Our 34th Iris catalogue begins a new era for us, starting at a new location with promises of lots of new things happening as time goes by. So far we are enthused with our move back to the sandy warmer soils and the Iris are certainly showing us that they like it here even before they have flowered by sending up lots of increase.

This reflects itself in the great range of new Iris we are able to catalogue for the first time. We have not imported more, it is just that they have increased to an extent that we can introduce them sooner and at cheaper prices. This also means that so many of earlier introductions have had their prices reduced drastically and have been relegated to the garden lists at the back.

We have been having some pleasing success with our Iris overseas namely in Europe. Our son Paul won First Prize in Vienna with his Sundown Red. Lesley won the State prize with Jamari. She also won a silver medal in Germany with Sinbad the Sailor. While Barry won a gold medal in Germany with Moon Sundae. Capricornia won a silver medal in Vienna and Imagette coming 4th in the competition.

This spring in Florence we were fortunate in gaining a silver medal for Cameo Wine and Beach Girl came 5th in the competition gaining the Garden Club Award. Beach Girl also won the award for the best new colour. We also won the Premio Regione Toscana awarded for gaining the most awards in the competition. So it has been a good year for Tempo Two varieties. To even win half of these awards again would be something.

Our new gardens will be open this spring during bloom season but they are not as yet very well organised because of the move. As time goes on we will have good display beds organised and lots of other interesting plants to see. If you want to see the Iris or Daylilies, please feel free to call, but this season put in some boots or rough shoes.

Happy gardening
Barry and Lesley

TALL BEARDED IRIS

NEW INTRODUCTIONS FOR 1985/86

BEACH BOY (Blyth '85 Aust.) Sdlg. P98-A. VE-M 37". A stunning colour combination much liked by garden visitors over the past 2 or 3 years. Standards are smooth apricot, closed and ruffled; falls are orange, ruffled and flared. Beards stand out as brilliant tangerine orange. Branching is super and make this a great show winning Iris for the early show. Nothing else like it. (Lisa Ann x Roman Walk) X (Love Chant x Festive Skirt) **\$20.00**

BRANDY SIPPER (Blyth '85 Aust.) Sdlg. R13-1. VE-M 36" A prolific and super grower that makes an instant show. Standards are lemon gold; falls are tan overlaid lilac rose; mustard beard. Wide ruffled form like its parents. Could be called a semi plicata. (Broadway X Michigan Pride) **\$15.00**

LIGHT BEAM (Lesley Blyth '85 Aust) E-M Re. Sdlg. RL4-1. Full lemon yellow erect standards; falls are white stitched bright lemon, slightly deeper at hafts. Lemon yellow beards. It is wide and ruffled. Very vigorous. Reblooms well in Autumn. (Broadway X Beverly Sills) **\$15.00**

LIPSTICK LIES (Blyth '85 Aust.) M. 38". Sdlg. R132-1. A unique colour pattern showing up from two parents that have only plicata genes in their background. Colour is pristine white, clear and pure. Vibrant red beards light up the flowers and plicata stitching of purple are highlighted at hafts. A very pretty Iris with super branching and bud count. Good grower. (Ranee's Palace X Touch of Bronze) **\$25.00**

ON CLOVER (Blyth '85 Aust.) E-M. 32". Sdlg. P43-B. To us, a much improved chartreuse Ruffles which is one of its parents. Standards are white-chartreuse with a pink cast; Falls are greenish white with a definite edging of 1/4" of chartreuse. Beards are yellow. Good grower, flower form is wide and ruffled with excellent substance. (Magic Man X Chartreuse Ruffles) **\$25.00**

PASS THE WINE (Blyth '85 Aust.) E-M. 36". Sdlg. Q101-5. Standards are champagne with smoky lavender infusion: Falls are velvety smoky red plum, a very smooth colour, and each fall has 1/4" band of lilac rose. Brilliant tangerine red beards. Lovely form. Branching is super and foliage is noted for its very dark purple base. An Iris we are proud of and one of 4 or 5 to be named and introduced from this cross. (Tomorrow's Child X Magic Man) **\$25.00**

PEKING DANCER (Blyth '85 Aust.) E-M 32". Sdlg. N100-3. From our long running amoena breeding program comes this pretty addition. Standards are oyster white with chartreuse midrib, closed and ruffled. Styles are noticeably tipped lemon; falls are olive green to olive brown on chartreuse, deepening towards hafts. gold beards. In the garden it looks to be a brown amoena. Good grower and increaser and an interesting parent. Subtle and exotic, super for floral art. ((Snow Peach x Outer Limits) X Chimbolam) **\$18.00**

