TEMPO TWO — SPRING 1989 — PEARCEDALE

Spring has returned again and it promises to be a better one for Iris than the last two springs have been. Last year the winter produced few frosts across the country giving rise to a poor bloom season in so many areas. Many people have confirmed this with their letters and queries, so to all who did not ask but noticed the difference, mild winters are the cause.

Another disappointing trend has been the Department of Agriculture's quantum increase in quarantine fees. These fees are to stop disease entering the country. This we thoroughly agree with, but over the past 30 years, we have been able to import Iris through a quarantine system that has worked very well and no serious disease has entered. Now, every plant has to be virus indexed checking for virus that are either already here or have never been observed in Iris. It seems as if there has been ample chance to bring in any disease over the period since Iris were first brought into the country over 100 years ago, now the gate is being closed to the detriment of Australian gardeners when there was an excellent system already working. It is now going to cost on average \$30.00 per plant to import new ones without the cost of the plant at the other end, health certificates and ever-increasing air mail costs. This will mean that fewer and fewer new varieties will be available in Australia in years to come. We can say that one good thing that will emerge from this is that there will be a greater dependence on Australian breeders of Iris to produce the Iris Australian gardeners will demand. These remarks also are applicable to other plants.

Over the past couple of seasons we have had some delightful advances among our dwarf bearded Iris. We are introducing some this season and in the next few years some dramatic new colour combinations will be available. Bright pinks with electric blue beards, all shades of apricot, orange and colours we don't have names for; many with blue or purple beards. Lots of colour combinations not seen before in bearded Iris. So keep some spots available to try some of these new little gems in your garden.

The main bloom season for Iris is the last half of October and the first half of November. The dwarf Iris are out from about the end of September, so if you want to call and see the Iris in bloom, yourself. The gardens are open each day during the bloom season. Many garden clubs and societies also come and visit, so if you would like to combine a visit to Tempo Two along with some other nurseries in the area, do so by all means.

Happy gardening
Barry and Lesley

TALL BEARDED IRIS NEW INTRODUCTION FOR 1989—90

BLUES BROTHERS (L. Blyth 89) EM 34" Sdlg TL64-1. Unique in its form and the first thing that is noticed about it is three perfectly rounded falls like three coins completely filling the hafts. Standards are light blue; falls are mid blue with icy blue white beards. Branching is great and suitable for showing with three to four flowers out at once. Great grower with heaps of bloom out at once. (Song of Norway X Maryott DM51Q) **\$25.00**

CLOSE YOUR EYES (Blyth 89) ML 40" Sdlg U82-A. Striking and tall creamy apricot-melon with an apricot beard. Wide, ruffled and flared. Show branching with 4 and 5 bud placements. A more creamier sister to Samurai silk. (Edna's Wish X Orangerie) **\$20.00**

COLOUR PAGE (Blyth 89) E-M 38" Sdlg T103-D. A very difficult to describe colour pattern. Standards are pale icy to orchid blue; falls are a red, pink, rose blend with bright red beards. Branching is 3 to 4 way with good bud placements. A pretty pastel Iris liked by many. (Beach Girl X In Smoke) **\$20.00**

DANCE MAN (Blyth 89) M-L 36" Sdlg U111-1. Beautiful big flowers of bright yellow which is an improvement on its parent Speculator. It has wide cream outpouring on the falls below gold beards. Excellent form. (Speculator X Orangerie) **\$20.00**

ELEGANT BLUE (Paul Blyth 89) M-L 36" Sdlg 4-51-D. This makes a lovely blue clump like a large cushion. Standards are powder blue with falls just slightly deeper, brownish hafts and navy blue tipped bronze beards. The beards are a standout. Wide, flared and ruffled with show branching. It has a light sweet perfume. (Touch of Bronze X Pacific Gambler) **\$20.00**

ENGLISH CHARM (Blyth 89) M 34" Sdlg Q113-2. This is a sister to the popular Magharee. Standards are cream veined lemon; falls are smooth light apricot with a 1/4" band around the falls of cream. Beards are tangerine. Branching is a little tight for showing, but it is a spectacular garden Iris because of its vast amount of bloom with a high bud count and quick increase. ((Love Chant x Festive Skirt) X Cameo Wine) **\$20.00**

GREEN AND GIFTED (Paul Blyth 89) E-M 36" Sdlg 7-14-1. So many people wanted to know about this as a seedling. A written description does not give the effect that it gives once it is seen. Standards are greeny-cream; falls are greeny cream with a light pastel overlay fading out after the first day to a standard colour. Beards are big and brown to old gold with green veination around beards. It gives that green effect that is often asked for in Iris but seldom seen. Excellent branching and bud count. (Hello Hobo X Beau Zam Sib) **\$25.00**

HIGH WATERS (Blyth 89) E-EM 38" Sdlg V71-2. A complete self of blue to blue violet. The pedigree indicates the quality that can be expected as there are many blues available, but this is a fine advancement and well worth growing. It has magnificent branching, it is wide, flared and ruffled and ideally suited for that early show with up to 6 flowering points. It also makes a super garden plant. To top it off, it has a lovely perfume. (Perfect Couple X Pledge Allegiance) **\$25.00**

IMAGINE ME (BLYTH 89) E-M 34" Sdlg U71-1. A smooth apricot bitone with coral apricot flushing around midribs. Falls are just a few shades deeper and slightly deeper at halves. Bright red beards. Good branching, makes a mass of colour and it is an excellent garden Iris. (Magharee sister X Street Dancer) **\$25.00**

