# Mission Bell Gardens

## HAMBLÉN INTRODUCTIONS FOR 1989

**McKAY** (Hamblén) 36 in. ML. Ruffled, lacy bright pink (RHS 38D) with slightly lighter toned falls and cerise beards (30B). Large Blossoms are beautifully formed with cupped standards and broad flaring falls. Strong, show-bench stalks have modified candelabra branching with 8 or more buds. Great garden value. Vigorous. (Frances Gaultier sib X ((((((Valimar sib x June's Sister) x Fifth Avenue) x Rippling Waters) x Crystal Flame) x Cloud Crest) x Snow Blaze) Sdlg. H83-52A 35.00

10.00

**YESTERDAY'S DREAM** (Meek '85) Red-violet, deeper toned falls with white plic patch.  
10.00

## IRIS PLANTING AND CULTURAL DIRECTIONS

**WHERE TO PLANT.** The ideal location for Iris is a sunny, well drained position. Sunshine at a minimum half days; Iris will not do well in deep shade. No water should stand in Iris beds. Raise beds slightly above the level of garden paths if necessary.

**DEPTH TO PLANT.** Place rhizomes just below the surface of the ground with the roots well spread out underneath so that the rhizome is within reach of the warmth of the sun's rays while the roots beneath are in moist (not soggy) soil. Be sure to firm the soil tightly around each rhizome when planting. Follow ordinary good garden practice of watering and settling soil on newly set plants.

**DISTANCE APART.** This will depend on your particular plans. Generally iris are planted from 14" to 2' apart. If you desire immediate clump effect plant 8" apart in groups of 3 or more of one variety.

**FERTILIZATION.** Iris will thrive without feeding but will respond to its application. In the preparation of a new Iris bed, spade in a good application of compost below the roots. An application of a well balanced fertilizer applied as a top dressing dusted around the plants in early spring or very late fall is desirable. (Avoid fertilizers high in nitrogen.)

**CULTIVATING.** Do it shallowly. Iris feeding roots are very near the surface. Keep your Iris free of weeds and do not allow neighboring plants to encroach upon them. Remember, they should have sunlight right down to the rhizome. Remove the outer leaves as they begin to brown. At all times keep litter, old Iris leaves, grasses, etc., away from the rhizomes. Clean cultivation is the finest precaution for Iris troubles.
