A WORD ABOUT SYMBOLS USED IN THE CATALOG

In the description, E, M, and L, signify Early bloom, Midseason, and Late. In the pedigree, the pod parent is on the left of the capital X and the pollen parent is on the right.

Mission Bell Gardens

Dear Friends,

February rains are melting the last remnants of the heavy snow received three weeks ago, and although a few green leaves are peeking through the soil, apparently the majority of the irises have not wakened from the deep sleep they entered after an early November snow storm ended a glorious Indian Summer. Colder than usual temperatures have prevailed since that first winter storm, providing - we hope - insurance against winter damage.

Bloom in 1979 was magnificent. Unseasonably warm weather forced TB bloom while many medians were at peak. Fortunately, a cooling trend moved in, contributing to one of our longer bloom seasons.

Among the early blooming varieties were plants received from Barry Blyth (Aust.) the previous spring. We especially enjoyed the smooth bicolor, Lilac Wine, on tall, sturdy, well branched stalks. Barry's newer bicolors are smooth hafted and display myriad color combos.

One of the first TBs to bloom was Angel Symphony (D. Meek '79). Large, wide-petaled, heavily substantanced blossoms on strong stems gave this superb white a slight edge over whites that bloomed later, since comparison was inevitable. Duane's Soul Music was never better. Tall straight stalks invariably carried at least three large open flowers . . . this dark-toned beauty had little competition as it performed in Roy this past year. And, along with other fine Meek introductions confirmed an earlier supposition — if the varieties we have bloomed in the past few years are indicative of future offerings from Joyce and Duane, the flower kingdom will benefit considerably.

John Weiler's oranges, Fresno Calypso and Fresno Fiesta, are the most promising advances in this color class we have grown. John Nelson's smoky pink-orchid rosy-tan blend, Fantasy Faire, gave an outstanding performance.

We were pleased when Roderick's Ruffled Ballet performed as well in Roy as it had done in Hayward and Huntsville. Several varieties from Evelyn Kegerize, including Feminine Charm, did surprisingly well on one-year plants. Perry Dyer's Blazing Saddles is a variegata not easily forgotten. Although a bit on the short side (weather, no doubt) its wide petaled, well formed blossoms have a special appeal because of the very rich coloring.

Additional varieties from hybridizers new to these pages that merit high ratings include: Blodgett's Chief Waukesha, McGee's Colorado Sunshine, Tomorrow's Dream from Paul Denis, Earthly Prize, Frank Carr . . .

Selections from hybridizers who have already received due recognition for their work did not disappoint us. The Keppel plicatas continue to appear in a surprising number of variations; Keith's red-bearded blue line shows advancement with Vivien, seemingly fashioned from pure silk.

Gatty's Lemon Punch could not be faulted. Ghio's Coffee House was my favorite of Joe's newer browns, although Malaysia is more colorful. Corlew's Birthday Song carries on Glenn's traditionally fine line of pink irises. Chippendale and Midnight Love Affair, from Denney and McWhirter respectively, did better, according to a California visitor, in Roy than in their home garden!

Moldovan's new introductions were delightful; the smooth variegata, Gypsy Caravan could have been the favorite, although tangerine-bearded, lavender Guardian Gate received many fine comments. Speaking of lavenders, Gaultier's Lazy Summer, a ruffly, lacy mass of orchid-lavender flowers, will undoubtedly break records for long lasting bloom!

The several plants of Schreiner's 1978 introductions were spectacular. Blooming at about the same time, with almost uniform height and with strong well branched stalks, they were a highlight of the season. Gold Galore, brilliant yellow without peer; Louisiana Lace, flaring, wide-petaled, tangerine bearded lavender-orchid that will win renown as one of the laciest irises of the seventies, and will become a general favorite because of over-all quality; and Copper Mountain, living up to Steve Moldovan's 1978 enthusiastic description - three of the dozen varieties, all of which were equally fine.

Others: Spence's Nickelodian, Muhlestein's Don't Neglecta, Hager's well known Vanity, Margaret Parker's Persimmon, Opal Brown's Satin Bow.

Desperado, Keppel BB, has graced our garden for two or three years. It has been a consistent performer, staying within its class requirements and never failing to please with its unique color. Hager's pink BB, Something Special, bloomed on a one year plant. I have seen no other BB that I would rate higher — sheer perfection in size, form, proportion — and vigorous!

A word of explanation concerning the irises listed in our catalog: Since we grow as many of the newer varieties as is possible, primarily for the purpose of evaluating our seedlings against them, we are faced with the problem of limiting the quantity to the number we can care for. With few exceptions, we have been eliminating by date of introduction; last year we eliminated varieties introduced before 1976. We realize we are banishing superior varieties, but find consolation in the impartiality of this method.

Last year we also decided to eliminate the Medians, with the exception of the Border Bearded. Since we are especially fond of the "little ones," we kept a few to enjoy and for possible hybridizing, but these will not be listed.

