Updating Winners and Potential Winners

Dykes 2015

Welcome to the twentyfourth regular issue of the **AIS News & Notes**. Please let us know what you would like to see here. And if you have notes you would like to add, or you would like to become a reporter, please let us know! You can contact either [Bob Pries](#) or [Wayne Messer](#) with your comments or interest.

Views from the Portland Convention

While the *Irises Bulletin* will have reports from the recently concluded 2015 AIS Convention, you can see some early photos and news online.

'Royston Rubies'

Start by checking out the American Iris Society Facebook [page](#). They have posted photos and shared those posted by others of gardens and irises. Among these you can see the **Lloyd Zurbrigg-Clarence Mahan Cup winner, Adam Cordes**, and his winning seedling 'Royston Rubies'. (I should point out that you will have to scroll past more recent photos to get to the Convention photos.)

The convention also made it into newspapers with photo galleries. The *Oregonian* had a report on the visitors, growing tips from the [Greater Portland Iris Society](#), and a gallery of photos from the Mt. Pleasant Iris Farm. See them all starting [here](#). The *Columbian* also has a gallery and interviews that you can see [here](#). The Camas-Washougal Post-Record also has interviews and photos from the visit

One of the types of topics in the **Iris Encyclopedia** are the galleries of winners of major awards. We have the [American Dykes Medal Winners](#) and all the Medal Winners leading to the Dykes Medal. Links to all these galleries and more can be found [here](#).

There are also galleries showing the **candidates for the 2015 Medals** which you can find with the links [here](#).

For all these galleries, the photos used are those on the individual cultivar's page. Which means as changes are made to the cultivar's page they may affect the galleries appearance. Photos may be removed causing them to disappear from the galleries. And, of course, photos are added to the cultivars which allows us to update the galleries.

The galleries have recently been updated so you should find very few missing photos in them. There are two of the Medal Eligible Irises that we do not have photos for in the **Iris Wiki**. They are ['Currier McEwen'](#) and ['Ruth Wilder'](#). These are respectively eligible for the [Randolph-Perry Medal](#) and the [Founders of SIGNA Medal](#).

Please let us know if you have photos we can use of either of these irises. We will be glad to add them or you can. You can find other award winners needing photos [here](#). Thank you for all your help and enjoy the photos.

While you're checking it, you can also learn about plans for naming a **Centennial Celebration Iris**. This will be chosen in 2019 from the irises not yet introduced, but present, at the 2019 AIS Convention (in Region 14). Details are on the same page in the Irises *Bulletin*. More Convention Notes

The [Bluegrass Iris Society](#) has some exciting Convention and iris news items. Their president, David Cupps, was video-blogging from the Convention. Short interviews with hybridizers. You can find them on their [Facebook page](#) - look in the left hand column for videos. They also have earlier videos there including a television appearance before their iris show and various tips on growing irises. (You can see all their videos on their Facebook [video page](#); but, you should also check out their regular page for photos.)

'In The News'

BGIS also received an award for the **most new AIS members of any local society over the past year** at the Convention. Congratulations!

Neil Houghton of the [Greater Rochester Iris Society](#) also has video interviews from the Convention. You can see him at [Mt. Pleasant Iris Farm with Gerard Heemsker](#) and [interviewing Terry Aitken](#). Also, see the [Region 2 homepage](#) for photos of Convention winning irises.

A Puzzling Noid

This is an iris that came to me as a noid. Presumably is a tall bearded. The first bloom was May 22nd. You can find the [standard difficulty puzzle here](#) and the [harder puzzle here](#).

Do you know what it could be? Please send you thoughts to wrmesser@gmail.com Thank you for your help. And enjoy the puzzles. Please let me know what else you would like to see as well.
