SCHLIEFERT IRIS GARDENS

In the past year, mankind—in Neil Armstrong's immortal words—"took a giant step forward." Two men set foot on the moon which had long been a symbol of man's aspirations. The event was watched with intense interest by men and women in every part of the globe.

Over 1970 years ago God took a giant step—an infinite step—from heaven to earth. His footsteps have left their print on time and eternity—as no event before or since has ever done.

As this new season begins, may the significance of God's great step toward you bring you into a relationship with Him that will fill your daily life with love for Him and for others.

Each year we find the gardens more demanding of time and energy. We were pleased when Henry Sass transferred his seedlings and plants to our gardens. His iris wisdom and help has been invaluable.

Welcome to our gardens. Browse through the beds of flowers. See the newer iris, the rock garden and yard. We appreciate your generous patronage, for it is you, our customers, who make this endeavor possible. Our grateful and humble gratitude to each of you throughout these many years. We hope to have the privilege of serving you again.
