5.55**

INCANDESCENT (Plough '58) EM-26" Well named for this is indeed a beauty with a glowing appeal. Standards straw yellow; falls dark brownish yellow with a molasses red overlay radiating out from beard like a diffused signal. Beard yellow-brown. Use this to brighten up your garden and spotlight attention. HM'61 [Inca Chief X Asoka of Nepal]... Regularly \$5.00; on \$10 order **\$3.35; 3 for \$9.05**

JOPPA PARROT — Discontinued because too difficult to grow. Try Bali Agha, in color on this page—almost identical to Joppa Parrot, much taller, ever so much easier to grow. Also, for real thrills, try some of readily-grown descendants of Joppa Parrot: *True Gold*, page 37; *Red Joppa*, page 35; *Golden Joppa*, this page; *Black Joppa*, page 36.

***** **Oncobred STAR PERFORMER** *****

BALI AGHA (White '52) VE-L-34" My nomination for an incredibly fascinating & very colorful (see color plate) successor to hard-to-grow Joppa Parrot. Surpasses "Joppa" in almost every way; most important, it is very vigorous & easy-to-grow, stalks almost yard high. Flowers even larger, done in a very similar pattern, with color exploding fantastically in both standards & falls. Wiloh Wilkes reports 27 seeds from Imam Ahmid X Bali Agha; 130 seeds from Kalifa Gulnare X Bali Agha. So these new Oncobreds are inter-fertile. 44 chromosomes. Stock scarce. Hurry!... Regularly \$5.00; on \$10 order **\$3.35** *****

**21 of C. WHITE'S NEWEST FERTILE Oncobreds
PRICES SLASHED SO EVERYONE CAN TRY SEVERAL**

These NEW C. White Oncobreds approach very closely true Oncos in both form & in their glamorous colorings. So now YOU can have "Onco flowers" on easily-grown Bearded plants. To make that dream possible was the life-ambition of the late Clarence White. The 21 varieties I offer you represent final culmination of his 3 decades of painstaking hybridization. Most of the lovable, widely-grown little Oncobreds he produced thru the 1930's and '40's had only 22 chromosomes, were completely sterile, could yield no descendants. But these later creations nearly all have 44 chromosomes, are nearly all FERTILE, some abundantly so. What is more, they are masterpieces in exotic color patterns, clearly showing the Onco that is in their ancestry. They range in size from large to huge. If you have not tried some of these NEW ones you are missing the thrill of a lifetime—for hybridizing nothing surpasses them! Better to get a few of these new wonders than a host of old varieties that will transmit inferior qualities to your treasured seedlings. Most varieties may be sold out by fall. These contain so much Onco blood that their rhizomes are small, Onco-like.

RED BUTTERFLY (Linse '56) ML-40" An arrangers' Iris deluxe! Most striking of wonderful butterfly series, white veins on red falls are so very prominent. Modern version of renowned Butterfly Wings in red, white, & gold. Surprisingly for an Oncobred, this has splendid four-way branching & is a real husky grower. Widely used by hybridizers, fertile both ways. [Butterfly Wings X Spellbound]..... Regularly \$3.50; on \$10 order \$2.80; 3 for \$8.00

SANDY MOHR (Loomis '57) M-36" A big unusual William Mohr derivative. Fetching bicolor in tones quite unusual among Mohr offspring. Standards yellow-tan; falls deeper yellow-brown. Large flowers of characteristic Mohr shape & substance. Excellent branching. Regularly \$3.00; on \$10 order \$1.95; 3 for \$4.95

SCARLET BUTTERFLY (Austin '60) E-36" A fascinating red version of renowned Butterfly Wings. Standards pale red, flushed yellow. Falls dark scarlet, prominent white area around beard. Dark scarlet veins cross white area, extending to edges of scarlet falls. Reddest of Oncobreds, approaching dark scarlet, a color sought by Iris breeders for generations. Prolific pollen. Well branched stalks, about 7 flowers. [Butterfly Wings X Rocket]..... Regularly \$4.50; on \$10 order \$2.95; 3 for \$7.50