JUST DELICIOUS 9Blyth 89) E-M 36" Sdlg V60-1. A beautiful and vibrant plicata. Standards are champagne pink; falls are white with a 1/4" rosy violet stitched edge of falls. Bright orange red beards. Excellent wide, flared and ruffled form. Superb branching giving lovely balance to a stem. A sure show winner with 3 and 4 out at once. Good grower (Gigolo X Shenanigan) **\$25.00**

LIQUEUR CREME (Blyth 89) M-ML 36". Standards are creamy white; falls are white with 1/4" lemon yellow edge, deepening at hafts and gold beards. PAGAN DANCE (Blyth 89) E-M-L Rebloomer in Autumn. Sdlg S146-A. Difficult to convey how this Iris looks when flowering. It's lovely. Standards are violet; falls are velvety black-violet with a 3/8" edge of the standard colour. It has a sort of iridescent electricity about it and everyone loves it. Branching is a bit variable like its parent, but it makes a tremendous show and is a very reliable rebloomer for us. Good grower. (Cameo Wine X In Smoke) **\$25.00**

SKY ECHO (Blyth 89) E-M 34" Sdlg V70-2. A super Iris for us. The colour is icy blue white with slightly lighter falls, with a faint deeper area below white beards. Beautiful form and heavy substance allows it to stand rough weather far better than most. An excellent show Iris. Deep purple based foliage. (Olympiad X Pledge Allegiance) **\$25.00**

SUPER DANCER (Blyth 89) E-M 36" Sdlg U69-A. Standards are tan-beige-apricot with a violet flush at the midribs; falls are light plum violet, heavily ruffled. Tangerine beards. Very wide and flared form. An interesting colour pattern. (Street Dancer X (Nefertiti X Keppel 77-111Q)) **\$20.00**

SWAIN (Blyth 89) VE-M 36" Sdlg U59-A. A strongly coloured and vibrant Iris, standards are tan brown; falls are red-brown with gold beards. The form is wide, arching and nicely ruffled. Excellent show Iris for the early show, flowering here on Oct 12th. A super coloured Iris coming from a plicata outcross. Will be a great parent, (Broadway x Showbiz) X ((Alpine Castle x (Lisa Ann x Flirtation Walk)) x (Flamenco x Joyce Terry)) **\$25.00**

DWARF BEARDED IRIS

Dwarf Iris have a tremendous colour range and are very floriferous, making them good rockery or border plants. They are very easy to grow and multiply very quickly, giving you a good clump in the first year. They need full sun and plenty of good soil for a loose root run. It is advisable if the soil is heavy to build up the beds and add sharp sand to improve drainage. Don't give them any nitrogenous manure as this will cause leaf spot and, in turn, bring on rhizome rot. Use superphosphate and potash. Unlike the taller Iris they will not tolerate shade. Lift them every three years or sooner if they are extremely fast increasers. Do not allow them to dry out over summer. A good soaking once a week will suffice. They will flower in September and continue until the Tall Bearded flower in October. They are mostly suitable for cooler winter areas of Australia and are not particularly suitable for warmer coastal areas of N.S.W. and Queensland.

They should have winter frosts on them and a period of winter cold to make them bloom. Try some in pots!

SPURIA IRIS

These lovely Iris require simple conditions. Full sun, good drainage and to be left undisturbed for 5 or 6 years. They will grow in the same area as Bearded Iris, that is hot summers and few frosts in winter. They have a short dormant period over late summer or about 6 weeks after flowering, then they start to grow in Autumn and are rich lush green over winter. Usually on moving they don't flower the first season but some like Dawn Candle will bloom first year. Plant rhizomes about 2" below surface and once established don't water in dormant period. A general fertilizer can be used as well as organic fertilizer as long as it is not too fresh. Flowering time is just after Tall Bearded finish.

LOUISIANA IRIS

These iris will grow in similar conditions as do Bearded Iris but have the added adaptability of growing well in semi tropical and tropical areas of Australia. Areas with high summer rainfall. They will take wet feet, even to growing in water. They prefer full sun but in hotter areas light shade could help their growth. They are evergreen, will take rich manure, can be moved at any time, will *not* tolerate lime, and like lots of water in summer. In other words very easy to grow. Colour range is wide as descriptions below indicate.

CULTURAL DIRECTIONS FOR BEARDED IRIS

Bearded iris grow in most areas of Australia except coastal areas north of Newcastle and coastal areas north of and including Perth.

They need Winter frost, at least 1 or 2 per winter and low summer rainfall. Hot and dry in summer. These conditions initiate spring bloom. The lack of winter cold can give lots of leaves and little bloom. Excessive summer rain or water can cause rhizome rot.

Give them a sunny well drained position, Sun being at least half the day, preferably afternoon sun. They like similar conditions and cultivation as roses.

Fertilizers — On planting, a slow release fertilizer. We use and recommend 9 month Osmocote. In August a side dressing of a balanced fertilizer, such as Daphne, Rhodotonic or something with a balanced N. P. K. ratio. Avoid fertilizers high in nitrogen such as Blood & Bone, Animal manure and heavy mulches. These all cause excessive growth and can cause rhizome rot. If compost is used, or old animal manure, dig it in well before planting. Don't put it around rhizomes.

Replant about every 3 years in December through March. Don't cover the rhizome with more than 1/2" of soil.

Reasons for non bloom can be many and a combination of some.

They could be . . .

1. Too crowded. Lift and divide.
2. Too shaded. Move.
3. Fertilized with nitrogenous fertilizer.
4. Planted too deep. Lift and replant.
5. Overwatering in summer. Once a week is ample.
6. Lack of frosty mornings.