Special thanks for your good orders which keep our garden growing, and for the nice letters which sustain us when the days are long and the sun is hot May *your* gardens be filled with beauty and your hearts with happiness.

Sincerely yours,
Melba and Jim

1980 INTRODUCTIONS

BANJO MAN (Hamblen '80) M. 34 in. Large ruffled flowers with cupped standards and wide arched flaring falls. Sultry dark purple stands near greyed purple RHS 187A. Falls same, centered with deep blue-violet, brown shoulders (165A) and bushy bronze beards. Weather resistant blossoms well spaced on super branched stalks. (Touche x Gala Madrid) X Gypsy Prince. Fertile. No. H73-103E. HC '79 \$25.00

LOVELY KAY (Hamblen '80) ML. 32 in. With its pod parent's lovely form and showing the influence of the pollen parent's exquisite color, this medium pink (RHS 56B) has intensified coloring at the hafts and lighter fall centers which accentuate red-orange beards (32A). Cool weather encourages light orchid toning. Wide petaled, ruffled flowers are carefully spaced on strong stems. Pretty Nancy X Pink Sleigh. Pod & pollen fertile. No. H73-17L. HC '79 \$25.00

SUGARPLUM FAIRY (Hamblen '80) M. 36 in. Beautifully formed, large bicolor with apricot standards (RHS 19B), violet falls (87B) and cerise beards. A flush of pink in the standards extends along the upper edge of the falls. Broad, deeply ruffled petals: cupped standards, horizontally flaring falls. Strong, well branched stalks with eight and nine buds. An easy parent. (Touche x Misty Dawn) X Potpourri. No. H73-90D. HC '79 \$25.00

SUNSET SONATA (Hamblen '80) M. 32 in. Deeply fluted, lightly laced orange blend with an iridescent sheen. Orange standards (RHS 29C) suffused with pink; falls same with yellow-orange hafts and brilliant red-orange beards (30B). Touching standards, wide flaring falls. Splendid stalks and branching, eight buds. Fertile. ((Glazed Orange x (Orange Parade x (Orange Creamo x Glittering Amber))) x Mission Sunset) x Sky Burst. No. H73-55A. HC '79 \$25.00

INTERMEDIATE BEARDED

TENDER YEARS (Hamblen '80) EL 22 in. Wide petaled, gently ruffled, silvery white plicata widely bordered with markings and dottings of RHS 97B Violet-blue to 100D Blue. Domed, touching standards with deeper toned style crests. Flaring falls highlighted with eye catching, wide bushy, deeper toned beards (97A Violet-blue to 100B Blue). Extraordinarily good branching for an IB, with six or seven buds. During the five years we have bloomed Tender Years, the blossoms have been in good proportion to height with the exception of one year that brought an unusual amount of rainfall. Pod fertile, occasionally. Son Of Erin X M69-26E: ((Marinka x (Grace Note plic sib x Grace Note) x Canary Isle)). No. M74-2N. HC 1979 \$15.00

IRIS PLANTING AND CULTURAL DIRECTIONS

WHEN TO PLANT. For best results plant June through September. Early planting establishes the new Iris before winter. This is the time to reset clumps of Iris that are crowded, generally clumps 3 to 4 years old.

WHERE TO PLANT. The ideal location for Iris is a sunny, well drained position. Sunshine at a minimum half days; Iris will not do well in deep shade. No water should stand in Iris beds. Raise beds slightly above the level of garden paths if necessary.

DEPTH TO PLANT. Place rhizomes just below the surface of the ground with the roots well spread out underneath so that the rhizome is within reach of the warmth of the sun's rays while the roots beneath are in moist (not soggy) soil. Be sure to firm the soil tightly around each rhizome when planting. Follow ordinary good garden practice of watering and settling soil on newly set plants.

DISTANCE APART. This will depend on your particular plans. Generally iris are planted from 14" to 2' apart. If you desire immediate clump effect plant 8" apart in groups of 3 or more of one variety. You may have to divide and separate your plantings more often, but you will have a wonderful splash of color sooner than if you planted only one rhizome of one variety.

FERTILIZATION. Iris will thrive without feeding but will respond to its application. In the preparation of a new Iris bed, spade in a good application of compost below the roots. Then an application of a well balanced fertilizer applied as a top dressing dusted around and in between the plants in early spring or very late fall is desirable.

CULTIVATING. Do it shallowly. Iris feeding roots are very near the surface. Keep your Iris free of weeds and do not allow neighboring plants to encroach upon them. Remember, they should have sunlight right down to the rhizome. Remove the outer leaves as they begin to brown. At all times keep litter, old Iris leaves, grasses, etc., away from the rhizomes. Clean cultivation is the finest precaution for Iris troubles.

WEEDS. For the past six years we have used Treflan, a preemergent weed killer. It prevents weeds but will not kill those that have already germinated. Follow directions closely, and enjoy a practically weed-free garden.