SESPE (Walker '52) M-54" Not exceeded in vigor by any other Oncobred. I saw this growing in originator's garden to a height of 6 feet. A graceful greenish-yellow with nicely flaring falls, excellent substance. HC'49 [Brown Betty X Fort Knox]..... Regularly \$5.00; on \$10 order \$3.00; 3 for \$11.70; 10 for \$4.25

For HYBRIDIZERS Only

SHARKSIANA (Earl Roberts '59) VE-14" If you're a hybridizer you just won't be able to pass this one by—but if you just want real beauty & charm I'm afraid I can't recommend Sharksiانا, the only Iris in this catalog I can best describe as a HORROR. Then why grow it? For lots of reasons! Most important, & speaking a bit technically, it has 44 chromosomes (24 from Sharkskin & 20 from Susiana), which makes it a second 1b-Mac True, but unlike that variety (which is world-famous as an Oncobred pollen parent) this sets seed. Pollen at least somewhat fertile too. Standards pure white, nicely arched; falls white flushed light chartreuse green, with deep chartreuse veins at haft, lightly splashed soft purple, narrow. Positively known to be half Onco. Almost all familiar Oncobreds are of unknown parentage, or only a small part Onco, usually ¼ or ½. But here is a FERTILE hybrid carrying many genes from most popular of true Oncos, Susiana. Will grow easily in your bed of Bearded Iris! I foresee a whole new upsurge in hybridizing, for the legions of breeders of Arilbreds will want to try their hand at crossing it with very best of their Tall Bearded Iris. It may prove to be the key to many wondrous new Oncobreds. [Sharkskin X Susiana]..... Regularly \$5.00; on \$10 order \$3.35; 3 for \$9.55

SINA MARIE (Paul '59) ML-38" At last a larger, richer, heavier substance "Elmohr." Color glowing mulberry-red. Superb substance makes it stand the weather like a veteran. Strong sturdy stalks with many flowers. No collection of Mohrs will be complete without this fine new one. HM'61 [Elmohr X Three Oaks]..... Reg. \$5.00; on \$10 order \$4.25

SPECKLED BIRD (Crandall '58) EM-34" Most unusual of Oncobreds, a real novelty. A huge flower, horizontal falls spreading out to 8". A soft violet, very heavily flushed & speckled white, especially in falls. Heavy leathery substance. Try this for something truly different! Pollen abundant. Foliage dies down in late summer or fall like its Onco ancestor. [Tiffany X Capitola]..... Regularly \$2.50; on \$10 order \$2.10

TROPHY (Linse '58) EM-37" A truly magnificent flower, calls visitors from all parts of garden. Great, spreading 9" blossoms are of heaviest substance & have falls 4" wide. Nearly a self in Lobelia blue, with great frilly style arms, a beard of bright, deep blue. Somewhat fertile, & a tremendous increaser. HM'58; C. White Mem. '61. [New Snow X Capitola]..... Regularly \$10.00; on \$15 order \$6.65; 3 for \$17.95

WITCH DOCTOR — Immense and stunning, see Colossals, page 17.

TRUE GOLD (Austin '61) VE-E-38" If you like my Real Gold you'll simply love my new True Gold, for it is a much earlier, much taller & much more flaring flower in almost the same unique true gold color, rather than yellow. While Real Gold came from Golden Majesty X Capitola, this descends from Palomino X Joppa Parrot, which accounts fully for the unmistakable "Onco look." While most derivatives of Joppa Parrot are short, True Gold produces an abundance of tall stalks, 36" to 40" high. Usually 3 flowers out at once at different heights. Thus a clump makes an exceedingly colorful sight in true gold coloring, before any Tall Bearded are out. Falls nicely rounded. Beard heavy, bright orange. Pollen plentiful. With parents as famous as they come, & with these attributes, it should be a superb breeder's Iris, too Regularly \$7.50; on \$15 order 2 for \$7.50; on \$25 order 3 for \$7.50

For FEBRUARY - MARCH - APRIL Bloom

USES: Low edgings, rock gardens and window boxes or pots. Rhizomes naturally small.

BLOOMING TIMES: Like to be surprised and delighted each and every spring? Then by all means plant some dwarfs. They awake from their winter slumbers with the first inkling of spring warmth. Some morning, before you are expecting them, there they'll be, blooming away when winter has hardly left. From then on "iris fever" develops rapidly and is soon at high pitch.