POLYNESIAN FLAME (Blyth '85 Aust.) M. 36". Sdlg. No. P51-C. A strikingly different sister to last years introduction Alpine Journey and this years Silk Sari. Standards are butterscotch, ruffled and closed; falls are burgundy, blacker in the centre; old gold beards, lavender at outer tips of hairs. Large blooms on well branched stems, fine form and a striking Iris. (Tranquil Star X (Love Chant x Festive Skirt)) **\$18.00**

RANEE'S PALACE (Blyth '85 Aust.) Sdlg M91-2. M. 42". It has taken us a while to get enough stock of this one to introduce due to accidental damage to some stock early in its life. It is a sister to the popular Mossenova. Standards are peach, closed and very smooth; falls are lavender with striking solid magenta hafts. Wide flared falls. Vivid tangerine beards. Already proven a good parent, see Lipstick Lies, this years introduction. (Embassadora X ?) **\$25.00**

ROMAN PALACE (Blyth '85 Aust.) VE-M 40". Sdlg. R12-2. A wide flared and striking bicolor/plicata. Standards are butterscotch gold, ruffled; falls are white edged with 1/2" plicata band of rich brown, deepening at hafts. Vibrant gold beards. Well branched and prolific. A good one for the early show. For comparison, it is lighter in colour from its parent Broadway. (Michigan Pride X Broadway) **\$15.00**

SCULPTRESS (Blyth '85 Aust) M-L 32". Sdlg. P32-1. We have been trying to get a true pink amoena from various sources. This one is by crossing pinks to pink amoena lines and a near amoena has resulted. Standards are near white with a faint pink flush hardly noticeable; falls are pastel pink with a deeper wash intensifying towards hafts. Beards are white tipped apricot. Wide flaring form and a good grower. (Chimbolam X Wings of Dreams) **\$15.00**

SILK SARI (Blyth '85 Aust.) E-M 34". Sdlg. P51-A. Most of the seedlings in this cross, well over 100, were amoenas or bicolours, and this one was the exception. It is a self or near self of pastel orchid to softest blue; falls have a slightly lighter tone. Beards are orchid tipped tangerine. (Tranquil Star X (Love Chant x Festive Skirt)) **\$18.00**

ALPINE JOURNEY (Blyth '84 Aust.) E-EM. 38". Quite the best yellow amoena we have seen in the Iris world. Standards are snow white, closed and ruffled. Falls are golden yellow, wide and liling. Beards are golden yellow. Branching and budcount are super. Being an early blooming variety it makes a spectacular show in the early part of the season. BATEAU IVRE (Anfosso 82 France) M-L 36". It is a while since we have been able to list any Iris from France but again there is a resurgence of interest in breeding Iris in France in the Anfosso and Cayeux gardens. This delightful iris has been much enjoyed by us since its first bloom in Australia 2 years ago. Difficult to convey, stands are lightly ruffled pink grey, falls are slightly deeper with a blue area below blue grey beards. Super grower and great branching. (Touche X Gypsy Prince) **\$20.00**

BEACHGIRL (Blyth '83 Aust.) E-M-L 38". We were thrilled when this lovely orange amoena first flowered and it has continued to improve over the past three seasons. The standards are white with a faint hint of pink at midribs on new flowers. Falls are orange-apricot, very smooth and strong in colour. Beards are tangerine-red. Form is ruffled and wide for its limited colour class. Branching is excellent with often 4 or 5 flowers out at once. Makes a great garden display. Also it has unlimited potential as a parent. - BLUEBIRD WINE (Blyth '82 Aust.) VE-M. 32"**. Iridescence is the first thing noticed about this lovely Iris, standard are pale blue infused red-violet at midribs, solid violet falls, they have a heavy overlay of iridescent red. A very difficult colour hue to describe. Our garden notes say that it is a redder tone than its parent Mystique. Beards are white tipped mustard. Being early and having good branching it is a great contender for early shows. (Magic Man x Mystique) HC '83, HM '84. **\$10.00**
- BLUE ZIPPER (Niswonger '81 USA) M. 33"**. A lovely pale blue self with lovely form. Beards are startling, being deep blue and bushy. Branching is good. (Dreamin' Blue x Inv. Niswonger Sdlg.) HM '84 **\$9.00**

