We are very happy with our new place and think that this new virgin soil will grow even better irises for your gardens. See map on back cover for directions to our gardens.

PEAK BLOOM here should coincide with that of Seattle, with the tall bearded starting in May and continuing thru June. The miniature Dwarfs start early in April followed by the Standard Dwarf late in April and Intermediates in May. You are welcome to visit us at any time and we especially urge you to come early and see the many new colors and patterns in the smaller irises.