DAWN OF THE

SPACE AGE IN IRIS

World's First FLOUNCED IRIS Herald Beginning of the SPACE AGE

For several years my special seedbeds containing thousands of descendants of my horned race have been yielding up unbelievable treasures—seedlings so far advanced in floral embellishments that they surely belong to the Age of Space. These newest beauties, with horns transformed to diverse petal-like decorative features, constitute my new race of **FLOUNCED IRIS**, in lifelike color on this page & on front cover. These & my related **SPOONED IRIS** are the truly modern Iris, with developing wings. They contain no Onco blood, & are grown as easily as any Bearded Iris. For 7 more pictures of Spooned & Horned Iris, & for interesting sidelights on evolution, characteristics & hybridizing of these three distinctive new races, see pages 10 to 12.

FLOUNCED PREMIERE — A Space-Age Beauty. Open out front cover to see three other Space-Age Iris.

WINGED IRIS FOR THE AGE OF SPACE

*This is, indeed, the Age of Space
And all things must conform;
The people, planets, even plants
Must range beyond the norm—
So Rainbow Garden's debutants
Zoom like a missile storm.*

*To keep the pace of modern
times,*

*The iris world needs wings;
This era copes with flying stars.
Strange as these fission things
Are changes in the forms of
flow'rs
That hybridizing brings.*

*The pattern, like an atom, burst
With iris Unicorn;
Spoons, fringes, flounces, plumes add
grace*

*Evolving through the HORN . . .
Like rocket thrusts, for each new race
Celestial wings are born.*

—George Nicholas Rees

FLOUNCED PREMIERE (Austin '61) EM-M-36" A truly glorious newcomer in which the narrow horns of its seedparent, Plumed Delight, have been magically broadened & transformed into delightfully variable spoons & flounces, many petal-like, & some marvelously doubled, folded & frilled as in my lifelike photo above. Viewers go into ecstasies over the infinite decorative & attention-getting possibilities of this newest creation, so completely attuned to the Age of Space. Imagine the sensation it would cause at an Iris show. Pollen rather scarce, but an excellent seedsetter. 48 chromosomes. [Plumed Delight X Unicorn] . . . Regularly \$17.50; on \$25 order **\$11.65; 3 for \$31.45**

FLOUNCED MARVEL (Austin '61) ML-42" In Flounced Marvel the new flounces have reached the most advanced Space-Age development ever seen in any Iris. While flounces always vary somewhat from flower to flower, many of them are as large as shown in my color photo on the front cover. So named because everyone marvels that such a magnificent Iris, with such full decorative embellishments, could evolve in such a short time from simple slender horns that were the sensation only a few years back. Gorgeous large flowers borne on tall, erect stalks. Unbeatable as a parent for new flounced Iris as it is a very heavy seedsetter & produces pollen profusely. Very new tho it is, has already yielded 3 superb flounced seedlings and 1 dandy spooned one. Now's your chance to try it. 49 chromosomes. [Mulberry Snow X Happy Birthday] . . . Regularly \$25.00; on \$35 order **\$16.65**

FLOUNCED LOVELINESS (Austin '61) M-ML-37" Another Space-Age Iris that is an exciting yet wholly charming member of my triumvirate of flounced Iris. The intriguing & interestingly variable floral embellishments of Flounced Loveliness vary from simple horns to horns terminating in spoons up to 1" across, & on to petal-like flounces often as large & elaborate as shown in natural color below. Under favorable growing conditions, & near the peak of its bloom, fully half of all the flowers will have the adorable large folded flounces such as you see in my photo. By crossing this with other flounced Iris you may come up with a new one that carries the flouncing still further. This, too, is abundantly fertile both ways. 49 chromosomes. [Happy Birthday X Unicorn] . . . Regularly \$20.00; on \$30 order **\$12.95; 3 for \$34.95**

OPINION OF AN EXPERT: "Saw your Flounced Loveliness at Arbuckle and sure fell hard for it."—Leo Clark, Corning, California.

FLOUNCED LOVELINESS

Alluring!