- BRILLIANT EXCUSE (Gibson '81 USA) M. 34"**. The most contrasting of the newer dark blue black on white plicatas. A much improved Going My Way. An exciting addition and well worth a spot in the garden. (From involved Gibson seedlings) **\$20.00**
- BRISTO MAGIC (Schreiner '82 USA) EM. 35"**. Standards are near white; falls are erythrite red edged with 1/4" of white. An advance in colour towards a red amoena. A good grower with fine branching. (Breaking Dawn x Latin Lover) HM '84 **\$17.50**
- BROADWAY (Keppel '81 USA) E-EM. 38"**. Absolutely stunning variegata-plicata. Deep gold standards; falls are ivory with a broad edging of rich red brown. The best of its class. May rebloom once established. (Keppel Sdlg. x Flamenco) Walther Cup and top HM '83. **\$20.00**
- BRONZE FAWN (Gibson '83 USA) M. 36"**. Another vibrant plicata from Jim Gibson. Standards are orange veined violet; falls are yellow orange, stitched maroon and garnet and a white signal in the centre of each. Orange red beards. (Beyond x Orange Plume) **\$25.00**
- BUBBLE BATH (Ghio '82 USA) M. 38"**. Super fine ruffles are the first thing one notices about this new one from Joe Ghio. Colour is white with a blue cast more pronounced in the heart. White beards. Very popular in America. (Social Whirl x Intuition) EC '78, HM '84 **\$20.00**

- CAMEO WINE (Blyth '82 Aust.) M. 36"**. Apart from being a super parent for pink amoenas and bicolours this is a beautiful garden Iris, standards are soft pastel pink with a slight blue hue at the midrib, they are closed and ruffled. Falls are deeper rose pink and deepening towards hafts. Petal edges are lighter. Light burnt tangerine beards. Wide flaring form, superb grower, altogether we are very pleased with this and all who see it love it. ((Snow Peach x Martinique) x Embassadora). Silver medal - Florence '85. **\$12.00**
- CATALYST (Keppel '80 USA) E-M. 35"**. We have been very impressed with this lovely creation. Clear, bright sunflower yellow, not gold, with falls a bit darker with a velvety finish. The beards are yellow orange. Well branched stems and a great garden display Iris. Very ruffled and faintly laced. (Generosity x Involved Keppel Sdlg.) HM '82, AM '84 **\$11.00**

- CHIEF HEMATITE (Gibson '83 USA) M. 36"**. Prolific rebloomer. Nearly a solid coloured plicata. Stands are red brown; falls are velvety deeper red brown, orange brown beards. Wide and ruffled, a rapid grower. **\$16.00**
- CHIEF WAUKESHA (Blodgett '78 USA) M. 37"**. Standards are oxblood red; falls are slightly deeper, red beards tipped orange. Fine substance and popular. (Topaz Gem x ?) HM '80 **\$12.50**
- CHINA DRAGON (Shoop '79 USA) M. 36"**. Ruffled and lightly laced bright deep orange self. Red orange beards. Lovely clear colour. (From involved Shoop Seedlings) **\$17.50**
- CHINESE TREASURE (Blyth '83 Aust.) E-EM 36"**. Brilliant in colour, particularly its beards, is this new approach to a rose amoena. Standards are white with a soft pink influence in midribs. Falls are deep rose with a strange bluish hue. Beards are vivid mandarin red. Form is ruffled and branching is very good. It has proved itself as a parent and as a garden show is unsurpassed. It is a sister to Hush At Twilight and Polynesian Princess. (Lisa Ann x Child of Fortune). **\$12.00**
- CHRISTMAS RUBIES (Hamblen '78 USA) ML 32"**. We think it is the best American red bearded white as far as flower is concerned as it is pristine and clear. It is however a slow increaser and may not do well in hot areas. It is still very beautiful. ((Arctic Flame x Violet Fire x sib)) x ((Garden Party x Fair Luzon) x Arctic Flame) x Valentina). HM '80, AM '82. **\$20.00**
- CINEMA (Williamson '82 USA) M. 36"**. Butter yellow stands; falls are white with butter yellow hafts and beards. (Islands of Light x Fan Club) **\$10.00**

DWARF BEARDED IRIS

Dwarf Iris have a tremendous colour range and are very floriferous, making them good rockery or border plants. They are very easy to grow and multiply very quickly, giving you a good clump in the first year. They need full sun and plenty of good soil for a loose root run. It is advisable if the soil is heavy to build up the beds and add sharp sand to improve drainage. Don't give them any nitrogenous manure as this will cause leaf spot and, in turn, bring on rhizome rot. Use superphosphate and potash. Unlike the taller Iris they will not tolerate shade. Lift them every three years or sooner if they are extremely fast increasers. Do not allow them to dry out over summer. A good soaking once a week will suffice. They will flower in September and continue until the Tall Bearded flower in October. They are mostly suitable for cooler winter areas of Australia and are not particularly suitable for warmer coastal areas of N.S.W. and Qld.

They should have winter frosts on them and a period of winter cold to make them bloom. Try some in pots!