Marvelous New SPOONED Iris FIVE 1962 INTRODUCTIONS IN SPOONED IRIS

FLYING REPEATER (Austin '62) The first Spooned Re-Bloomer, page 2.

FLOUNCED SPOON (Austin '62) ML-40" A novel and bewitching Spooned Iris that frequently sports nicely ruffled & folded flounces up to 2" long. Brings forth exclamations of surprise & delight from garden visitors. Standards light yellow, ruffled; falls & flounces done in a charming blend of coppery-gold, pink & buff. Falls often extend out nearly horizontally & are sometimes cupped upwards in a unique manner. Pollen profuse. [Mulberry Snow X Happy Birthday] . . . Regularly \$12.50; on \$20 order **\$8.35**

ROSE SPOON (Austin '62) LM-36" Very first of Spooned Iris colored in deep rose pink. Well rounded spoons, which replace the horns of earlier originations, are often nearly 1" wide. Falls quite broad & flaring. Grows yard high, with flowers borne on nicely branched stalks. [Plumed Delight X Horned Rosyred] . . . Reg. \$12.50; on \$20 order **\$8.35**

PINK SPOON (Austin '62) L-34" A highly interesting new Iris in which the 1" to 1½" horns are usually tipped with spoons, varying from ¼" to ¾" wide, often folded, sometimes fringed or bearded. A self, with standards, falls & spoons in light, slightly bronzy pink. [Happy Birthday X Unicorn] . . . Regularly \$7.50; on \$10 order **\$5.95**

SPOONED SAMPLER (Austin '62) ML-36" As there is such a terrific demand for a spooned Iris at a reasonable price, I'm introducing this at a fraction of the usual price for a Spooned Iris, so beginners everywhere can sample the new Spooned Iris NOW, without waiting years for prices to come down. While usually nicely spooned, flower form is not perfect by modern standards, tho very intriguing to some. Standards bright yellow, nicely arched; falls narrow, almost horizontal, somewhat folded, pale yellow, flushed light red. Each yellow beard usually ends in a light red horn with a spoon ¼" to 1" wide, commonly standing erect in a very provocative manner. Pollen plentiful, so you can start right in! [Plumed Delight X Horned Rosyred] . . . Regularly \$3.50; on \$10 order **\$2.95**

EARLIER INTRODUCTIONS IN SPOONED IRIS

SPOONED PREMIERE (Austin '60) ML-30" Behold in life-like color, on the front cover, the world's first Spooned Iris. An imaginative, almost magical development of my world-famous Horned Iris. Here the ends of the three horns have mystically enlarged and subtly transformed into broad decorative spoons, adding a charming embellishment no Iris ever had before. Sets seed; pollen variable, often plentiful. [Austin Horned Seedling J-910 X Horned Rosyred] . . . Regularly \$25.00; on \$35 order **\$16.65**

FRINGED SPOON (Austin '61) M-38" Very much like Fabulous Fringes shown in color on page 10, except for color. Standards soft light carmine; falls rich, velvety dark carmine, quite flaring. Much admired in seedling bed. Pollen available. [Unicorn X Ali Baba] . . . Regularly \$12.50; on \$20 order **\$8.35; 3 for \$21.30**

SPOON OF GOLD (Austin '61) M-36 Sparkling bright light yellow producing interesting bearded horns, often ending in spoons that are sometimes rounded & flat, & sometimes folded, occasionally attaining sizes of 1" to 1½" across. Best of the spooned Iris for producing superior flounced & spooned seedlings—I've gotten 4 worthwhile flounced ones & 2 good spooned ones already. So if you're planning to breed, don't pass up this one. 49 chromosomes. [Happy Birthday X Horned Papa] . . . Regularly \$10.00; on \$15 order **\$6.65; 3 for \$16.95**

SPOONED DELIGHT (Austin '61) M-34" Very first spooned plicata ever to be introduced, and a very pleasing one. Standards rosy amethyst, falls & spoons white, edged with a peppering to match standards. Spoons fan-shaped, usually about ¾" across, occasionally frilled or somewhat bearded. Beard light yellow. 48 chromosomes. [Plumed Delight X Pink Unicorn] . . . Regularly \$10.00; on \$15 order **\$6.65; 3 for \$16.95**