LOUISIANA IRIS

This Iris will grow in similar conditions as do Bearded Iris but have the added adaptability of growing well in semi tropical and tropical areas of Australia. Areas with high summer rainfall. They will take wet feet, even to growing in water. They prefer full sun but in hotter areas light shade could help their growth. They are evergreen, will take rich manure, can be moved at any time, will not tolerate lime, and like lots of water in summer. In other words very easy to grow. CULTURAL DIRECTIONS FOR BEARDED IRIS

PLANTING TIME

For best results plant from December till March inclusive. Early planting establishes a plant and ensures blooming next season. Divide clumps every 3 or so years.

PLANTING LOCATION

Sunny well drained position. Sun for at least ½ day. Raise bed where necessary for drainage.

DEPTH OF PLANTING

Place Rhizomes just below soil level (¼") spread roots and water until established.

DISTANCE APART

12 - 20 inches apart - for a quick clump effect, plant in groups of 3 Rhizomes. This necessitates re-planting every 2 years.

FERTILIZER

Don't overfeed and don't apply animal manure or excess nitrogen. A general balanced fertilizer is ideal in August and Jan-Feb. and lightly cultivate in. We have found that Osmocote 1 teaspoon per Rhizome when planting is ideal and give excellent results.

CULTIVATION

Don't cultivate deeply - feeding roots are near the surface. Remove dead leaves. Don't cut foliage down - this reduces bloom next year. Keep weed free.

DISEASES

Leaf spot usually causes no harm but is unsightly. The only prevention is to use Plantvax - it is not a cure. Rhizome rot is usually due to over fertilization, excess watering or insect damage - clean away rot and apply bleach, or sulphur or any other agent that you have found effective, e.g. Agricultural Terramycin.

GROWING IRISES by Graeme Grosvenor
(Available at Tempo Two)

A super new book of 88 pages of detailed information about growing Iris in Australian conditions and not just Bearded Iris. It has chapters on all the main Specie groups as well as help in hybridising Iris, photographing Iris, exhibiting and arranging and purchasing new plants as well as where to get them. It has also 192 colour plates and numerous black and white photos.

We have read this book and can thoroughly recommend it. It was badly needed as most other Iris books are for the Northern hemisphere. It is sure to be popular with all gardeners.

SPURIA IRIS

These lovely Iris require simple conditions. Full sun, good drainage and to be left undisturbed for 5 or 6 years. They will grow in the same area as Bearded Iris, that is hot summers and few frosts in winter. They have a short dormant period over late summer or about 6 weeks after flowering, then they start to grow in Autumn and are rich lush green over winter. Usually on moving they don't flower the first season but some like Dawn Candle will bloom first year. Plant rhizomes about 2" below surface and once established don't water in dormant period. A general fertilizer can be used as well as organic fertilizer as long as it is not too fresh. Flowering time is just after Tall Bearded finish.

EVANSIA IRIS

IRIS BOURNE GRACEFUL (Ellis '75 Eng.) From England comes this new Hybrid — easy to grow, in fact prolific with plenty of stolons making a large clump in 18 months. Very pale mauve with mauve spots around yellow crest. AM (BIS) '75. **\$6.00**

IRIS JAPONICA var. DARJEELING. 3' high flower stems with a multitude of buds on each stem opening over a 3 to 4 week period into beautiful orchid white frilly flowers about 2 inches across. It would prefer protection from the hot afternoon sun as this could scorch the pale green lush foliage. Keep well watered in summer. Good variety to bring indoors as it keeps on coming for days. **\$3.00**

IRIS WATTII. Easy to grow with protection from extremely severe frost and could burn on foliage in drought. We grow out in open position. Dark green wide foliage flowers larger than Japonica and slightly deeper, with deeper lavender spots on petals of light orchid lavender, orange spotted crests. **\$5.00**

FAIRYLAND. Gracefully arching spikes of lacy ice blue flowers, flower stems are black. Blooms early spring. 28" tall. **\$6.00**

SPECIE IRIS

IRIS TRIDENTATA. A water Iris, not from the laevigata section but a member of the Tripetala section — a native of American Atlantic coastal swamp. It should have a very wet spot in the garden. One of the last of the Iris to bloom each season, coming out in December on thin graceful 18" stems. Small violet blooms 2" across with no standards make it a very intriguing Iris. Long running rhizomes about as thick as a pencil but easily controlled. May be grown in a large pot or box in a pond. Rare in Australia. **\$3.00**

HOLDEN CLOUGH (Patton '71 Eng.) 26" L. Chrysographes Hybrid. Yellow, veined purple giving a rich brown appearance. Wide, dark green glossy foliage. It likes an open, sunny position. Interesting floral art subject. **\$5.00**
